READ BY PICTURE. Simple Stories Helen Winter, Learn to Read. Book for Beginning Readers. Preschool, Kindergarten, and 1st Grade (Step into Reading. Level 1) We offer the easiest way to make reading books with children a pleasure, even for those children who listen to reading reluctantly. With the usual type of reading, a child is a passive listener, while with “reading by picture”, he or she becomes an active participant. Even if children can already read, they are happy to read texts where some of the words are replaced by pictures and perceive it as a bonus or a prize. It is more important to receive such bonuses for children who are just starting to read, or for whom reading still requires effort. A small child can only voice words represented by pictures. This reading not only makes kids a full participant in the process but also teaches them to reconcile the words of the picture with other words in the sentence. Older children may try to read words from a vocabulary list that appears before the text. A child who has begun to read will be able to enjoy reading the entire text. If you are reading to your little one, please read slowly. Let your child think about the sentence, find the right word, and enjoy the reading process. Some words in this book are changed to pictures. Each story has a pictured vocabulary list at the beginning. Includes 7 simple stories understandable and relatable for kids. Great book for non-English speaking children to learn and remember new words in a fun game-based reading activity.

Early Reading Instruction Diane McGuinness,2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading. In this book, Diane McGuinness provides an innovative solution to the reading war—the century-old debate over the efficacy of phonics (sound-based) versus whole-word (meaning- based) methods. She has developed a prototype—a set of

elements that are critical to the success of a reading method. McGuinness shows that all writing systems, without exception, are based on a sound unit in the language. This fact, and other findings by paleographers, provides a platform for the prototype. Other elements of the prototype are based on modern research. For example, observational studies in the classroom show that time spent on three activities strongly predicts reading success: learning phoneme/symbol correspondences, practice at blending and segmenting phonemes in words, and copying/writing words, phrases, and sentences. Most so-called literacy activities have no effect, and some, like sight word memorization, have a strongly negative effect. The National Reading Panel (2000) summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards. In an in-depth analysis of this evidence, McGuinness shows that the most successful methods (children reading a year or more above age norms) include all the elements in the prototype. Finally, she argues, because phonics-type methods are consistently shown to be superior to whole-word methods in studies dating back to the 1960s, it makes no sense to continue this line of research. The most urgent question for future research is how to get the most effective phonics programs into the classroom.

So Much More Than the ABCs MOLLY F.. SCHICKEDANZ COLLINS (JUDITH A.),Judith A Schickedanz,2024-10 The foundation for success in learning to read and write begins in infancy. As early childhood professionals, we have both the opportunity and the privilege to shape the progress young children make in acquiring the literacy skills, oral language skills, and background knowledge vital to their later success in learning to read and write. By engaging infants, toddlers, and preschoolers in experiences that foster oral language and content knowledge, literacy skills, and cognitive ability, we build a foundation for children's later academic success. Promoting children's desire to read and write is as important as helping children develop the necessary understandings and skills essential for learning how to read and write. Without motivation, children will read and write relatively little and only what and when they must. This book addresses four main points: What children need to learn in these early years The strategies that teachers can use to help children acquire these foundations The features of emergent literacy and language understandings and skills How to design the physical environment in early childhood classrooms to support language and literacy learning This revision updates information, cites new research, and includes new figures. The newest edition of this bestselling book will help early childhood professionals and families support young children in acquiring the understandings, knowledge, and skills needed for later success in learning to read and write.
