Springer Handbook of Augmented Reality Andrew Yeh Ching Nee,Soh Khim Ong,2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to augmented reality (AR) technology, its numerous applications, and its intersection with emerging technologies. This book traces the history of AR from its early development, discussing the fundamentals of AR and its associated science. The handbook begins by presenting the development of AR over the last few years, mentioning the key pioneers and important milestones. It then moves to the fundamentals and principles of AR, such as photogrammetry, optics, motion and objects tracking, and marker-based and marker-less registration. The book discusses both software toolkits and techniques and hardware related to AR, before presenting the applications of AR. This includes both end-user applications like education and cultural heritage, and professional applications within engineering fields, medicine and architecture, amongst others. The book concludes with the convergence of AR with other emerging technologies, such as Industrial Internet of Things and Digital Twins. The handbook presents a comprehensive reference on AR technology from an academic, industrial and commercial perspective, making it an invaluable resource for audiences from a variety of backgrounds.

Netnography Robert V Kozinets,2019-10-14 Netnography is an adaptation of ethnography for the online world, pioneered by Robert Kozinets, and is concerned with the study of online cultures and communities as distinct social phenomena, rather than isolated content. In this landmark third edition, Netnography: The Essential Guide provides the theoretical and methodological groundwork as well as the practical applications, helping students both understand and do netnographic research projects of their own. Packed with enhanced learning features throughout, linking concepts to structured activities in a step by step way, the book is also now accompanied by a striking new visual design and further case studies, offering the essential student resource to conducting online ethnographic research. Real world examples provided demonstrate netnography in practice across the social sciences, in media and cultural studies, anthropology, education, nursing, travel and tourism, and others.

Operational Excellence in the New Digital Era Adedeji B. Badiru,Lauralee Cromarty,2021-06-22 Operational excellence, as a quest in the prevailing digital era, is predicated on a systems view of the operating environments in business, industry, government, academia, and other organizational entities. This book uses a systems-based approach to show how operational excellence can be pursued, achieved, and sustained. It offers a systems perspective for operational excellence and discusses the evolution of products from the classical operation era to present day digital operations. It covers the role of global markets on domestic operations, presents operational work design and ergonomics, and combines industrial engineering, advanced research, and practical experience. This book is a useful guide for scholars, practitioners and those involved in engineering, management, and business fields.

The Online Safety Playbook Arun Soni,2022-03-01 Children must learn several fundamental skills early in life to protect their safety. Before crossing the street, look both ways. Seatbelts must be worn at all times. Do not talk to strangers. Another item to add to the list is to be wary of hackers and cyber predators. Teachers and parents may teach students of all ages fundamental cybersecurity skills and encourage them to use digital hygiene daily. They can achieve it by including more online educational resources into their curricula and at the same time educating and updating themselves with

cybersecurity skills. Children can be taught to automatically protect themselves against cyber threats, just as they do while crossing the street. Just ask yourself- Are we preparing our children for life in the digital age? Are we providing them with the required training and resources to deal with never-before-seen cyber threats? Is our educational system able to keep up with the rapid changes in our society, including technological advancements? The only problem with teaching Cybersecurity in schools and homes is that educators/parents may not be entirely updated on the subject. Or may not feel confident enough to teach it due to a lack of knowledge. That is why there is assistance for students of all age groups, educators and parents.
