JG Myers

The Men Who Loved Trains Rush Loving,2006-05-21 An award-winning account of a crisis in railroad history: "This absorbing book takes you on an entertaining ride." —Chicago Tribune A saga about one of the oldest and most romantic enterprises in the land—America's railroads—The Men Who Loved Trains introduces the chieftains who have run the railroads, both those who set about grabbing power and big salaries for themselves, and others who truly loved the industry. As a journalist and associate editor of Fortune magazine who covered the demise of Penn Central and the creation of Conrail, Rush Loving often had a front-row seat to the foibles and follies of this group of men. He uncovers intrigue, greed, lust for power, boardroom battles, and takeover wars and turns them into a page-turning story. He recounts how the chairman of CSX Corporation, who later became George W. Bush's Treasury secretary, managed to make millions for himself while his company drifted in chaos. Yet there were also those who loved trains and railroading—and who played key roles in reshaping transportation in the northeastern United States. This book will delight not only the rail fan, but anyone interested in American business and history. Includes photographs

Developmentalism Graham Harrison,2020-06-18 Why do so few countries achieve development success? Achieving development requires many changes over a short period of time, generating instability and risk. It is a deep and integrated economy of change involving force, strategic thinking, and ideological conviction - it emerges when successful development is seen as necessary for the survival of a political order. Developmentalism engages with the moral issues that this raises. Developmentalism: The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change - a shift from a state of 'capital-ascendance' to 'capital dominance'. It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible. However, capitalist development is extremely difficult and requires a highly exacting political endeavour. The politics of development is conceptualized as developmentalism: a strategy and ideology in which governments exercise heavy directive power, endure instability and crisis, and secure a rudimentary legitimacy for their efforts. This book argues that developmentalism requires a conflation of successful capitalist transformation with some form of existential insecurity of the state itself. It flourishes when capitalist transformation connects to profound questions of sovereignty, statehood, nation-building, and elite survival. Developmentalism shows deep contextualisation of capitalist transformation as well as the massive improvements in material life that it has generated.

Agrarian Reform and Resistance in an Age of Globalisation Joe Regan,Cathal Smith,2018-12-05 This book investigates the causes and effects of modernisation in rural regions of Britain and Ireland, continental Europe, the Americas, and Australasia between 1780 and 1914. In this period, the transformation of the world economy associated with the Industrial Revolution fuelled dramatic changes in the international countryside, as landowning elites, agricultural workers, and states adapted to the consequences of globalisation in a variety of ways. The chapters in this volume illustrate similarities, differences, and connections between the resulting manifestations of agrarian reform and resistance that spread throughout the Euro-American world and beyond during the long nineteenth century.
