Handbook of Respiratory Protection LeeAnn Racz,Dirk P. Yamamoto,Robert M. Eninger,2017-11-22 Respiratory protection includes devices and management techniques for keeping people safe from hazardous materials. This handbook presents the state-of-the-art in respiratory protection technology as well as best management practices for work centers. Included are topics relevant to industry, government, and healthcare that provide guidance and tools for ensuring the best possible protection for workers. Most books on this topic are at least 20 years old. Research, technology and management techniques have advanced over the past two decades. This new handbook is needed to provide updated information relevant to today's occupational needs for industrial hygiene and safety professionals.

The Entrepreneurial Community College John E. Roueche,Barbara R. Jones,2005 Develop an entrepreneurial culture with the best practices discussed inside this resource. Declining public resources, coupled with the demand that we do more with less, make it more of an imperative that entrepreneurship, flexibility, and adaptability thrive in the community college environment. Seeing how other community colleges have brought entrepreneurship and creativity to life in their programs and services will inspire your own ideas for increasing revenue and reducing costs. You will also discover how strong leaders can become collaborators, facilitators, consensus makers, and incentive providers.

Experts Versus Laymen Barney Glaser,2017-12-02 This book studies the relationship and balance of power between experts and laymen. It is rooted in the author's analysis of customer and contractor interactions in the housing industry, but relevant to other kinds of expert-layman relationships. Many of the conflicts between customer and contractor noted by the author also occur in lawyer-client, student-teacher, and doctor-patient relations.The author's research is structured around three core categories pertaining to experts' relations with laymen: choosing experts, power symmetry, and what he calls elsewhereism. The first category has to do with seeking experts, finding them, referrals, and judging whether or not to use experts. Power symmetry concerns the inherent imbalance of power between an expert and a layman. Elsewhereism focuses on the constant competition that laymen face with unseen others in claiming the time and services of an expert.Experts versus Laymen broadens the analysis of expert-layman phenomena far beyond similar studies. It examines processes of bidding, gaining information, inspecting and evaluating work, winning trust, bargaining over costs, and determining who has situational control. This book discusses not only the contracting process in the housing industry, but far more important a world of power and domination in expert-laymen relationships.

Leading Creative Teams Eleazar Hernández,2016-10-20 Learn the skills you must master to assume leadership roles—creative directors, art directors, and advertising managers—on creative teams and in integrated branding campaigns for corporate clients. This book compares and contrasts the skill sets and responsibilities of creatives with those of managers who direct creative teams. Technical competence in the creative arts is a necessary but not sufficient prerequisite for promotion to and success in positions directing creative teams. Business, management, and communication skills are equally necessary. Leading Creative Teams reviews the business metrics that the manager of a creative team must be able to manipulate and present persuasively to the organization to prove that the team’s creative excellence delivers superior ROI. Award-winning designer and veteran creative director Eleazar Hernández walks you through the creative manager’s skill sets—technical, business, management, and communication. He covers the techniques and tools common to the direction of creative teams in all industries: brainstorming, creative exploration and visual communication tools, internal and client presentations, critiquing, mentoring, and copywriting. Hernández shows how creative directors can apply management and leadership skill sets to different kinds of creative teams found across interactive, graphic design and advertising industries and how they orchestrate methods among team members. He details how creative teams vary in their concepts and principles, composition, objectives, and processes according to their specific industries and project requirements. And he shows you how to shape your career trajectories toward creative management roles in your chosen field. Leading Creative Teams features information on the processes and best practices for ideating, developing, and directing advertising campaigns, graphic design projects, :30 TV spot and :30 radio spots. Drawing on interviews with top creative directors, art directors, and advertising managers, the author explores how the roles of creative team managers are evolving in response to changing technologies and business models. What You'll Learn Learn the technical, business, and management skill sets of creative management Lead and orchestrate teams of creatives Discover tips, tricks, and techniques for creative direction of web, broadcast, and print projects Shape your career trajectory toward creative management Learn the dos and don’ts of creative presentations Who This Book Is For Mid-level and junior creatives—graphic designers, web designers, copywriters, and artists—and ad students who seek information on the specific skills, experience, and credentials they need to qualify for promotion to creative management. The secondary readership is creative directors, art directors, and advertising managers who lead web interactive, design, and advertising creative teams and who develop and direct integrated branding campaigns for corporate clients.

Still Going Wrong! Trevor Kletz,2003-11-14 This is Trevor Kletz's follow up to his extremely successful What Went Wrong? Case Histories of Process Plant Disasters. In it, Kletz reinforces the messages in his now-classic book of famous case histories, but the majority of the book covers points not covered in the original. This new volume will focus more on procedural changes that can be made, not only at the technical or engineering levels, but at the managerial level, to prevent disasters from happening. * This volume follows up on the cases and strategies outlined in the original million-dollar seller: What Went Wrong * Contains many new cases and areas for improvement, including the hazards of rust, corrosion, and many more new topics * Written by the world's leading expert on industrial safety
