Readability Revisited Jeanne Sternlicht Chall, Edgar Dale, 1995 In *Readability Revisited*, Dr. Jeanne Chall and the late Dr. Edgar Dale present an introduction and historical overview of the original Dale-Chall Readability Formula, its purposes and uses over nearly five decades, and its relation to other measures of readability. The second chapter of *Readability Revisited* presents the new, revised Dale-Chall Readability Formula which is based on a new set of criterion passages, an updated familiar word list, and better rules for measuring the two factors of word familiarity and sentence length. The authors have also simplified the instructions and computations required to apply the formula. Three worksheets included in the book combine the revised Dale-Chall formula with assessments of the cognitive and structural elements of the written material, the characteristics of the target readers, and their purpose for reading the material. Together, these provide a new and powerful tool for assessing the reading difficulty of written materials.--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. Automated Readability Index E. A. Smith, R. J. Senter, 1967 Inasmuch as the utility of technical manuals is influenced to a marked extent by their reading difficulty or readability, the Automated Readability Index was devised to provide an easy, automated method of collecting data from which textual material can be evaluated in terms of readability. Whereas most readability formulas include separate factors related to (1) word difficulty and (2) sentence difficulty, the Automated Readability Index provides for the mechanical tabulation of the required data on passages as they are typed on a standard typewriter. Impulses from the typewriter activate counters which record the number of letters, words and sentences contained in the passage. From this, the average word length and average sentence length are computed. Appropriate weightings of these factors result in an index reflecting the readability of the passage. This index is in close agreement with other indexes of readability.--Abstract.

Readability: Text and Context Alan Bailin, Ann Grafstein, 2016-01-26 This book explores what makes a book readable by bringing together the relevant literature and theories, and situating them within a unified account. It provides a single resource that offers a principled discussion of the issues and their applications.

Smart Language William H. DuBay, 2007 The purpose of this book is to introduce the research on readability, defined here as reading ease. The first part of the book covers how people read. A series of national literacy surveys show that the average person in the U.S. and most other countries are adults of limited reading skills. For example, the average adult in the U.S. reads at the 9th-grade level, with nearly half reading below that level. The second part of this work covers the efforts made to match texts with readers. The research shows that more readable texts increase comprehension, retention, reading speed, and persistence. Other studies show how factors in both the reader and the text contribute to reading ease. Finally, the work follows the development of the readability formulas and the controversies that surrounded them. George Klare's Readability Ranking Test is appended. An index is included. (Contains 14 figures and 9 tables.).

Readability of Quarterly Reports: Do companies mislead investors? Bernhard Stellner, 2014-02-01 Financial reports can be regarded as the primary means of communication between a company's management and its shareholders. The reports also address all other kinds of stakeholders like employees, suppliers, customers, competitors, governments, potential investors, bond holders and, in a broad sense, the entire society. Still, it is questionable whether managers really deliver true information in their reports. One possible way of obscuring corporate information when results are negative, or of being forthcoming in disclosing information when results are good, is to adjust the reports' readability which can influence understandability as a consequence. The concrete aim of this study is to focus on the readability of letters to the shareholders of bilingual (German and English) quarterly reports of listed companies at Frankfurt Stock Exchange. It is examined how various factors influence the readability of company reports.

Student Speech Policy Readability in Public Schools Erica Salkin, Logan Shenkel, 2016-10-31 This book explores the issue of student speech in public schools from a student usability perspective. Student speech is both a challenge and an opportunity in public schools. When school boards and districts craft policy, they do so with US Supreme Court precedents, state laws, and community expectations in mind. The result is complex ideas presented in complex speech. What do student handbooks say about free speech, if anything at all? How are these rights defined, and how is the language interpreted? Salkin and Shenkel explore these questions by analyzing a sample of public high school student handbooks from across the country. Drawing from the results, the project proposes real-world suggestions for schools seeking to create student expression handbook language that is easily accessible to the audience it seeks to serve.

The Readability of the World Hans Blumenberg, 2022-12-15 The Readability of the World represents Hans Blumenberg's first extended demonstration of the metaphorological method he pioneered in *Paradigms for a Metaphorology*. For Blumenberg, metaphors are symptomatic of patterns of thought and feeling that escape conceptual formulation but are nonetheless indispensable, because they allow humans to orient themselves in an otherwise overwhelming world. The Readability of the World applies this method to the idea that the world presents itself as a book. The metaphor of the book of nature has been central to Western interpretations of reality, and Blumenberg traces the evolution of this metaphor from ancient Greek cosmology to the model of the genetic code to access the different expectations of reality that it articulates, reflects, and projects. Writing with equal authority on literature and science, theology and philosophy, ancient metaphysics and twentieth-century biochemistry, Blumenberg advances rich and original interpretations of the thinking of a range of canonical figures, including Berkeley, Vico, Goethe, Spinoza, Leibniz, Bacon, Flaubert, and Freud. Through his interdisciplinary, anthropologically sharpened gaze, Blumenberg uncovers a wealth of new insights into the continuities and discontinuities across human history of the longing to contain all of nature, history, and reality in a book, from the Bible, the Talmud, and the Qur'an to Diderot's Encyclopedia and Humboldt's Cosmos to the ACGT of the DNA code.

Readability (2/2) - Annandreas, 2021-09-21 This book is the second part of the two-part book *Readability - Birth of the Cluster text, Introduction to the Art of learning*, i.e. do not forget the first part! This book is the definitive guide to reading and learning - or to learn about philosophy, science, and pedagogy. After having read this book, you should have become a better reader and learner, and you should also know a little more about philosophy. Hence, this book could also be seen as a general introduction to philosophy. It can be seen in its content: Part One (524 pages). 1. Reading instructions (25). 2. Pedagogical psychology and pedagogical points (87). 3. Power analytics - an initial relationship to Foucault (52). 4.

Phenomenology and the birth of the cluster text (81). 5. Critical hermeneutics and knowledge about reading (102). 6. Micro power learning (learn how to write cluster text) and techniques of discipline (29). 7. Deconstruction and the text in society (62). 8. Positivism and the scientific method (63). Part Two (516 pages). 9. Philosophy, Morality, Knowledge (220). 10. The non-history of the cluster text (30). 11. Ars Legendi - reading and learning (125). 12. Introduction to Ars Discendi - Are texts wrongly written? (60). Appendix I, II and III. (60). This two-part book (1040 pages) is part of a bundle of books that you can use to learn about texts and reading. The others are Are Texts Wrongly Written? (130 pages, 2018), Typographic Manual (170 pages, 2021) and Typographical Investigations (450 pages, 2022?). The two shorter books can be seen as summaries of the two longer ones. Note, for all these books, that the cluster text style is not reflowable and that you need a screen where you can read a line length of 95 characters (i.e. narrow screens are inappropriate).

Readability (1/2) - Annandreas,2021-09-21 Readability - Birth of the Cluster text, Introduction to the Art of Learning is the definitive guide to reading and learning. After having read this book, you should have become a better reader and learner, and you should know what typographic style is better to read. Readability. In a wide sense, readability is about language, legibility, comprehension, and how they affect reading. This book is mainly about legibility and comprehension - language is mostly seen as a medium. Birth of the Cluster text. This book introduces the cluster text style to a wide audience. Reading speed can be measured in different ways: words per minute (wpm), day span, two-day span and week span. This two-part book should be extensive enough so that average readers (200 wpm) could test their week span and advanced readers (500 wpm) their two-day span, i.e. this reading experience should bring clarity to which typographic style is better to read. Hence, this book could be seen as a scientific experiment. Cluster texts could be as much as twenty percent better than ordinary texts. If this test will show that, we should change how we write texts. In other words, this could be a revolutionary reading experience - you could falsify your earlier thoughts on texts and reading. Introduction to the Art of Learning. This book introduces an art of reading in an art of learning. To be able to learn how to read better, content is needed. In this book, you will learn about philosophy, science, and pedagogy. It is about what (philosophy/science) and how (pedagogy) we learn. Hence, this book can also be seen as a general introduction to those areas. Note that this book is part one of a two-part book! Note also that the cluster text style is not reflowable and that you need a screen where you can read a line length of 95 characters (i.e. narrow screens are inappropriate).
