*Creating Rain Gardens* Apryl Uncapher, Cleo Woelfle-Erskine, 2012-04-17 Homeowners spend hundreds of dollars watering their yard, but there is an easy way to save money and resources—rain gardening. But what is it? As simple as collecting rain to reuse in front and backyards. *Creating Rain Gardens* is a comprehensive book for the DIY-er, covering everything from rain barrels to simple living roofs, permeable patios, and other low-tech affordable ways to save water in the garden. Water conservation experts Cleo Woelfle-Erskine and Apryl Uncapher walk homeowners through the process, with step-by-step instructions for designing and building swales, French drains, rain gardens, and ephemeral ponds—the building blocks of rain-catching gardens. From soil preparation, planting, troubleshooting, and maintenance, to selecting palettes of water-loving plants that provide four-season interest and a habitat for wildlife, *Creating Rain Gardens* covers everything a gardener needs to create a beautiful rain garden at home.

**Rain Gardening in the South** Helen Kraus, Anne Spafford, 2013-09-30 Eco-gardening how-to book

*Rainwater Harvesting for Drylands and Beyond* Brad Lancaster, 2006

Using Plants for Stormwater Management Dana Nunez Brown, 2014-04-07 The subtropical climate of the Gulf South supports a varied abundance of flora, and this diversity is sustained by the ample amount of rainwater that characterizes the region. Managing rainwater in a planned environment and mitigating its effect on human habitation can test the skills of even the most seasoned landscape architect or designer. That challenge has never been more acute as increased human demand for natural resources compels professionals and home gardeners alike to seek out sustainable ecological solutions. In this guidebook, Dana Nunez Brown details ways to manage each drop of rainwater where it falls, using a cost-effective and environmentally sensitive approach. Under natural conditions, rainfall primarily percolates into the ground and flows as groundwater until it is absorbed by trees and other vegetation, after which it is evaporated into the atmosphere and the cycle starts anew. Brown identifies plants and techniques that leverage this natural process in order to filter, clean, and slow runoff, a practice known as Low Impact Development. *Using Plants for Stormwater Management* presents the native ecological communities and plant species of the Gulf South in easy-to-follow sections and diagrams. Information ranging from the productiveness of root structures and the compatibility of plants with local soils to the optimal elevation of specific vegetation and the average dimensions of foliage is represented by graphic icons for quick and easy identification. An accessible and essential resource, this book gives both novices and experts the know-how to harness rainfall and create beautiful, ecologically functioning landscapes.

*Alternative Water for Landscape Irrigation, 2nd Edition* Irrigation Association, 2013-10-01 As potable water becomes less available, alternative sources will be needed to supplement water supplies for landscapes. This book explores the use of alternate sources, including rainwater harvesting, reclaimed and recycled water. Learn about the regulatory, water quantity, water quality and economic implications of using alternative water resources, as well as how to assess and mitigate associated risks. Manual for *Alternative Water for Landscape Irrigation* class.

*Rainwater Harvesting for Drylands and Beyond* Brad Lancaster, 2013 This revised and expanded second edition increases potential for on-site harvests with more integrated tools and strategies for solar design, a primer on your water/energy/carbon connections, descriptions of water/erosion flow patterns and their water-harvesting response, and updated illustrations to show you how to do it all.--Publisher description.

**Roof-reliant Landscaping (TM)** Nate Downey, Randall D. Schultz, Ken Wilson, New Mexico. Office of the State Engineer, 2009

**Artful Rainwater Design** Stuart Echols, Eliza Pennypacker, 2015-05-19 *Artful Rainwater Design* has three main parts: first, the book outlines five amenity-focused goals that might be highlighted in a project: education, recreation, safety, public relations, and aesthetic appeal. Next, it focuses on techniques for ecologically sustainable stormwater management that complement the amenity goals. Finally, it features diverse case studies that show how designers around the country are implementing principles of artful rainwater design.

**Rainwater Harvesting for Drylands and Beyond, Volume 2, 2nd Edition** Brad Lancaster, Andy Lipkis, *Rainwater Harvesting for Drylands and Beyond, Volume 2, 2nd Edition* is a how-to guide enabling you to “plant the rain” by creating water-harvesting “earthworks” or “rain gardens.” Earthworks are simple, inexpensive strategies and landforms that passively harvest multiple sources of free on-site water including rainfall, stormwater runoff, air conditioning condensate, and greywater within “living tanks” of soil and vegetation. The plants then pump the water back out in the form of beauty, food, shelter, wildlife habitat, timber and forage, while controlling erosion, reducing down-stream flooding, dropping utility costs, increasing soil fertility, enhancing the soil carbon sponge, recharging groundwater and springs, and improving water and air quality. This dramatically revised and expanded full-color second edition builds on the information in Volume 1 by showing you how to turn your yard, school, business, park, ranch, and neighborhood into lively, regenerative producers of resources. Conditions at home will improve as you simultaneously enrich the ecosystem and inspire the surrounding community. Learn to select, place, size, construct, and plant your chosen earthworks. All is made easier and more effective by the illustrations of natural patterns of water and sediment flow with which you can collaborate or mimic. Detailed step-by-step instructions with over 550 images and expanded water-harvesting principles or guidelines show you how to do it, and plentiful stories of success motivate you so you will do it!
