Counterpoints Anti-Eviction Mapping Project, 2021-08-03 Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning

decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

Guillain-Barre Syndrome Dr Gareth J. Parry, MB, ChB, FRACP, Joel S. Steinberg, MD, PhD, FICA, 2007-02-15

Guillain-Barre Syndrome (GBS) is a disorder in which the body's immune system attacks part of the peripheral nervous system. Feelings of tingling and weakness increase in intensity until the muscles cannot be used at all and the patient is almost totally paralyzed. No one knows why Guillain-Barre strikes some people and not others, or what sets the disease in motion. What we do know is that GBS is now the most common cause of acute paralysis in Western countries since the virtual elimination of poliomyelitis with vaccination programs. Guillain-Barre Syndrome, co-authored by a survivor of this illness, addresses all aspects of this condition, including initial symptoms, diagnostic evaluation and criteria, general and illness specific treatments, and typical outcomes. Fortunately, most GBS patients have a good recovery, but the pathway to this goal can be slow and scary. This book covers a wide range of issues including: Features unique to GBS such as pain without injury and other abnormal sensations Workplace adjustment with incomplete recovery Intensive care unit management Practical caregivers guidelines The rehabilitation process Sexual dysfunction, and much more Guillain-Barre Syndrome is a comprehensive book, written in lay terms, covering everything from diagnosis to emotional issues. It is a book that stands alone. This latest volume in the American Academy of Neurology Press Quality of Life Guide series is an essential tool for all individuals, families, and caregivers coping with Guillain-Barre Syndrome.

What's a Cellphilm? Katie MacEntee, Casey Burkholder, Joshua Schwab-Cartas, 2016-07-27 What's a Cellphilm? explores cellphone video production for its contributions to participatory visual research. There is a rich history of integrating participants' videos into community-based research and activism. However, a reliance on camcorders and digital cameras has come under criticism for exacerbating unequal power relations between researchers and their collaborators. Using cellphones in participatory visual research suggests a new way forward by working with accessible, everyday technology and integrating existing media practices. Cellphones are everywhere these days. People use mobile technology to visually document and share their lives. This new era of democratised media practices inspired Jonathan Dockney and Keyan Tomaselli to coin the term cellphilm (cellphone + film). The term signals the coming together of different technologies on one handheld device and the emerging media culture based on people's use of cellphones to create, share, and watch media. Chapters present practical examples of cellphilm research conducted in Canada, Hong Kong, Mexico, the Netherlands and South Africa. Together these contributions consider several important methodological questions, such as: Is cellphilm a new research method or is it re-packaged participatory video? What theories inform the analysis of cellphilms? What might the significance of frequent advancements in cellphone technology be on cellphilms? How does our existing use of cellphones inform the research process and cellphilm aesthetics? What are the ethical dimensions of cellphilm use, dissemination, and archiving? These questions are taken up from interdisciplinary perspectives by established and new academic contributors from education, Indigenous studies,

communication, film and media studies.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houq.

The Social Animal David Brooks, 2012-01-03 #1 NEW YORK TIMES BESTSELLER With unequalled insight and brio, New York Times columnist David Brooks has long explored and explained the way we live. Now Brooks turns

to the building blocks of human flourishing in a multilayered, profoundly illuminating work grounded in everyday life. This is the story of how success happens, told through the lives of one composite American couple, Harold and Erica. Drawing on a wealth of current research from numerous disciplines, Brooks takes Harold and Erica from infancy to old age, illustrating a fundamental new understanding of human nature along the way: The unconscious mind, it turns out, is not a dark, vestigial place, but a creative one, where most of the brain's work gets done. This is the realm where character is formed and where our most important life decisions are made—the natural habitat of *The Social Animal*. Brooks reveals the deeply social aspect of our minds and exposes the bias in modern culture that overemphasizes rationalism, individualism, and IQ. He demolishes conventional definitions of success and looks toward a culture based on trust and humility. *The Social Animal* is a moving intellectual adventure, a story of achievement and a defense of progress. It is an essential book for our time—one that will have broad social impact and will change the way we see ourselves and the world.

Then Caleb's ex-girlfriend, Rosemary, enters the scene. Upon learning that Rosemary is not safely tucked away in Caleb's homeland overseas, but in fact lives in New York and also works in the literary world, Naomi is threatened and intrigued in equal measure. If they both fell for the same man, what else might they have in common? The more Naomi learns about Rosemary, the more her curiosity consumes her. Before she knows it, her casual Instagram stalking morphs into a friendship under false pretenses—and becomes the subject of her nascent novel. As her lies and half-truths spiral out of control, and fact and fiction become increasingly

difficult to untangle, Naomi must decide what—and who—she’s willing to sacrifice to write the perfect ending.

Places of Power and Memory in Mesoamerica's Past and Present Daniel Graña Behrens, 2016 La quatrième de couverture indique : This book provides a fresh look at the principles of power and the memory of

places in Mesoamerica. Toponyms, boundaries and landscapes play an important role in shaping local politics and peoples life's throughout past and present. Beyond structural and conceptual similarities in calendar, rituals and religion, Mesoamerica shares a devote preference for places, sites or urban centers as distinguishable feature for collectiveness, constantly reshaped and transformed according to the historical circumstances either political, economical or religious. Thus, more than a coincidence, the importance of places over recognizable or by natives documented cultural regions in Mesoamerica seems to be a cultural pattern with deep roots lasting until today.
