Syed Abul Ala Maudoodi

The Kashmir Question Sumit Ganguly,2004-03-01 India, which had been created as a civic polity, initially sought to hold on to this Muslim-majority state to demonstrate its secular credentials. Pakistan, in turn, had laid claim to Kashmir because it had been created as the homeland for the Muslims of South Asia. After the break-up of Pakistan in 1971 the Pakistani irredentist claim to Kashmir lost substantial ground. If Pakistan could not cohere on the basis of religion alone it had few moral claims on its co-religionists in Kashmir. Similarly, in the 1980s, as the practice of Indian secularism was eroded, India's claim to Kashmir on the grounds of secularism largely came apart. Today their respective claims to Kashmir are mostly on the basis of statecraft. This title provides a comprehensive assessment of a number of different facets of the on-going dispute over Kashmir between India and Pakistan. Among other matters, it examines the respective endgames of both states, the evolution of American policy toward the dispute, the dangers of nuclear escalation in the region and the state of the insurgency in the Indian-controlled portion of the disputed state.

The Art of Reciting the Qur'an Kristina Nelson,2014-11-11 For the Muslim faithful, the familiar sound of the Qur'anic recitation is the predominant and most immediate means of contact with the Word of God. Heard day and night, on the street, in taxis, in shops, in mosques, and in homes, the sound of recitation is far more than the pervasive background music of daily life in the Arab world. It is the core of religious devotion, the sanctioning spirit of much cultural and social life, and a valued art form in its own right. Participation in recitation, as reciter or listener, is itself an act of worship, for the sound is basic to a Muslim's sense of religion and invokes a set of meanings transcending the particular occasion. For the most part, Westerners have approached the Qur'an much as scriptural scholars have studied the Bible, as a collection of written texts. The Art of Reciting the Qur'an aims at redirecting that focus toward a deeper understanding of the Qur'an as a fundamentally oral phenomenon. By examining Muslim attitudes toward the Qur'an, the institutions that regulate its recitation, and performer-audience expectations and interaction, Kristina Nelson, a trained Arabist and musicologist, casts new light on the significance of Qur'anic recitation within the world of Islam. Her landmark work is of importance to all scholars and students of the modern Middle East, as well as ethnomusicologists, anthropologists, linguists, folklorists, and religious scholars.

The Terror Business C. H. Rajahans,2002

The Hunt for KSM Terry McDermott,Josh Meyer,2012-03-26 The definitive account of the decade-long pursuit and capture of Khalid Sheikh Mohammed, the terrorist mastermind of 9/11 Only minutes after United 175 plowed into the World Trade Center's South Tower, people in positions of power correctly suspected who was behind the assault: Osama bin Laden and Al Qaeda. But it would be 18 months after September 11 before investigators would capture the actual mastermind of the attacks, the man behind bin Laden himself. That monster is the man who got his hands dirty while Osama fled; the man who was responsible for setting up Al Qaeda's global networks, who personally identified and trained its terrorists, and who personally flew bomb parts on commercial airlines to test their invisibility. That man withstood waterboarding and years of other intense interrogations, not only denying Osama's whereabouts but making a literal game of the proceedings, after leading his pursuers across the globe and back. That man is Khalid Sheikh Mohammed, and he is still, to this day, the most significant Al Qaeda terrorist in captivity. In THE HUNT FOR KSM, Terry McDermott and Josh Meyer go deep inside the US government's dogged but flawed pursuit of this elusive and dangerous man. One pair of agents chased him through countless false leads and narrow escapes for five years before 9/11. And now, drawing on a decade of investigative reporting and unprecedented access to hundreds of key sources, many of whom have never spoken publicly-as well as jihadis and members of KSM's family and support network-this is a heart-pounding trip inside the dangerous, classified world of counterterrorism and espionage.

Music and the Play of Power in the Middle East, North Africa and Central Asia Laudan Nooshin,2016-04-29 What is it about the history, geographical position and cultures of the Middle East, North Africa and Central Asia that has made music such a potent and powerful agent? This volume presents the first direct look at the complex relationship between music and power across a range of musical genres and countries. Discourses of power in the region centre on some of the most contested social issues, most notably in relation to nationhood, gender and religion. Individual chapters examine the ways in which music serves as a forum for playing out issues of power, ideology, resistance and subversion. How does music become a space for promoting - or conversely, resisting or subverting - particular ideologies or positions of authority? How does it accrue symbolic power in ways that are very particular, perhaps unique? And how does music become a site of social control or, alternatively, a vehicle for agency and

empowerment, at times overt and at others highly subtle? What is it about music that facilitates, and sometimes disrupts, the exercise and flows of power? Who controls such flows, how and for what purposes? In asking such questions in the context of countries such as Afghanistan, Egypt, Iran, Tunisia and Tajikistan, the book draws on a wide range of relevant theoretical and critical ideas, and many disciplines including ethnomusicology, anthropology, sociology, politics, Middle Eastern studies, globalization studies, gender studies and cultural and media studies. The countries and areas explored share a great deal in historical and cultural terms, including a legacy of colonial and neo-colonial encounters and predominantly Judeo-Muslim religious traditions. It is hoped that the volume will contribute ultimately to a richer understanding of the role that music plays in these societies.

Muhammad Karen Armstrong,2013-08-13 The Man Who Inspired the World's Fastest-Growing Religion Muhammad presents a fascinating portrait of the founder of a religion that continues to change the course of world history. Muhammad's story is more relevant than ever because it offers crucial insight into the true origins of an increasingly radicalized Islam. Countering those who dismiss Islam as fanatical and violent, Armstrong offers a clear, accessible, and balanced portrait of the central figure of one of the world's great religions.

Understanding Terror Networks Marc Sageman,2011-09-21 For decades, a new type of terrorism has been quietly gathering ranks in the world. America's ability to remain oblivious to these new movements ended on September 11, 2001. The Islamist fanatics in the global Salafi jihad (the violent, revivalist social movement of which al Qaeda is a part) target the West, but their operations mercilessly slaughter thousands of people of all races and religions throughout the world. Marc Sageman challenges conventional wisdom about terrorism, observing that the key to mounting an effective defense against future attacks is a thorough understanding of the networks that allow these new terrorists to proliferate. Based on intensive study of biographical data on 172 participants in the jihad, *Understanding Terror Networks* gives us the first social explanation of the global wave of activity. Sageman traces its roots in Egypt, gestation in Afghanistan during the Soviet-Afghan war, exile in the Sudan, and growth of branches worldwide, including detailed accounts of life within the Hamburg and Montreal cells that planned attacks on the United States. U.S. government strategies to combat the jihad are based on the traditional reasons an individual was thought to turn to terrorism: poverty, trauma, madness, and ignorance. Sageman refutes all these notions, showing that, for the vast majority of the mujahedin, social bonds predated ideological commitment, and it was these social networks that inspired alienated young Muslims to join the jihad. These men, isolated from the rest of society, were transformed into fanatics yearning for martyrdom and eager to kill. The tight bonds of family and friendship, paradoxically enhanced by the tenuous links between the cell groups (making it difficult for authorities to trace connections), contributed to the jihad movement's flexibility and longevity. And although Sageman's systematic analysis highlights the crucial role the networks played in the terrorists' success, he states unequivocally that the level of commitment and choice to embrace violence were entirely their own. *Understanding Terror Networks* combines Sageman's scrutiny of sources, personal acquaintance with Islamic fundamentalists, deep appreciation of history, and effective application of network theory, modeling, and forensic psychology. Sageman's unique research allows him to go beyond available academic studies, which are light on facts, and journalistic narratives, which are devoid of theory. The result is a profound contribution to our understanding of the perpetrators of 9/11 that has practical implications for the war on terror.

Muhammad, the Messenger of Islam ,2002 Adil writes of the Holy Prophet and how he prayed for mercy upon his enemies. Despite the fact that they did him such harm and caused him so much hurt, he would not curse them, for all prophets' curses instantly take effect.
