Once we commit to a life in medicine, we commit to a life of learning. The Rosh Rapid Review book series is best suited to serve as an adjunct to your medical education. *Multiple Choice Questions and Rapid Revision of Surgery* Ahmed El-Bishry, Amr Mohsen, 2015-01-01 We realize the need of students for additional sources of multiple-choice questions. We also appreciate their need for a quick revision before sitting for examinations. This is why we put together this book, Multiple Choice Questions and Rapid Revision of Surgery. It contains more than 756 questions; all of them have explanatory answers. Key facts to remember are included at the ends of selected chapters. We hope the book will be of value for undergraduate as well as postgraduate students. It, therefore, contains questions of different grades of difficulty. This book is by no means a substitute for classic textbooks. We, however, encourage students to go through all questions more than once in order to consolidate their surgical knowledge and to cultivate the state of mind that prepares them for the examinations.

Includes information about epidemiology, disease prevention and the provision of health care, and tries to relate the community aspects of surgical problems to aetiology, disease prevention and primary care. Contains outlines of common surgical operations, to enable students and junior doctors to explain operations to patients and to allow them to participate intelligently in the operating department, as well as giving them an understanding of how to prevent complications. Includes a major section on accident surgery related to the general surgeon. Now with full text online on Student Consult.
