Ian Douglas

Tropical Rainforest Responses to Climatic Change John Flenley, Mark Bush, 2007-06-20 This is the first book to examine how tropical rain forest ecology is altered by climate change, rather than simply seeing how plant communities were altered. The book's goal is to provide a current overview of the impacts of climate change on tropical forests. It aims to investigate past, present, and future climatic influences on the ecosystems with the highest biodiversity on the planet.

**Water and the Rainforest in Malaysian Borneo** Ian Douglas, 2022-01-01 This volume synthesizes and analyzes thirty years of hydrological research in the Danum Valley Conservation Area, a lowland dipterocarp rainforest in Sabah, Malaysia. Ian Douglas explores the role of water in the rainforest ecosystem, setting out the ecological, climatological and geological context of present-day hydrological processes, soil erosion and stream sedimentation. He emphasizes the role of extreme events and natural disturbances in sediment supplies and the evolution of drainage pathways and explains the pathways of rainfall and stream sediment. Douglas then explores the impacts caused by logging, the extreme pulses of sedimentation and the effects of log removal and logging road construction, examining the effects of major storms in the 20 years after tree harvesting. Methods of minimizing logging damage to soils and streams are discussed and the effects on flora and fauna are considered.

**Climate Change, Forests and REDD** Joyeeta Gupta, Nicolien van der Grijp, Onno Kuik, 2013-02-11 A search for new methods for dealing with climate change led to the identification of forest maintenance as a potential policy option that could cost-effectively reduce greenhouse gas emissions, with the development of measures for Reducing Emissions from Deforestation and Forest Degradation (REDD). This book explores how an analysis of past forest governance patterns from the global through to the local level, can help us to build institutions which more effectively deal with forests within the climate change regime. The book assesses the options for reducing emissions from deforestation in developing countries under the international climate regime, as well as the incentives flowing from them at the national and sub national level and examines how these policy levers change human behaviour and interface with the drivers and pressures of land use change in tropical forests. The book considers the trade-offs between certain forestry related policies within the current climate regime and the larger goal of sustainable forestry. Based on an assessment of existing multi-level institutional forestry arrangements, the book questions how policy frameworks can be better designed in order to effectively and equitably govern the challenges of deforestation and land degradation under the global climate change regime. This book will be of particular interest to students and scholars of Law and Environmental Studies.

**Functional Ecology of Woodlands and Forests** J.R. Packham, D.J. Harding, 1992-05-31 Functional Ecology of Woodlands is firmly based on the factors which govern the composition of woodland communities, but goes on to explore the dynamics of interactions between various ecosystem components. This is an authoritative text on the functioning of forest ecosystems, which will also assist readers to reach informed decisions about issues such as the greenhouse effect, acid precipitation, the greening of cities and agroforestry.

Sarapiquí Chronicle Allen M. Young, 2017-04-01 "Young . . . brings the trained eye of an entomologist and an unabashed admiration for the beauty of nature to this engaging and informative account of his experiences during twenty-one years of fieldwork in Costa Rica's rainforests."—Publishers Weekly "A splendid read. For newcomers to the moist tropics, and for any but the most sated old-timers, it can be commended for an entertaining account of a locality where life is lived to the full—by all species, including the human observer."—Norman Myers, New Scientist The abundant insect life of the rainforests of northeastern Costa Rica is the subject of this engaging book, first published over twenty-five years ago and now including two new chapters on the rise of ecotourism in the region.

Metaphor, Sustainability, Transformation Ian Hughes, Edmond Byrne, Gerard Mullally, Colin Sage, 2021-07-29 This book offers an eclectic range of transdisciplinary insights into the role of metaphor, myth and fable in shaping our understanding of the world and how we interact with it and with each other. Drawing on innovative perspectives from widely different fields, this book explores how metaphor might facilitate and underpin transformative change towards environmental, ecological and societal sustainability. It illustrates the ways in which contemporary metaphors lock us into patterns of thinking, modes of behaviour, and styles of living that reproduce and accentuate our current socio-environmental problems. It sets itself the task of finding new metaphors and myths that might help move us towards sustainability as societal flourishing. By examining the use of metaphor in diverse fields such as energy use, the food system, health care, arts and the humanities, it invites the reader to reflect on the deep-seated influence of language in general, and metaphor in particular, in shaping how we understand and act upon the world. Re-imagining the use of language in framing both the problems we face and the solutions we devise, this novel contribution is a vital source of ideas for those aiming to change how we think and act in pursuit of more sustainable futures.

**Endangered Rain Forests** Rani Iyer,2017-12-11 Rain Forests are an important part of the Earth. They are home to numerous plants and wildlife. Although not everyone lives near a rain forest, the actions of all are affecting these fragile ecosystems. What exactly is a rain forest? What are humans doing to harm them? What can readers do to help protect them? Endangered Rain Forests answers these questions by engaging readers with lively text, graphic features, and stunning photography. Readers will find out why protecting rain forests matters to them and the part they can play in protecting them

*101 Facts About Rain Forests* J. Lou Barnes,2003-07-03 Describes the importance of rain forests, types of plant and animal life that live there, and the current threat to rain forests from deforestation and pollution.

*People of the Rainforest* John Hemming,2020-02-01 In 1945, three young brothers joined and eventually led Brazil's first government-sponsored expedition into its Amazonian rainforests. After more expeditions into unknown terrain, they became South America's most famous explorers, spending the rest of their lives with the resilient tribal communities they found there. People of the Rainforest recounts the Villas Boas brothers' four thrilling and dangerous 'first contacts' with isolated indigenous people, and their lifelong mission to learn about their societies and, above all, help them adapt to modern Brazil without losing their cultural heritage, identity and pride. Author and explorer John Hemming vividly traces the unique adventures of these extraordinary brothers, who used their fame to change attitudes to native peoples and to help protect the world's surviving tropical rainforests, under threat again today.

Changing Rain Forest Environments Tanya Dellaccio,2019-07-15 Humans have used resources from their environment for food and shelter for millions of years. Over time, however, human activities have extensively impacted Earth's ecosystems. Rain forests are one of a number of ecosystems on Earth that have been negatively affected by human activities. This book explores the different ways humans have impacted the plants and animals that call rain forest environments home. Full-color photographs depict harmful human activities and conservation efforts while fact boxes and sidebars

provide readers with additional information about how rain forest environments have changed since the dawn of the human race.

*About the Rain Forest* Heather Johanasen, Sindy McKay, 2000 Uses photographs and simple text to describe the plants, animals, and ecology of rain forests.
