### **Schiit Happened** Jason Stoddard, Mike

Moffat, 2015-06-14 For everyone who didn't win the venture capital lottery, for everyone who wasn't born with a trust fund, for everyone who doesn't have rich relatives... This is the story of how real start-ups work. This is how to turn a dream into a multi-million dollar business-without selling out, without spending a mint on marketing, and without losing your sense of humor. Meet Schiit Audio, a company born in a garage that went on to change the face of high-end personal audio-challenging the idea that everything must be made in China, rejecting old ideas about advertising and social awareness, and forging our own unforgettable brand. This is our (improbable) story. Here's to your own stories-and your success!

### **Ethics and Technology** Herman T.

Tavani, 2016-01-11 Ethics and Technology, 5th Edition, by Herman Tavani introduces students to issues and controversies that comprise the relatively new field of cyberethics. This text examines a wide range of cyberethics issues--from specific issues of moral responsibility that directly affect computer and information technology (IT) professionals to broader social and ethical concerns that affect each of us in our day-to-day lives. The 5th edition shows how modern day controversies created by emerging technologies can be analyzed from the perspective of standard ethical concepts and theories.

### *Discovering Advanced Algebra* Jerald

Murdock, Ellen Kamischke, 2010 Changes in society

and the workplace require a careful analysis of the algebra curriculum that we teach. The curriculum, teaching, and learning of yesterday do not meet the needs of today's students.

**Ethics and Technology** Herman T. Tavani, 2004

Explores current issues in the field of cyberethics, including questions about online personal privacy, sharing music, and unreliable software, and analyzes the practical, moral, and legal implications of each issue.

**Understanding Materials Science** Rolf E.

Hummel, 2006-05-11 This introduction for engineers examines not only the physical properties of materials, but also their history, uses, development, and some of the implications of resource depletion and materials substitutions.

*In the Lake of the Woods* Tim O'Brien, 2006-09-01

A politician's past war crimes are revealed in this psychologically haunting novel by the National Book Award-winning author of *The Things They Carried*. Vietnam veteran John Wade is running for senate when long-hidden secrets about his involvement in wartime atrocities come to light. But the loss of his political fortunes is only the beginning of John's downfall. A retreat with his wife, Kathy, to a lakeside cabin in northern Minnesota only exacerbates the tensions rising between them. Then, within days of their arrival, Kathy mysteriously vanishes into the watery wilderness. When a police search fails to locate her, suspicion falls on the disgraced politician with a violent past. But when John himself disappears, the questions mount—with no answers in sight. In this contemplative thriller, acclaimed

author Tim O'Brien examines America's legacy of violence and warfare and its lasting impact both at home and abroad.

Floating Voice Stan Dragland, 1994 The writing of Duncan Campbell Scott has long represented a sympathetic understanding of Canada's Native peoples—perhaps mistakenly so, however, as in his work as a bureaucrat, Scott put in place white paternalistic policies that Native peoples resist to this day. Floating Voice examines Scott's contradictions, with renewed consideration of his best "Indian" fiction and poetry .

**Literary History of Canada** Carl F. Klinck, Alfred G. Bailey, Claude Bissell, Roy Daniells, Northrop Frye, Desmond Pacey, 1976-12-15 Hailed as a landmark in Canadian literary scholarship when it was originally published in 1965, the Literary History of Canada is now being reissued, revised and enlarged, in three volumes. This major effort of a large group of scholars working in the field of English-language Canadian literature provides a comprehensive, up-to-date reference work. It has already proven itself invaluable as a source of information on authors, genres, and literary trends and influences. It represents a positive attempt to give a history of Canada in terms of writings which deserve attention because of significant thought, form, and use of language. Volume 3 has been newly written for this edition of the History, and covers the years from about 1960 to 1974. The contributors to this volume are Claude Bissell, Desmond Pacey, Lauriat Lane, jr, Michael S. Cross, Thomas A. Goudge, John Webster Grant, John H. Chapman, William E. Swinton, Henry

B. Mayo, Malcolm Ross, Brandon Conron, Clara Thomas, Sheila A. Egoff, John Ripley, William H. New, George Woodcock, and Northrop Frye.

**Communication with the Cancer Patient** Antonella Surbone, Matjaz Zwitter, 1997 In many parts of the world seriously ill patients are not informed of their diagnoses. Consequences of this for the patient are not being informed about the therapy and its possible side-effects and ultimately deprivation of autonomy. Telling the truth to a patient is not simply a matter of providing information. Rather, the truth is a matter of two-way communication, the result of a relationship between doctor and patient that develops over time in the context of a given culture. In this volume oncologists in different countries give their perceptions of how truth telling is handled in their cultures.

Sensory Neuropathies Arthur K. Asbury, Herbert Budka, Elfriede Sluga, 2012-12-06 While motor neuropathies and neuronopathies and mixed sensory-motor neuropathies have been met with adequate interest by clinical and basic researchers and physicians, pure sensory neuropathies and neuronopathies have received comparably less attention, despite of the considerable morbidity they may cause in the individual patient. This prompted us to organize an International Symposium on Sensory Neuropathies which was held in Vienna, September 22-24, 1990, as satellite to the International Neuromuscular Congress held one week earlier in Munich, Germany. We were fortunate to have a faculty of experienced authorities in the field as participants. This volume is the proceedings of

the symposium. Due to factors which were beyond our control, publication of this volume was significantly delayed. Despite the enormous progress of biomedicine in recent years, most prominently in molecular biology, we feel that the contributions of this volume still represent a valuable reference for clinical, physiological, biochemical and pathomorphological studies on the sensory nervous system for which similarly comprehensive data are difficult to locate.

Hitler's Gladiator Charles Messenger, 2011-08-01  
A charismatic yet notorious character, Sepp Dietrich the man is impossible to separate from Sepp Dietrich the General, who was awarded twenty-four different honors during his service to the Nazi party and was known for his devotion to his men as he led them through some of the fiercest fighting in the war. In this extensively researched book, historian Charles Messenger attempts to discover the truth about this sparsely documented man, painting a vivid picture of the aggressive war and politics under the Third Reich. From Dietrich's humble upbringing and his eventual rise to General, to his dissatisfaction with Hitler's leadership and the trials he faced after the war, Dietrich remains a mysterious figure in history.

**The Imaginary Indian** Daniel Francis, 2012-04-17  
First published in 1992, *The Imaginary Indian* is a revealing history of the Indian image mythologized by popular Canadian culture since 1850, propagating stereotypes that exist to this day. Images of First Nations people have always been fundamental to Canadian culture. From the paintings and photographs of the 19th century to

the Mounted Police sagas and the spectacle of Buffalo Bill's Wild West Show; from the performances of Pauline Johnson, Grey Owl, and Buffalo Long Lance to the media images of Oka and the Vancouver Winter Olympics?the Imaginary Indian is ever with us, oscillating throughout our history from friend to foe, from Noble Savage to bloodthirsty warrior, from debased alcoholic to wise elder, from monosyllabic squaw to eloquent princess, from enemy of progress to protector of the environment. The Imaginary Indian has been, and continues to be—as Daniel Francis reveals in this book—just about anything the non-Native culture has wanted it to be; and the contradictory stories non-Natives tell about Imaginary Indians are really stories about themselves and the uncertainties that make up their cultural heritage. This is not a book about Native people; it is the story of the images projected upon Native people—and the desperate uses to which they are put. This new edition, published almost twenty years after the book's first release, includes a new preface and afterword by the author. Daniel Francis is an award-winning historian and the author of twenty books.

**The Political Life of Urban Streetscapes** Reuben Rose-Redwood, Derek Alderman, Maoz Azaryahu, 2017-07-06 Streetscapes are part of the taken-for-granted spaces of everyday urban life, yet they are also contested arenas in which struggles over identity, memory, and place shape the social production of urban space. This book examines the role that street naming has played in the political life of urban streetscapes in both

historical and contemporary cities. The renaming of streets and remaking of urban commemorative landscapes have long been key strategies that different political regimes have employed to legitimize spatial assertions of sovereign authority, ideological hegemony, and symbolic power. Over the past few decades, a rich body of critical scholarship has explored the politics of urban toponymy, and the present collection brings together the works of geographers, anthropologists, historians, linguists, planners, and political scientists to examine the power of street naming as an urban place-making practice. Covering a wide range of case studies from cities in Europe, North America, Sub-Saharan Africa, and Asia, the contributions to this volume illustrate how the naming of streets has been instrumental to the reshaping of urban spatial imaginaries and the cultural politics of place.

**Black Blizzard** Yoshihiro Tatsumi, 2010-04-13 THE PREEMMINENT GEKIGA-KA'S FIRST GRAPHIC NOVEL FROM FIFTY YEARS AGO Created in the late 1950s, Black Blizzard is Yoshihiro Tatsumi's remarkable first full-length graphic novel and one of the first published examples of Gekiga. Tatsumi documented how his love for Mickey Spillane and hard-boiled crime novels led him to create this landmark genre of manga in his epic, critically acclaimed 2009 autobiography, *A Drifting Life*. With *Black Blizzard*, Tatsumi explores the dark underbelly of his working-class heroes that five decades later has made him one of the best-known Japanese cartoonists in North America. Susumu Yamaji, a twenty-four-year-old pianist, is arrested formurder and ends up handcuffed to a career criminal on the train that will take them to prison. An avalanche derails the train and the criminal takes the opportunity to escape, dragging a reluctant Susumu with him into the blizzard raging outside. They flee into the mountains to an abandoned ranger station, where they take shelter

from the storm. As they sit around the fire they built, Susumu relates how love drove him to become a murderer. A cinematic adventure story, Black Blizzard uncovers an unlikely love story and an even unlikelier friendship.
