Aphasia Therapy in Practice Margaret Fawcus, Jean Kerr, Sue Whitehead, 1991 This photocopiable manual covers an area where reading materials are often hard to come by for the dysphasic client. Texts which are sufficiently simple are not always appropriately adult and the type size is often too small and too crowded. The title meets the need for a wide selection of reading materials suitable for the client with acquired dyslexia. Its contents arranged in a hierarchy of reading tasks from the very basic to the more advanced. Beginning with highly imageable single words, the activities move on to the more abstract at single word level. It introduces sentences of varying syntactic and semantic complexity. It also includes a wealth of reading passages ranging from short paragraphs with syntactically simple content, to the more

advanced material for those with slight dyslexic problems. It is designed to help the dyslexic client as much as possible, the format and large print makes this the ideal resource for photocopying as handouts.

A Decade of Aphasia Therapy Harold R. Regier, 2021

My Stroke Donald F. Weinstein Ph D, 2014-12-18 Readers of *My Stroke* by Dr. Weinstein will follow, step by step, his recovery from an Embolic Cerebrovascular Accident with Severe Aphasia. After his Stroke, he couldn't speak, read, write, sing or do arithmetic. This book takes a look at what goes into the spirit and soul of one stroke aphasia victim and survivor, the nuances that are not spoken about in cursory workshops and never detailed in lectures; a difficult journey with emotional highs and lows, anger and fear, issues of dignity and humiliation. He discusses shifting roles within the family, neuropsychological reports with throbbing pain and accomplishments. He details struggles to relearn reading, writing, speaking, singing, mathematics, interview skill strategies. He lets you feel the accomplishments of achieving a sound, a letter, a word, a simple sentence, and compensatory strategies, which are huge for a person with severe aphasia. Fifteen months later he was able to read a classic novel, very slowly, a solitary action, word by word, reading aloud slowly very slowly. He wrote a professional report, tediously, at a snail's pace, finding computer keys one letter at a time, trying to write a sentence, a paragraph and finally a page. He shares the emotions of singing at a Passover Seder, the melodies in his genes, but not easily retrieved from his brain. Hebrew words that were lost in his head do to his aphasia, but the brain has the incredible capability to modify itself, to form new connections between brain neurons and find what was lost. He found some of his fluency with Spanish on a vacation trip to Puerto Rico. Yet he was not whole'

but he continues to grow each day. Dr. Weinstein's forceful journey back from severe aphasia was moving. His accounts wrestle with discussions that every graduate school aphasia class needs to read and thrash out, knowing that the effects of aphasia vary from person to person. Even speech therapists will gain insight into what it is like to live with aphasia on a daily basis. He writes in depth about his experience with speech therapy and the exercises which helped him. Aphasiacs and their caregivers will share the difficult road back as they go from aphasia victim to aphasia survivor. Each chapter provides a check list for stroke survivors, and their spouses, family and friends, to help them deal more effectively with the consequences of stroke and aphasia. Weinstein's grasp of himself and others are very powerful and send a message of hope; he discovered how to live with aphasia. His come back from severe aphasia was dependent on himself, his drive, effort, ability and hard work to persevere over frustration and also the love and devotion of his family, the guidance and support of his speech-language pathologist and all the staff at the rehabilitation center, other doctors and nurses and the cheering from the sidelines of special friends; in other words, his community, each with unique qualities that Weinstein needed and required. But neither Weinstein nor the wonderful cast of characters, the protagonists, of Weinstein's story, knew what their roles were precisely other than caring. These caregivers, Weinstein's wife, son and daughter-in-law, and granddaughters, professionals, family and friends are seen in the vignettes that are integrated through this book; if you look closely you might see yourself in your mind's eye. There are streams of consciousness and free flow thoughts wrapped throughout each chapter. These allow you, the stroke victim and the spouse, to see the way that real life intermixes with both of you. The idea is that you may see something that is

important to you that you didn't think about before and it may help you. The watchwords for this book are frank, inspirational and hope; these are the unspoken words of many aphasiacs some who are not able to talk and express their thoughts. Dr. Weinstein talks for them.

Reading and Writing in Aphasia Parr, 2010-12-01

Aphasia Mauro Javier Cárdenas, 2020-11-03 Mauro Javier Cárdenas, the critically-acclaimed author of *The Revolutionaries Try Again*—“an original, insubordinate novel” (New York Times)—pens a profound story of literature about a man coming to terms with his dysfunctional Colombian family, as well as his own behavior, as an immigrant in America. Antonio wants to avoid thinking about his sister—even though he knows he won’t be able to avoid thinking about his sister—because his sister is on the run after allegedly threatening to shoot her neighbors, and has been claiming that Antonio, Obama, the Pentagon, and their mother are all conspiring against her. Nevertheless, Antonio is going to try his best to be as avoidant as possible, because he worries that what’s been happening to his sister might somehow infect his relatively contented, ordered American life, and destabilize the precarious arrangement with his ex-wife that’s allowed him to stay close to his two daughters. In fact, he’s busy doing everything except facing his problems head-on: transcribing recordings of his mother speaking about their troubled life in Colombia, transcribing recordings of his ex-wife speaking about her idyllic life in the Czech Republic; writing about former girlfriends whose words and deeds still recur in his mind; rereading stories by American writers that allow him to skirt the subject of his sister’s state of mind without completely destroying his own. Written in long, unravelling sentences that accommodate all the detritus of thought—scenes real and

imagined, headphones and heartache, Toblerones and Thomas Bernhard—Aphasia captures the immensity of the present moment as well as the pain of the past. It cements Mauro Javier Cárdenas's place as one of the most innovative and extraordinary novelists working today.

Reader in the History of Aphasia Paul Eling, 1994-01-01 The study of language and the brain is heavily dependent on the work of the early aphasiologists, and those wanting to get acquainted with the discipline will come across frequent references to these classic authors. This collection brings together seminal publications by 19th- and 20th-century neurologists concerned with the relationship between language and the brain. In selecting texts the emphasis was on those parts that deal explicitly with the opinion of an author on language processes as revealed by aphasic phenomena. All texts are presented in English (many of them translated for the first time), and preceded by in-depth introductions by present-day specialists in the field. The book includes biographical sketches of the authors discussed, and bibliographies of their relevant publications. This volume is invaluable for professionals and students who prefer to read the originals instead of leaning on textbook summaries. Texts by: Franz Joseph Gall (1758-1828) [Claus Heeschén]; Paul Broca (1824-1880) [Paul Eling]; Carl Wernicke (1848-1905) [Antoine Keyser]; Henry Charlton Bastian (1837-1915) [John C. Marshall]; John Hughlings Jackson (1835-1911) [Bento P.M.Schulte]; Sigmund Freud (1856-1939) [O.R. Hommes]; Jules Dejerine (1849-1917) [W.O.Renier]; Pierre Marie (1853-1940) [Yvan Lebrun]; Arnold Pick (1851-1924) [A.D.Friederici]; Henry Head (1861-1940) [Patrick Hudson]; Kurt Goldstein (1878-1965) [Ria de Bleser]; Norman Geschwind (1926-1984) [Mary-Louise Kean].

Talking About Aphasia Susie Parr, Sally Byng, Sue Gilpin, Chris Ireland, 1997-10-16 'This book is a wonderful idea and it meets a heretofore unmet need. It derives from a particularly interesting database, since it deals with aphasia in aphasic people's own language...It is strongly recommended.' Professor Audrey

Holland, Department of Speech Pathology, University of Arizona, USA This book is about living with aphasia - a language impairment which can result from stroke. Drawing on in-depth interviews with fifty aphasic people, it explores the experience of aphasia from the dramatic onset of stroke and loss of language to the gradual revelation of its long-term consequences. The story is told from the perspective of aphasic people themselves. They describe the impact of aphasia upon their employment, education, leisure activities, finances, personal relationships and identity. They describe their changing needs and how well these have been met by health, social care and other services. They talk about what aphasia means to them, the barriers encountered in everyday life and how they cope. The book offers a unique insight into the struggle of living with aphasia, combining startlingly unusual language with a clear interlinking text.

Finding My Voice with Aphasia Carol M. Maloney, 2013-05-10 On June 9, 2009, Carol M. Maloney, a veteran teacher, experienced a transient ischemic attack in the left hemisphere of her brain. She helplessly observed her mind deteriorate to the point where she could not speak, walk, read, identify household objects, or recall her family. Maloney traveled between the worlds of the surreal and the logical. The stroke resulted in aphasia, the loss of communication and other functions of her left hemisphere. After eighteen months of rehabilitation, she was finally able to communicate with others by using her hand as a metronome. The frustration of having the words and sentences formed in her mind but being unable to share them caused frustration and depression. Her verbal abilities suffered, along with her reading and comprehension skills. Even so, hard work, strong will, and persistence has allowed her to reach out to other teachers to offer new insight into the minds of her beloved special-education and reading-disabled students. In this, her story, Maloney turns her experience into a unique opportunity to gain an understanding of her students' difficulties and to share that knowledge with other teachers. "Ms. Carol Maloney has written a compelling story that chronicles her amazing life before, during, and after her devastating stroke. She writes with frankness that touches one's heart. Her story will lend encouragement to those who have suffered a stroke as well as offer strategies to those who have a loved one recovering from one. Carol Maloney developed aphasia after her stroke. I am happy to say that she has survived and conquered both the devastation of her stroke and her aphasia. I know this first hand: she conducts amazing PowerPoint

presentations to my graduate class at Rivier University each semester. She is an inspiration to all who want to improve themselves. In this book, Carol clearly describes the strategies that she used to help her become the functioning writer and speaker that she is today.” J. Diane Connell, Ed.D.

Join them as they learn what aphasia is, and how to help their dear friend who has just been diagnosed. This endearing story of friendship will encourage you to communicate with someone who has aphasia. You will learn that you really can make a difference. “I am happy to recommend this book for children and even adults to learn about aphasia. It is clear, understandable, and has very memorable illustrations, including a loveable dog. The book is highly educational for children, adolescents, and adults, and it is amusing and moving even for professionals who deal with aphasia. I recommend this book to one and all.” Howard S. Kirshner, MD Professor and Vice Chair, Department of Neurology Vanderbilt University Medical Center “This is an excellent book that summarizes aphasia for young children. It teaches the children, through the eyes of a dog who lives with a child, to understand that aphasia occurs when people cannot connect their ideas to words after a stroke. This is caused due to disconnection and damage of brain cells. The book explains how once the brain cells are damaged, a new team of brain cells has to learn to train and to be good at language function. That training can be done through aphasia therapy. The book highlights the importance of aphasia therapy as well as socializing and talking with people daily to improve their communication skills. The message in the book is clear and provides an optimistic yet accurate view of aphasia.” Swathi Kiran, Ph.D., CCC-SLP Professor & Doctoral Program Coordinator, Speech, Language and Hearing Sciences, Associate Dean for Research, Sargent College of Health and Rehabilitation Sciences, Boston University 635

Commonwealth Avenue Boston, MA 02215 “Now I Understand Aphasia” is a heart-warming depiction of those living with Aphasia. This book teaches us about the brain and its incredible ability to adapt. Kyle’s latest adventure in Tell Me Town allows us to experience Mrs. Lee’s journey from diagnosis to isolation, from support to acceptance. It reminds us of the important role we can all play in the lives of our neighbors, friends and family who struggle to communicate.” Capt. Patrick Horan U.S. Army Retired WIA, TBI, GSW Wife, Patty Horan “I always found it hard to explain to my friends why my dad could not communicate like he used to, but that he was still just as smart and capable. I felt an overwhelming sense of relief from reading this story as it shares challenges and proper communication methods that should be used when interacting with people that have aphasia. I love how Cindy Chambers uses her platform to bring awareness to aphasia.” Delaney Tsacoumis daughter of a gentleman with Aphasia—Ashburn, Virginia
