True Story Danielle J. Lindemann, PhD,2022-02-15 Named a Best Nonfiction Book of 2022 by Esquire A sociological study of reality TV that explores its rise as a culture-dominating medium—and what the genre reveals about our attitudes toward race, gender, class, and sexuality What do we see when we watch reality television? In True Story: What Reality TV Says About Us, the sociologist and TV-lover Danielle J. Lindemann takes a long, hard look in the “funhouse mirror” of this genre. From the first episodes of The Real World to countless rose ceremonies to the White House, reality TV has not just remade our entertainment and cultural landscape (which it undeniably has). Reality TV, Lindemann argues, uniquely reflects our everyday experiences and social topography back to us. Applying scholarly research—including studies of inequality, culture, and deviance—to specific shows, Lindemann layers sharp insights with social theory, humor, pop cultural references, and anecdotes from her own life to show us who we really are. By taking reality TV seriously, True Story argues, we can better understand key institutions (like families, schools, and prisons) and broad social constructs (such as gender, race, class, and sexuality). From The Bachelor to Real Housewives to COPS and more (so much more!), reality programming unveils the major circuits of power that organize our lives—and the extent to which our own realities are, in fact, socially constructed. Whether we’re watching conniving Survivor contestants or three-year-old beauty queens, these “guilty pleasures” underscore how conservative our society remains, and how steadfastly we cling to our notions about who or what counts as legitimate or “real.” At once an entertaining chronicle of reality TV obsession and a pioneering work of sociology, True Story holds up a mirror to our society: the reflection may not always be pretty—but we can’t look away.

Reality Show Howard Kurtz,2007-10-09 Dan Rather, Tom Brokaw, Peter Jennings: They were on a first-name basis with the country for a generation, leading viewers through moments of triumph and tragedy. But now that a new generation has succeeded them, the once-glittering job of network anchor seems unmistakably tarnished. In an age of instantaneous Internet news, cable echo chambers and iPod downloads, who really needs the evening news? And, by extension, who needs Katie Couric, Brian Williams, and Charlie Gibson? But the anchors still have a megaphone capable of cutting through the media static. Their coverage of Iraq helped turn the country against that bloody war, and they are now playing a leading role in chronicling the collapse of George Bush's presidency and the 2008 race to succeed him. Yet, even as the anchors fight for ratings supremacy, the mega-corporations they work for have handed them a bigger challenge: saving an American institution. In this freewheeling, intimate account of life atop the media pyramid, award-winning bestselling author Howard Kurtz takes us inside the newsrooms and executive suites of CBS, NBC, and ABC, capturing the deadline judgments, image-making, jealousies, and gossip of this high-pressure business. Whether it is Couric trying to regain her morning magic while coping with tabloid stories about her boyfriends, Williams reporting from New Orleans and Baghdad while worrying about his ailing father, or Gibson weighing whether to follow his wife into retirement while grappling with having to report the explicit details of sex scandals, Kurtz brings to life the daily battles that define their lives. The narrative reflects an extraordinary degree of access to such corporate chieftains as Jeff Zucker and Les Moonves, star correspondents, and the anchors themselves. Their goal: create an on-screen persona that people will tune in to and trust. Yet they are faced with a graying, shrinking audience as younger viewers flock to Jon Stewart, whose influence on the real newscasts is palpable. Here is the untold story of what these journalistic celebrities think of their bosses, cable competitors, bloggers, and each other.

Audience Genre Expectations in the Age of Digital Media Leo W. Jeffres, David J. Atkin, Kimberly A. Neuendorf, 2022-12-05 This volume bridges the divide between film and media studies scholarship by exploring audience expectations of film and TV genre in the age of digital streaming, using qualitative thematic and quantitative data-driven analyses. Through four ground-breaking surveys of audience members and content creators, the authors have empirically determined what audiences expect of various genres, the extent to which these definitions match those of scholars and critics, and the overall variation and complexity of audience expectations in the age of media abundance. They also examine audience habits and preferences, drawing from both theory and original empirical analyses, with a view toward the implications for the moving image in a rapidly changing media environment. The book draws from the data to develop a number of new concepts, including genre repertoire, genre hybridity, audience interest maximization, and variety seeking, and a new stage of genre development, genre bending. It is an ideal resource for students and scholars interested in the symbiotic relationship between audiences and the moving image products they consume, as well as the way the current digital media environment has impacted our understanding of film and TV genres.

Reality TV Jon Kraszewski, 2017-02-24 From early first-wave programs such as *Candid Camera*, *An American Family*, and *The Real World* to the shows on our television screens and portable devices today, reality television consistently takes us to cities—such as New York, Los Angeles, and Boston—to imagine the place of urbanity in American culture and society. Jon Kraszewski offers the first extended account of this phenomenon, as he makes the politics of urban space the center of his history and theory of reality television. Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy, when cities were home to all classes, to its post-industrial economy as cities became key points in a web of global financing, expelling all economic classes except the elite and the poor. Reality television in the industrial era reworked social relationships based on class, race, and gender for liberatory purposes, which resulted in an egalitarian ethos in the genre. However, reality television of the post-industrial era attempts to convince viewers that cities still serve their interests, even though most viewers find

city life today economically untenable. Each chapter uses a key theoretical concept from spatial theory—such as power geometries, diasporic nostalgia, orientalism, the imagination of social expulsions, and the relationship between the country and the city—to illuminate the way reality television engages this larger transformation of urban space in America.

Terrorism TV Stacy Takacs, 2012-04-30 The Fox-TV series 24 might have been in production long before its premier just two months after 9/11, but its storyline—and that of many other television programs—has since become inextricably embedded in the nation's popular consciousness. This book marks the first comprehensive survey and analysis of War on Terror themes in post-9/11 American television, critiquing those shows that—either blindly or intentionally—supported the Bush administration's security policies. Stacy Takacs focuses on the role of entertainment programming in building a national consensus favoring a War on Terror, taking a close look at programs that comment both directly and allegorically on the post-9/11 world. In show after show, she chillingly illustrates how popular television helped organize public feelings of loss, fear, empathy, and self-love into narratives supportive of a controversial and unprecedented war. Takacs examines a spectrum of program genres—talk shows, reality programs, sitcoms, police procedurals, male melodramas, war narratives—to uncover the recurrent cultural themes that helped convince Americans to invade Afghanistan and Iraq and compromise their own civil liberties. Spanning the past decade of the ongoing conflict, she reviews not only key touchstones of post-9/11 popular culture such as 24, Rescue Me, and Sleeper Cell, but also less remarked-upon but relevant series like JAG, Off to War, Six Feet Under, and Jericho. She also considers voices of dissent that have emerged through satirical offerings like The Daily Show and science fiction series such as Lost and Battlestar Galactica. Takacs dissects how the War on Terror has been broadcast into our living rooms in programs that routinely offer simplistic answers to important questions—Who exactly are we fighting? Why do they hate us?—and she examines the climate of fear and paranoia they've created. Unlike cultural analyses that view the government's courting of Hollywood as a conspiracy to manipulate the masses, her book considers how economic and industry considerations complicate state-media relations throughout the era. Terrorism TV offers fresh insight into how American television directly and indirectly reinforced the Bush administration's security agenda and argues for the continued importance of the medium as a tool of collective identity formation. It is an essential guide to the televisual landscape of American consciousness in the first decade of the twenty-first century.

Reality TV Misha Kavka, 2012-02-15 Is reality TV a coherent genre? This book addresses this question by examining the characteristics, contexts and breadth of reality TV through a history of its programming trends. Paying attention to stylistic connections as well as key concepts, this study breaks reality television down into three main 'generations': the camcorder generation, the competition generation and the celebrity generation. Beginning with a consideration of the applicability of the term 'genre' for this televisual hybrid, the book takes a transnational approach to investigating the forms and formats of reality TV framed by relevant popular and critical discourses.

America, As Seen on TV Clara E. Rodríguez, 2018-03-20 Finalist, 2020 Latino Book Awards, Best Academic Themed Book The surprising effects of American TV on global viewers As a dominant cultural export, American television is often the first exposure to American ideals and the English language for many people throughout the world. Yet, American television is flawed, and, it represents race, class, and gender in ways that many find unfair and unrealistic. What happens, then, when people who grew up on American television decide to come to the United States? What do they expect to find, and what do they actually find? In America, As Seen on TV, Clara E. Rodríguez surveys international college students and foreign

nationals working or living in the US to examine the impact of American television on their views of the US and on their expectations of life in the United States. She finds that many were surprised to learn that America is racially and economically diverse, and that it is not the easy-breezy, happy endings culture portrayed in the media, but a work culture. The author also surveys US-millennials about their consumption of US TV and finds that both groups share the sense that American TV does not accurately reflect racial/ethnic relations in the US as they have experienced them. However, the groups differ on how much they think US TV has influenced their views on sex, smoking and drinking. America, As Seen on TV explores the surprising effects of TV on global viewers and the realities they and US millennials actually experience in the US.
