Fifty years of rapid transit J.B. Walker,

From a Nickel to a Token Andrew J. Sparberg,2014-11-03 A fascinating micro-history of NYC's subway system from LaGuardia's public works achievements in 1940 to the creation of the MTA in 1968. In 1940, New York Mayor Fiorello LaGuardia realized an ambitious plan to modernize the city's public transit. He eliminated streetcars, demolished old elevated lines, and unified the subway systems. From then on, the IRT, BMT, and IND became one system under public control. And by 1968, that system had transformed again, into the Metropolitan Transit Authority. From LaGuardia to Lindsay, mayors were desperate to appease voters, elected officials, transit management, and labor leaders. Meanwhile, the tumult of a changing America manifested in labor disputes, economic pressures, and civil rights protests. Though great efforts were made to keep prices down, the sacred nickel fare barrier was eventually broken. By 1968, a ride cost twenty cents. Featuring many photos never before published, *From a Nickel to a Token* deftly captures four decades and five boroughs of grit, chaos, egos, and emotions in the unending saga of New York's subway system.

IRT Interborough Rapid Transit / the New York City Subway: Its Design and Construction The Interborough Transit Company,2007-06-20 On October 27, 1904, the Interborough Rapid Transit Company opened the first subway in New York City. Running between City Hall and 145th Street at Broadway, the line was greeted with enthusiasm and, in some circles, trepidation. Created under the supervision of Chief Engineer S.L.F. Deyo, the arrival of the IRT foreshadowed the end of the elevated transit era on the island of Manhattan. The subway proved such a success that the IRT Co. soon

achieved a monopoly on New York public transit. In 1940 the IRT and its rival the BMT were taken over by the City of New York. Today, the IRT subway lines still exist, primarily in Manhattan where they are operated as the A Division of the subway. Reprinted here is a special book created by the IRT, recounting the design and construction of the fledgling subway system. Originally created in 1904, it presents the IRT story with a flourish, and with numerous fascinating illustrations and rare photographs.
