Sound Streams Andrew J Bottomley, 2020-06-01 In talking about contemporary media, we often use a language of newness, applying words like “revolution” and “disruption.” Yet, the emergence of new sound media technologies and content—from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting—are not a disruption, but a continuation of the century-long history of radio. Today’s most innovative media makers are reintroducing forms of audio storytelling from radio’s past. Sound Streams is the first book to historicize radio-internet convergence from the early ‘90s through the present, demonstrating how so-called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting. Various iterations of internet radio, from streaming audio to podcasting, are all new radio practices rather than each being a separate new medium: radio is any sound media that is purposefully crafted to be heard by an audience. Rather than a particular set of technologies or textual conventions, web-based broadcasting combines unique practices and features and ideas from radio history. In addition, there exists a distinctive conversationality and reflexivity to radio talk, including a propensity for personal stories and emotional disclosure, that suits networked digital media culture. What media convergence has done is extend and intensify radio’s logics of connectivity and sharing; sonically mediated personal expression intended for public consideration abounds in online media networks. Sound Streams marks a significant contribution to digital media and internet studies. Its mix of cultural history, industry research, and genre and formal

analysis, especially of contemporary audio storytelling, will appeal to media scholars, radio and podcast practitioners, audio journalism students, and dedicated podcast fans.

Turn Your Radio On! an Now ... Live from Motown KWP Publishing, Lee Alan, 2004 This is the true story of what happened inside the competitive world of radio and music in Motown. These are my lifelong acquaintances, my personal and professional choices and the consequences I have paid--Page 4 of cover.

Something in the Air Marc Fisher, 2007 Along with rock-and-roll music came the attitude that would change the voice of radio forever, via the likes of raconteur Jean Shepherd, who captivated his loyal following of "Night People"; the inimitable Bob Fass, whose groundbreaking Radio Unnameable inaugurated the anything-goes free-form style that would define the alternative frontier of FM; and a small-time Top 40 deejay who would ultimately find national fame as a political talk-show host named Rush Limbaugh.

Scanners And Secret Frequencies Henry Eisenson, 1994-01-01 This cynical and immensely entertaining book describes the scanner world, the people in it, the equipment they use, and how they acquire and tune in to the secret frequencies.

Media Matters John Fiske, Black Hawk Hancock, 2016-02-05 Now, more than 20 years since its initial release, John Fiske's classic text *Media Matters* remains both timely and insightful as an empirically rich examination of how the fierce battle over cultural meaning is negotiated in American popular culture. *Media Matters* takes us to the heart of social inequality and the call for social justice by interrogating some of the most important

issues of its time. Fiske offers a practical guide to learning how to interpret the ways that media events shape the social landscape, to contest official and taken-for-granted accounts of how events are presented/conveyed through media, and to affect social change by putting intellectual labor to public use. A new introductory essay by former Fiske student Black Hawk Hancock entitled 'Learning How to Fiske: Theorizing Cultural Literacy, Counter-History, and the Politics of Media Events in the 21st Century' explains the theoretical and methodological tools with which Fiske approaches cultural analysis, highlighting the lessons today's students can continue to draw upon in order to understand society today.

MP3 and the Infinite Digital Jukebox Chris Gilbey,2000-06-06
With MP3 technology, the era of accessing the full range of the world's music and customizing it to individual taste has arrived. Written by music industry insider and former computer programmer Chris Gilbey, *MP3 and the Infinite Digital Jukebox* shows how to take advantage of this revolution. The book offers clear and simple instructions on how and where to find all the necessary applications for getting instant musical gratification from the new online music devices on the market. Topics covered include information about all the music file types, how to play them, how to rip them, how to burn your own CDs, and how to send music to others. The book reviews all the latest software and hardware, but also shows how it's possible to avoid the expense and use existing resources.

Digital Radio Update ,1999

New York Magazine ,1996-07-15 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has

been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Deadline Y2K Mark Joseph, 2015-06-02 On New Year's Eve 1999, a chain reaction of computer malfunctions turns what was to be a global gala into a catastrophe. When computers begin to fail along the international dateline, the infection moves westward, causing massive power failures, train and airplane wrecks, and general havoc. As the Millennium Bug passes hour by hour through each time zone, it moves inexorably toward the epicenter of the global economy, New York, and the thousands of computers that control the world's monetary systems. The Midnight Club, a group of cyberpunks led by Michael Doc Downs, has the solution--but they also have an adversary: energetic venture Capitalist Donald Copeland, who has designs on using his technological prowess to capitalize on the impending disaster. Around 10:30 A.M. on December 31, a Safeway in New York is hit by the Bug, sent all the way from Guam. All systems freeze, and what begins as a simple malfunction snowballs into looting and rioting. Pandemonium reigns on the streets of Manhattan. As the day progresses, the blaze of fear increases to the point of insanity. In the style of Michael Crichton and Stephen Coonts, Mark Joseph has created a techno-thriller that is sure to touch a nerve in everyone as the millennium draws closer.
