Secrets of the Steelpan Dr. Anthony Achong, 2013-09-30 This book describes a truly remarkable musical instrument „o the Steelpan (Pan) „o a melodic percussion instrument that produces tones of immense beauty. This instrument is the National Instrument of the twin islands of Trinidad and Tobago. The concepts, the ideas, the theories, the physics and the mathematics contained in this book are the answers to the question the author asked himself as a little boy peering over the face of a ping pong steelpan, ;¥how does it work?;| Revealed, are the subtleties and secrets of the instrument;|s operation, its laws, its construction and details of its tuning. Contained herein is the information sought by pan musicians, pan makers, panists, pan researchers and ;¥pan lovers;| „o nothing is left out. The rigor of the analytical methods of this book matches, in depth and intensity, the expert craftsmanship of the Master Pan Maker and Tuner. There is a unifying force within this book that combines the stick-note impacts to the panist;|s creativity in his production of musical tones. This book doesn;t dodge the difficult questions; it ends with a chapter on the exotic non-musical features of the steelpan.

Steelpan in Education Andrew Martin, Ray Funk, Jeannine Remy, 2017-11-15 Founded by Al O'Connor in 1973, the steelband program at Northern Illinois University was the first of its kind in the United States. Thanks to the talent and dedication of O'Connor, Cliff Alexis, Liam Teague, Yuko Asada, and a plethora of NIU students and staff members, the program has flourished into one of the most important in the world. Having welcomed a variety of distinguished guest artists and traveled to perform in locales around the US and in Taiwan, Trinidad, and South Korea, the NIU Steelband has achieved international acclaim as a successful and unique university world music program. This fascinating history of the NIU Steelband traces the evolution of the program and engages with broader issues relating to the development of steelband and world music ensembles in the American university system. In addition to investigating its past, Steelpan in Education looks to the future of the NIU Steelband, exploring how it attracts and trains new generations of elite musicians who continue to push the boundaries of the steelpan. This study will appeal to musicians, music educators, ethnomusicologists, and fans of the NIU Steelband.

Steelpan Ambassadors Andrew R. Martin, 2017-06-16 Maybe you won't like steel band. It's possible. But it's been said that the Pied Piper had a steel band helping him on his famous visit to Hamelin. When the US Navy distributed this press release, anxieties and tensions of the impending Cold War felt palpable. As President Eisenhower cast his gaze towards Russia, the American people cast their ears to the Atlantic South, infatuated with the international currents of Caribbean music. Today, steelbands have become a global phenomenon; yet, in 1957 the exotic sound and the unique image of the US Navy Steel Band was one-of-a-kind. Could calypso doom rock n roll? Band founder Admiral Daniel V. Gallery thought so and envisioned his steelband knocking rock n roll and Elvis Presley into the ash can. From 1957 until their disbandment in 1999, the US Navy Steel Band performed over 20,000 concerts worldwide. In 1973, the band officially moved headquarters from Puerto Rico to New Orleans and found the city and annual Mardi Gras tradition an apt musical and cultural fit. The band brought a significant piece of Caribbean artistic capital--calypso and steelband music--to the American mainstream. Its impact on the growth and development of steelpan music in America is enormous. Steelpan Ambassadors uncovers the lost history of the US Navy Steel Band and provides an in-depth study of its role in the development of the US military's public relations, its promotion of goodwill, its recruitment efforts after the Korean and Vietnam Wars, its musical and technological innovations, and its percussive propulsion of the American fascination with Latin and Caribbean music over the past century.

The 5th Experimental Chaos Conference Mingzhou Ding, William L Ditto, Louis M Pecora, Mark L Spano, 2001-04-02 The 5th Experimental Chaos Conference was a gathering of scientists and engineers who work on real-world systems that behave in a nonlinear and, often, chaotic fashion. The proceedings present discoveries of chaotic behavior, explanation of nonlinear phenomena in the laboratory, and applications of nonlinear and chaotic effects to devices and techniques for improving performance and surmounting technical obstacles. Experimental work is presented on chaos in semiconductor superlattices, spatiotemporal chaos in magnetic materials, instabilities in magnetic fluids, bifurcations of hexagonal patterns in lasers, and discrete rotating waves. New phenomena are exhibited on amplitude death in coupled oscillators, vortex crystals, wakes in soap films, chaotic dynamics of ocean waves, and microscopic chaos. Applications of chaotic dynamics are offered in the areas of chaotic pulse trains in digital communications, detection of changes in EEGs, detection of unstable periodic orbits in noisy data, cellular automata and warfare, detection of n:m phase synchronization, methods in acoustic chaos, chaos in the machine tool-cutting process, and a nonlinear airfoil. The broad range of topics and fields touches on a wide variety of systems whose behavior is now better understood and applied through the use of chaotic dynamics.

Claire's Music Workbook – Intermediate Edition Eros & Claire Mungal,

Global Perspectives on Orchestras Tina K. Ramnarine, 2017-12-04 Offering innovative approaches to thinking about orchestras, *Global Perspectives on Orchestras: Collective Creativity and Social Agency* adopts ethnographic, historical and comparative perspectives on a variety of traditions, including symphony, Caribbean steel, Indonesian gamelan, Indian film and Vietnamese court examples. The volume presents compelling analyses of orchestras in their socio-historical, economic, intercultural and postcolonial contexts, while emphasizing the global and historical connections between musical traditions. By drawing on new ethnographic and historical data, the essays describe orchestral creative processes and the politics shaping performance practices. Each essay considers how musicians work together in ensembles, focusing on issues such as training, rehearsal, creative choices, compositional processes, and organizational infrastructures. Testimonies of orchestral musicians highlight practitioners' views into the diverse world of orchestras. As a whole, the volume discusses the creative roles of performers, arrangers, composers and arts agencies, as well as the social environments supporting musical collaborations. With contributions from an international team of researchers, *Global Perspectives on Orchestras* offers critical insights gained from the study of orchestras, collective creativity and social agency, and the connections between orchestral performances, colonial histories, postcolonial practices, ethnographic writings and comparative theorizations.

50 Fantastic Ideas for Making Music Judith Harries, 2021-08-05 Music is key to early childhood development and contributes to socialisation, speaking, motor skills and more. *50 Fantastic Ideas for Making Music* is packed full of fun and accessible ideas for singing, creating instruments from recycled materials, exploring sounds and making music together. From making maracas, tambourines and rainsticks in the music workshop to beatboxing, singing, stomping and even writing rhythms, every activity uses easy-to-source equipment or no equipment at all. Greif Inc and Blagden Packaging Group Great Britain: Competition Commission, 2007-09-17 Greif UK Ltd is the largest manufacture of new large steel drums in the UK. On 30 November 2006 Grief UK acquired the new steel drum and closure businesses of Blagden Group, which was the second-largest producer of new steel drums in the UK. The merged businesses' combined share of supply of new steel drums in the UK is 85 per cent. Steel drums are the most widely-used form of large rigid industrial packaging, used in a range of industry sectors to package, transport and store a variety of substances. Demand for them has been declining, due to demand for less packaging and competition from plastic drums and intermediate bulk containers. The merger has resulted in a highly concentrated market, and has removed the main competitive restraint on Greif's prices and future behaviour. The Commission then examined what other developments might prevent the merged entity from exploiting its market position and increasing prices to customers. Schètz Group in the Netherlands is building a new large steel drum line, and the Commission feels that imports from there could be competitive. Other entrants into the market are thought unlikely. Recent developments in multi-layer plastic extrusion and coating techniques could allow more products to be packed in plastic containers. Suppliers of alternative packaging have invested in increased capacity so this might be a stronger competitive restraint in future. The Commission does not expect a substantial lessening of competition (SLC) to result from the merger.

The History of the Steel Band Verna Wilkins, Michael La Rose, 2008-04-15 The steel pan is the only musical instrument to have been invented in the 20th century. The story begins in Trinidad, in the Caribbean, where the people first begin to use all kinds of metal objects to make music. They collected a wide variety of assorted tins and shaped them and tuned them until they were turned into musical instruments. From Trinidad, the mighty steel orchestra has spread across the world. Includes a CD of Sterling's Angels (children's steel band led by Pan Maestro Sterling Betancourt) playing a range of music.

Night To Remember Niqui Stanhope, 2001-06-01 While flying home to visit family in Guyana, Dr. Alana Britton found herself fascinated by handsome Damian Collins. Then, an unscheduled layover gave them hours together on the sultry island of Trinidad. Certain Damian's passionate love was just a fleeting romantic interlude, Alana told him an unforgivable lie--and that became a web of deception she could not escape, even when she wanted him forever.

Material Selections by a Hybrid Multi-Criteria Approach Fabrizio D'Errico, 2015-01-16 This Brief presents a new method that is based on the author and his students' shared experience in applying a structured procedure that has as its main goal the creation of a material selection technique that uses language and employs a platform that is not restricted to engineers. Based on a hybrid approach that exploits both traditional and semi-quantitative concepts, it moves forward step-by step, and uses a platform based on a Quality Function Deployment matrix framework. Candidate materials are screened out and finally assessed by two user-friendly graphic analysis tools, one based on the value curve of the product and the other on an original Bubble Maps tool. The Brief is written for all those whose aim is for a better understanding of how to integrate and speed up the entire product development process from the initial product concept and engineering design phases to design specs, manufacturability and product marketing with optimal choice of materials.

Sweet and Sour Trinidad and Tobago Johnny Coomansingh, 2010-09-03 This book was written primarily for the people of Trinidad and Tobago. Nevertheless, it would be of great interest to the Caribbean Diaspora, and individuals who wish to understand the social, cultural, political, and economic dynamics of a developing Caribbean nation. Partially written in dialect, the text has afforded him a forum to reveal some secret and uncomfortable episodes in his life. His carefree style has allowed ample humor, making the narrative quite entertaining. In his research on the Steelpan, the national instrument of Trinidad and Tobago, he was able to take an unbiased glimpse of the twin-island state and its incomparable sweetness; no matter how twisted, the sugarcane owns its sugar. However, despite the sweetness, many terrible

upheavals in the society have caused an unforgivable nasty sourness in the system.

Steel Drums and Steelbands Angela Smith,2012-06-07 *Steel Drums and Steelbands: A History* is a vivid account of the events that led to the “accidental” invention of the steel drum: the only acoustic musical instrument invented in the 20th century. Angela Smith walks readers through the evolution of the steel drum from an object of scorn and tool of violence to one of the most studied, performed, and appreciated musical instruments today. Smith explores the development of the modern steelband, from its roots in African slavery in early Trinidad to the vast array of experiments in technological innovation and to the current explosion of steelbands in American schools. The book offers insights directly from major contributors of the steelband movement with sections devoted exclusively to pioneers and innovators. Drawing on seven years of research, repeated trips to the birthplace of the steel drum, Trinidad, and interviews with steelband pioneers, Smith takes readers far beyond the sunny associations of the steel drum with island vacations, cruise ships, and multiple encores of “Yellow Bird.” Digging deep into Trinidad’s history—a tale of indigenous extermination and African slavery, of French settlement and Spanish and British colonialism before mid-century independence—Smith weaves an unforgettable narrative of talking drums, kalinda stick fights, tamboo bamboo bands, iron bands, calypso, Carnival, and the U. S. military. Together, all played major roles in the evolution of today’s steelband and in the panman’s journey from renegade to hero in the steelband’s move from the panyards of Trinidad’s poorest neighborhoods to the world’s most prestigious concert halls. The reader will discover how an instrument created by teenage boys, descendants of African slaves, became a world musical phenomena. *Steel Drums and Steelbands* is the ideal introduction to the steel drum, steelbands, and their history.

The Emergence of the U.S. School Steel Band Movement Brandon L. Haskett,2018-12-05 Haskett examines the spread of steel band in US schools and universities. This phenomenon is examined within the context of the music education field.
