Microsoft Flight Simulator X For Pilots Jeff Van West,Kevin Lane-Cummings,2012-02-15 Get ready to take flight as two certified flight instructors guide you through the pilot ratings as it is done in the real world, starting with Sport Pilot training, then Private Pilot, followed by the Instrument Rating, Commercial Pilot, and Air Transport Pilot. More advanced topics demonstrate how Flight Simulator X can be used as a continuing learning tool and how to simulate real-world emergencies.

Instrument Flying David Hoy,2014-09-30 This book is designed to supplement the instruction a student receives during his or her course. The Instrument Rating is a test of not only the student's ability to fly accurately on Instruments, the foundation, but also the ability to cope under a number of pressures. Instrument Flying is intended to help prepare the student to pass what is regarded as probably the most demanding flight tests in the world, the JAA Instrument Rating. It will also provide some useful tips and reminders when the IR renewal is due. Subjects covered include: Instrument Flight; Use of Radio Navigation Aids; Let Down and Approach Procedures for both ILS and NDB; Airways Flight; The Instrument Rating Test. Illustrated with between 20 - 30 exercise charts.

Instructor and Student Pilots' Subjective Evaluation of a General Aviation Simulator with a Terrain Visual System National Aeronautics and Space Administration (NASA),2018-08-13 Ten student pilots were given a 1 hour training session in the NASA Langley Research Center's General Aviation Simulator by a certified flight instructor and a follow-up flight evaluation was performed by the student's own flight instructor, who has also flown the simulator. The students and instructors generally felt that the simulator session had a positive effect on the students. They recommended that a simulator with a visual scene and a motion base would be useful in performing such maneuvers as: landing approaches, level flight, climbs, dives, turns, instrument work, and radio navigation, recommending that the simulator would be an efficient means of introducing the student to new maneuvers before doing them in flight. The students and instructors estimated that about 8 hours of simulator time could be profitably devoted to the private pilot training. Kiteley, G. W. and Harris, R. Human Factors in the Training of Pilots Jefferson M. Koonce,2002-05-23 In this educational yet entertaining text, Jeff Koonce draws on his 44 years of pilot experience and 31 years as a professor of psychology and human factors engineering in addressing the questions of how to apply sound human factors principles to the training of pilots and to one's personal flying. The author discusses principles of human factors, and how they can be utilized in pilot training and evaluation. With a conversational tone, he also relates anecdotes, jokes, and truisms collected during his time as a flight instructor. He takes a positive approach to the subject, focusing on safety and good practice rather than on accidents. While problem areas are acknowledged, and the book points out how certain problems may result in mishaps, the author avoids focusing on individual accidents. Human Factors in the Training of Pilots is a must for pilots wanting to make a systematic study of the human factors issues behind safe flying, and for instructors or serious students needing an authoritative text.
