**Innovative Technologies for Future Living** Sandip Sen, Aarohi Sen, 2023-09-14 As of January 2023, there are 5 billion users of the internet. People who use technology and want to know about it—in simple language, without jargon. Many of those nurture dreams and aspirations to be quicker, smarter and ‘be the change.’ We bring to them relatable stories of everyday users, understood by consumers and gadget freaks alike. We start with the Internet of Things (IoT) and show how consumers are using smart devices that teach them to manage their homes, travel and lifestyle through their smartphones. We see how cloud computing and artificial intelligence (AI) are enabling them to give feedback to IoT devices, and extracting multiple services from household products like the humble LED light, or the refrigerator, or sophisticated jet engines, or combined harvesters. As devices turn smart and AI and robots enter our workspace they run the risk of being hacked. So techies developed the Blockchain, with encrypted text that would secure digital assets. But with it arrived cryptocurrencies that threaten to bring unprecedented speculation, money laundering and cyber crimes. We also explore new opportunities in telehealth, distant education and metaworld, and the strides made in digital transformation that has, in less than five years, empowered over 2 billion people across the world, giving them access to cost effective banking, education, travel, energy, food and health services. But the same technologies are used to fight wars and disrupt supply chains that cause acute distress and worldwide recessions. The book is relevant because the changes happening now are not incremental but tectonic. This opens the door to a future that is more fascinating and threatening than fiction. Read on to find out more.

**The Sai Way** Suresh Haware,2021-05-28 Countless books have been written about Sai Baba so far. Then why one more? And why does Dr Suresh Haware, who was the chairman of Saibaba Sansthan, want to write it? The answer lies in his five years of divine experience at Shirdi, an experience of a different world. Sai Anubhuti is not theoretical; it is practical. It cannot be expressed in words, he says. The Sai philosophy of 'shraddha-saburi' and 'sab ka malik ek' is very easy to understand but equally difficult to practise. Despite being a renowned nuclear scientist, Dr Haware states that there is something beyond science, something ethereal, an experience of the divine that cannot be completely captured. The events that led to his becoming the chairman of the trust indicate that Sai ways are not linear. The Sai Way is a beautiful tribute to Sai philosophy and spirituality narrated from a lived experience coupled with information about Saibaba Sansthan.

Image Building among Most Vulnerable Tribal Groups (MVTGs) of Madhya Pradesh Dr. Harendra Pratap Singh Chouhan, Vivek Sharma, 2022-10-06 The present book is an attempt to touch on one of the most neglected and talked aspects of a significant portion of the population (the most vulnerable tribals of MP) and also what can be done to build the image of these tribal groups. One of the authors has done significant research work in the field by visiting the actual places of residence of the tribal groups under study and has extensively interviewed them. As both the authors are from the management stream a new perspective is presented in the book. Till now this was the domain of the sociologists and the anthropologists, but the management perspective will help the readers to view things differently. The book is divided into six chapters. The first chapter titled "Image building and understanding the tribes is an introduction to both the tribes as well as what all comprises image building. This chapter is basically for those readers who are not acquainted with the tribal groups and what is meant by the terminology like most vulnerable groups. The chapter also introduces what image building means. Chapter two is more about the reports and the works done by the other scholars so that the readers know what other scholars view about the present topic and also the authors have developed their research and the findings based on the work of the scholars of the field. Chapters three and four comprise the crux of our work. These two chapters will help the readers to get an understanding of the culture, living styles, and every aspect of the life of these MVTGs. A comparative study will help the readers

to know that though all the three groups are from MP still many differences are there among the three groups and the management of their everyday living and image building will be decided based on these differences. Forest, agriculture, migration, education, culture, dance, house structure, tattoo, worship, food, etc. are some of the aspects which are dealt with and all the three groups are compared on these features. Chapter five deals with the image-building aspects with the background of all the marketing concepts required to make the image of these tribes as required and what can be done to enhance the image. For the readers having no background in management, the chapter is such planned that they get an idea about the basic terminology of promotion and image building. Chapter six comprises what we feel as researchers and some of the suggestions from our side based on the four years of exhaustive work we have done. These suggestions can help the MVTGs to get what they want (not using the term "including in mainstream"). So, we conclude that this book can be an effort to start the debate from a very new perspective.
