Missing Dad 5 J Ryan,2019-07-28 'The past can cast long shadows.' Missing Dad Book 5: Justice deals with the tragic murder seventeen years ago of Lisette, wife of the charismatic and mysterious French aristocrat Christian Rochelle, who has become more of a father to Joe than his own dad. Joe and Becks set out to solve the mystery of who was the accomplice who let the murdering Contessa da Palestrina into the ultra-secure Château L'Etoile? It is a quest that will take the teenagers close to a terrible death on more than one occasion, as they journey to Surat, the Indian diamond-cutting capital of the world, and onwards to Naples, riddled with its casual murders and mountains of toxic waste. But it is in the seas off the Northwest coast of Scotland where the story reaches its terrifying climax. We're heading relentlessly for the world's third largest whirlpool, on board a ship loaded with smuggled missiles, with a nuclear power plant that is going into meltdown.

Raptor Research and Management Techniques Keith L. Bildstein,David Michael Bird,2007 « Think about how we know about past events in human history (e.g., the expansion of the Roman Empire, or the American Revolution). What types of records document those events? Now think about Earth's history, specifically the past environmental or climatic conditions at times before recorded human history. What records might there be of such conditions? Make a list of your ideas. n assemblage of five major types of natural archives of Earth's environmental and climatic history. What common feature(s) do each of these paleoclimate archives share? an assemblage of 5 major types of natural records, or archives, of Earth's environmental and climatic history. Just like a diary or other historical document, the layers in these natural archives contain indirect evidence (i.e., proxies) about past conditions and events, recorded in a sequential order. The evidence is specific to a certain time period and may be general or very detailed,

depending on the rate that information was recorded. The faster the rate at which the recorder grew (trees and corals), accumulated (snow and ice), or was deposited (sedimentary sequences), the more detailed the record is, and the higher its resolution. For example, a record in which an annual signal can be observed has a very high resolution. In contrast, if the finest observable details are on the order of a million years, then that record would have a low resolution. »--

The Dinosaur Filmography Mark F. Berry, 2015-08-31 From classics like King Kong, to beloved B-movies like The Beast from 20,000 Fathoms, to blockbusters like Jurassic Park, it's easy to see that filmmakers and audiences alike love to see dinosaurs on the screen. This comprehensive filmography, arranged alphabetically by title, contains entries that include basic facts (year of release, country of origin, studio, and running time), followed by a concise plot summary, the author's critical commentary, information on the production and the people behind it, and secrets of the often-ingenious special effects. Three useful appendices feature films with minor dinosaur content, planned but unfinished dinosaur movies, and the quasi-dinosaurs of Toho Studios. To be included, a movie must depict one or more representations of a "prehistoric reptile." Inaccurate portrayals are included, as long as the intent is to represent a real or fictional dinosaur. Not eligible are films featuring prehistoric mammals, prehistoric humans or humanoids, and beasts of mythology—unless, of course, the movie also has a dinosaur.
