Quote, Bind, Sell, Repeat!: Mastering the Art of Property & Casualty Insurance P&C

Guru,2020-06-30 I ventured into the insurance industry by accident. I can remember the exact moment it happened. It was 2012 and I recently closed my night club after 12 long years of dealing with everything that came with the nightlife. Bar fights, alcohol liabilities, competition, law enforcement, etc. The money was awesome, but it did come with a price. My days often begun at 3:00 pm and ended at 6:00 am. I loved dealing with people on an everyday basis, but the life had taken its toll on me. I needed a change. I befriended a club DJ who was from Brooklyn, New York. Ironically, our stories were kind of similar he had just left the housing industry as an inspector and was Deejaying part time until he could get back into a successful trade industry. He mentioned a P&C insurance class he had signed up for and suggested I give it a try as well. My first response was. Insurance, man I can't stand insurance, that stuff is boring and what is P&C? He went on to say that he knew of a few insurance agents that were making six figure incomes and a P&C Insurance license was all that was required to start writing business and P&C stood for property & casualty. That sparked my interest so I agreed to sign up for the class, what could it hurt. Four 10-hour days of P & C insurance information was overwhelming to say the least. How could someone learn all of this in this small amount of time, study for the test, take the state exam and expect to pass; it seemed IMPOSSIBLE. Until I turned it into a 7-million-dollar business in just 4 years.

*The Rocket Lab* Michael G. Smith,2023-05-15 The Rocket Lab: Maurice Zucrow, Purdue University, and America's Race to Space focuses on the golden era of space exploration between 1946 and 1966, specifically the life and times of Purdue University's Dr. Maurice J. Zucrow, a pioneering teacher and researcher in aerospace engineering. Zucrow taught America's first university course in jet and rocket propulsion, wrote the field's first textbook, and established the country's first educational Rocket Lab. He was part of a small circle of innovators who transformed Purdue into the country's largest engineering university, which became a cradle of astronauts. Taking a chronological and thematic approach, The Rocket Lab weaves between the local and national, drawing in rival universities, especially Harvard, MIT, Princeton, and Caltech. Also covered is Zucrow's role in the national project system of research and development through World War II and the Cold War. At Aerojet, he was one of the country's original project engineers, dedicated to scientific-technical expertise and the stepwise approach. He made vanguard power plant contributions to the Northrop Flying Wing, as well as the Corporal, Nike, and Atlas missiles, among others. Zucrow's work in propulsion helped to improve the country's arsenal of ballistic missiles and space launchers, and as a teacher, he educated the first generation of aerospace engineers. This

book elevates Zucrow and the central role he played in getting the United States to space.

**Stempel and Knutsen on Insurance Coverage** Jeffrey W. Stempel, Erik S. Knutsen, 2015-12-15

Unlike most other books in the field, which slant toward either policyholder or insurer counsel, Stempel and Knutsen on Insurance Coverage takes an even-handed nonexcess and umbrella aking it useful to attorneys from all sides. Moreover, it's designed for practitioners from all professional backgrounds and insurance experience. Written in clear, jargon-free language, it covers everything from the basic insurance concepts, principles, and structure of insurance policies to today's most complex issues and disputes. The authors, Jeffrey W. Stempel and Erik S. Knutsen, are well-known authorities on the law of insurance coverage, and this new Fourth Edition of Stempel and Knutsen on Insurance Coverage is completely up-to-date on every aspect of its subject. This one-stop resource provides both a sound historical, theoretical and doctrinal grounding in insurance, as well being practice-oriented and packed with practical guidance. After providing information about insurance policies and issues in general, it focuses on specific types of policies and coverage such as property coverage, liability coverage, automobile coverage, excess and umbrella coverage, and reinsurance, plus such vital areas as employment, defective construction, and terrorism claims...Dandamp;O liability...ERISA...bad faith litigation...and much more. Plus, you'll find extensive examination of the commercial general liability (CGL) policy, the type of insurance involved in most major coverage cases. Among the most important CGL issues covered in Stempel and Knutsen on Insurance Coverage are: Pollution-related coverage Trigger of coverage Apportionment of insurer and policyholder responsibility Business risk exclusions Coverage under the andquot;personal injuryandquot; section of the CGL Coverage under andquot;advertising injuryandquot; Nowhere else will you find so much valuable current information, in-depth analysis, sharp insight, authoritative commentary, significant case law, and practical guidance on this critically important area. With its clear explanations and thorough, even-handed coverage, Stempel and Knutsen on Insurance Coverage is unlike any other resource in its field.

**Space Law: A Case Study for the Practitioner** George S. Robinson, Pamela L.

Meredith, 2023-07-24 Space Law: A Case Study for the Practitioner: Implementing a Telecommunications Satellite Business Concept concentrates on the law governing commercial space ventures, commercial telecommunications satellite projects, in particular. The telecommunications satellite industry is by far the most mature of all the commercial space industries with a commensurate body of law governing it, and many of the same types of regulatory processes and private law transactions discussed in this book also pertain to the implementation of other commercial, and even non-commercial and military space ventures. The reader will find a clear description of the necessary legal actions lawyer and client must take to provide for the construction, launching and operation of a privately-owned telecommunications satellite. Both international and national laws and regulations pertaining to space projects are discussed. A step-by-step approach to legal actions has been adopted to help make the book a practical, easy-to-use reference tool. It is designed to assist lawyers in private practice, government attorneys, corporate legal counsel, entrepreneurial executives and teachers and students of space law.
