**111 Ways to Justify Your Commission** Michael Lee, 2007-08-07 Due to the growing threat of discounted real estate services and online competition, the number of real estate transactions completed by traditional professionals is dropping every year. Therefore, real estate professionals today are finding that the basic services of the past no longer are enough to appease the savvy consumer interested in buying or selling a home. The average commission rate dropped 16% from 1991 to 2004 according to industry analyst REAL Trends. Only those agents who learn how to justify their commissions will be paid what they're worth. In *111 Ways to Justify Your Commission*, author, real estate broker, and speaker Michael D. Lee arms real estate professionals with new methods of adding value to their services without compromising their livelihoods. Using tips, anecdotes, charts, and figures to outline a proven strategy, this guide provides practical, tangible, and easy-to-follow steps that add tremendous value to a real estate business, allowing real estate professionals to stay competitive in an evolving industry.

*Real Estate Valuation Theory* Many M. Mooya,2016-03-17 This monograph critically reviews and updates real estate valuation theory, which is based on neoclassical economics, in light of developments in heterodox economic theory. Building on a comprehensive historical account of the evolution of value theory, the book uses new institutional economics theory and critical realism as lenses through which problems in standard valuation theory and practice are expatiated, and as the foundation for an alternative theory. The new theory is employed to explain major problems in real estate valuation that are beyond the capability of the standard theory, such as price bubbles in real estate markets, anchoring bias, client influence and valuation under uncertain market conditions.
