Rating the Presidents William J. Ridings, Stuart B. McIver, 2000-10 A solid primer and reference about the many men who have held the highest office in the US, from George Washington to Bill Clinton. Based on a poll of 719 historians & political scientists, this book ranks all the presidents in order of their influence & importance. From the best rated president (Lincoln) to the worst rated (Harding), the authors analyse the high & low points of each Chief Executive's term. Of course, external factors influence a presidency as well & the authors supply a detailed overview of each administration to provide an in depth perspective.

U.S. Statistical Rankings Joan Williams, Joe B. Williams, 1981

The Presidents Brian Lamb, Susan Swain, 2019-04-23 The complete rankings of our best -- and worst -- presidents, based on C-SPAN's much-cited Historians Surveys of Presidential Leadership. Over a period of decades, C-SPAN has surveyed leading historians on the best and worst of America's presidents across a variety of categories -- their ability to persuade the public, their leadership skills, their moral authority, and more. The crucible of the presidency has forged some of the very best and very worst leaders in our national history, along with everyone in between. Based on interviews conducted over the years with a variety of presidential biographers, this book provides not just a complete ranking of our presidents, but stories and analyses that capture the character of the men who held the office. From Abraham Lincoln's political savvy and rhetorical gifts to James Buchanan's indecisiveness, this book teaches much about what makes a great leader -- and what does not. As America looks ahead to our next election, this book offers perspective and criteria to help us choose our next leader wisely.

Ranking U. S. Presidents from Washington to Trump Stanford Erickson, 2020-08-19 Great presidents are determined first and foremost by the circumstances and times of their presidency. But great presidents also demonstrate great personal leadership in being in the forefront of necessary changes in our country. President Donald Trump recognized that after 70 years of promoting economic and political policies that rebuilt other nations following the devastations of WW II, it was time to rebuild and refortify the United States. Within three plus years, he has been doing that with renegotiated trade agrees, deregulation of overzealous bureaucratic oversight, tax cuts, increased military funding and judicial appointments. He also has demonstrated personal leadership in our nation's response to the worldwide pandemic. His effectiveness, like most national and international leaders, is questionable but he has been courageous in demonstrating leadership. Among the greatest U.S. presidents, I rank Donald J. Trump number eight of the forty-five presidents. Seven before President Trump, I list as: George Washington, Abraham Lincoln, Franklin Delano Roosevelt, Thomas Jefferson, Woodrow Wilson, Harry S Truman and Ronald Reagan. I justify my ranking by thoroughly examining the ratings of U.S. presidents by three acknowledged presidential rating historians: Clinton Rossiter, James David Barber and Alvin Stephen Felzenberg. I predicted in a newspaper column that Barack Obama would defeat Mitt Romney in 2012. I predicted that Donald Trump would defeat Hillary Clinton in 2016. I am predicting Donald Trump is odds-on favorite to beat any Democratic candidate for president in 2020. Having been a journalist for 40 years covering presidents and other international leaders, Congress and national and international business, I have found that to overcome a plethora of conflicting information and disinformation the simplest answer in understanding leaders is often the best. I have studied all 45 U.S. presidents and have found that the simplest way to determine why they got elected and why they were successful, less successful or not very successful at all, is to determine if they were a Daddy's Boy or a Mama's Boy from their birth on. I also identify in the book whether our presidents were balanced, atypical, conflicted or unbalanced. Our greatest presidents were balanced. In other words, if they were at birth Mama's Boys, they learned to acquire the attributes of the other parent to balance them. Abraham Lincoln was a Mama's Boy who married at Daddy's Girl, Mary Todd, who taught him to man up. I identify President Trump as an atypical Daddy's Boy. Though his father loved him and he loved his father, Donald has an inordinate need to be independent of a dominant father. To be his own man. Too simplistic? Of course, many other factors are involved. But I am talking about a simplistic rule of thumb, a poker tell, a major determining factor in predicting: who can get elected, in terms of their ability to campaign and attract a following; their personality and character; how they might make decisions; their policy inclinations; their management style, in terms of being able to delegate or not; if they have administrative capability; and, what is their worldview.

Gale State Rankings Reporter Gary Alampi, 1994 When you and your patrons need to conduct serious. analytical research on America's 50 states and Washington, D.C., turn to this new guide. You'll find over 5,200 state rankings within more than 3,000 tables.

State Rankings 2016 Kathleen O'Leary Morgan, Scott Morgan, 2016-04-05 Published annually, State Rankings features comprehensive state statistics making it easy to compare states across key measures in education, health, crime, transportation, taxes, government finance, and so much more. The editors compile useful statistics that would otherwise take an enormous amount of time to research making it a favorite resource on reference shelves throughout the United States and around the world. The rankings have been updated using specific methodology explained in the introduction. Geographic and data notes are also included to provide context. State Rankings compares every state and Washington, DC, in the following areas: - Agriculture - Population - Economy - Environment - Government finance - Crime - Education - Geography - Social welfare - Defense - Health - Energy - Housing

The American Presidents Ranked by Performance, 1789-2012, 2d ed. Charles F. Faber, Richard B. Faber, 2014-01-10 This is a revision and an updating of the first edition, published in 2000. Presidents from Washington to Obama (not included are William Henry Harrison and James A. Garfield because of very short terms) are rated in five categories: Foreign Relations, Domestic Programs, Administration and Intergovernmental Relations, Leadership and Decision Making, and Presidential Comportment. Each president is evaluated on his effectiveness in each area and a final analysis is provided for the scores combined. The presidents are then ranked overall. The most overrated and underrated chief executives are identified. Each entry includes biographical and political information, as well as an analysis of their overall behavior and status.

Living on the Edge Mark R. Rank, 1994 Based on ten years of research, the book follows individuals and families as they apply for and live on public aid and eventually leave the system. Rank's chronicle of their day-to-day experiences reveals the many sacrifices and crises that tax ordinary people in extraordinary ways. Beginning with a history of welfare from Roosevelt to Clinton, he focuses on AFDC and the Food Stamp program. He then describes the backgrounds of the recipients, their hopes for the future and attitudes toward welfare, their daily routines and problems, their work behavior, and the effect of welfare on family dynamics. Living on the Edge reveals the experiences of female-headed families, married couples, single men and women, and the elderly.

Poorly Understood Mark Robert Rank, Lawrence M. Eppard, Heather E. Bullock, 2021 Work hard to get ahead; the poor are mostly minorities in inner cities living lazily off of welfare fraud; the government spends more

on welfare than anywhere else in the world; America is a land of equal opportunity with easy social mobility for all. These are but a handful of the many myths about poverty in America, some of which have persisted for decades, with significant and harmful consequences on our social policy, our social compacts, and ourselves. Poorly Understood seeks to challenge and debunk these myths, along the way asking tough questions about how and why they have persisted and what it would take to replace them with true stories.

Freedom in the 50 States William P. Ruger, Jason Sorens, 2023-11-20 Freedom in the 50 States is one of the most comprehensive and definitive sources on how public policies in each American state impact an individual's economic, social, and personal freedoms. William P. Ruger and Jason Sorens score all 50 states on their overall respect for individual freedom, and also on their respect for three dimensions of freedom considered separately: fiscal policy, regulatory policy, and personal freedom. To calculate these scores, they weight public policies based on the estimated costs that individuals suffer when government restricts their freedoms. This 2023 edition improves on the methodology for weighting and combining state and local policies to create a comprehensive index. The authors introduce new policy variables suggested by readers and changes in the broader policy environment, which include but are not limited to a battery of state-level land-use laws affecting housing, new occupational licensing measures, and qualified immunity limitations.

Chasing the American Dream Mark Robert Rank PhD, Thomas A. Hirschl PhD, Kirk A. Foster PhD, 2014-03-01 The United States has been epitomized as a land of opportunity, where hard work and skill can bring personal success and economic well-being. The American Dream has captured the imagination of people from all walks of life, and to many, it represents the heart and soul of the country. But there is another, darker side to the bargain that America strikes with its people -- it is the price we pay for our individual pursuit of the American Dream. That price can be found in the economic hardship present in the lives of millions of Americans. In Chasing the American Dream, leading social scientists Mark Robert Rank, Thomas A. Hirschl, and Kirk A. Foster provide a new and innovative look into a curious dynamic -- the tension between the promise of economic opportunities and rewards and the amount of turmoil that Americans encounter in their quest for those rewards. The authors explore questions such as: -What percentage of Americans achieve affluence, and how much income mobility do we actually have? -Are most Americans able to own a home, and at what age? -How is it that nearly 80 percent of us will experience significant economic insecurity at some point between ages 25 and 60? -How can access to the American Dream be increased? Combining personal interviews with dozens of Americans and a longitudinal study covering 40 years of income data, the authors tell the story of the American Dream and reveal a number of surprises. The risk of economic vulnerability has increased substantially over the past four decades, and the American Dream is becoming harder to reach and harder to keep. Yet for most Americans, the Dream lies not in wealth, but in economic security, pursuing one's passions, and looking toward the future. Chasing the American Dream provides us with a new understanding into the dynamics that shape our fortunes and a deeper insight into the importance of the American Dream for the future of the country.
