*Genie's Bottle* Berta Bauer, 2012-03-14 What caused the boom to crash down on Captain Kara's head and delay the final leg of her voyage home to resume her career? Is it sailors' superstition, or does Kara's beloved sailboat, Genie's Bottle, have magical powers that forced her to abandon her solo Lake Superior crossing? Between May Day and Memorial Day, Kara, Rikk, and Dutch confront their long-held fears they've kept guarded with ferocious skill. As all three begin to make conscious choices, their exposed secrets uncover their hidden identities—divulging coincidental pasts. Together, they discover the synchronistic treasures accumulated over decades and revealed during the month of May.

**The Genie of Londonistan** Jack Polden, 2013-11-01 The mid-21st century: Britain is beset by Islamic extremism and runaway global warming. The streets are bloody. Eight year old Florri has been accidentally shot in a drive-by shooting - or act of devotion in the new polite-speak - and is fading fast. 50-something Ray, a disillusioned local government worker and part time musician, is killed in a bomb blast. The technology now exists to transfer his mind into Florri, while hers undergoes repair. Something goes wrong. Ray reawakens prematurely, set on musical stardom. But there is a fatwa on Ray's head and the jihadists are closing in...

**Harnessing the Genie: Science and Technology Forecasting for the Air Force 1944-1986**, 1988 This monograph on the forecasting of long-range Air Force science began as an attempt to describe the five major scientific studies undertaken by the U.S. Army Air Force (USAAF)/U.S. Air Force (USAF) since the end of World War II. 'Toward New Horizons' was initiated to summarize the most advanced air power technologies of World War II and project them into the future. 'Woods Hole Summer Studies' organized hundreds of academic scientists to predict the short and long-term military uses of space. 'Project Forecast' had the mandate of revitalizing Air Force thinking by linking national policy issues of scientific vistas and new weapon systems. 'New Horizons II' endeavored to point the way toward technological improvements in a period of expected scarcity. 'Project Forecast II' sought to infuse the Air Force laboratories with new avenues of basic science research.

**Cixous's Semi-Fictions** Mairead

Hanrahan, 2014-09-15 H       Cixous, author of over forty works of fiction, was deemed by Derrida to be the greatest living writer in French in 1990. Consistent with this evaluation, her writing is renowned for its dense poetical texture and lyricism. At the same time, she has been described by one of Derrida's translators, Peggy Kamuf, as 'one of our age's greatest semi-theoreticians'. Connecting these views, Hanrahan argues for a consideration of her texts as 'semi-fictions'. She offers an in-depth reading of five different texts, addressing their idiomatic specificity and investigating how the textual fabric unfolds.

*Language and Cognition in Bilinguals and Multilinguals* Annette M.B. de Groot, 2011-04-27 Psycholinguistics – the field of science that examines the mental processes and knowledge structures involved in the acquisition, comprehension, and production of language – had a strong monolingual orientation during the first four decades following its emergence around 1950. The awareness that a large part of mankind speaks more than one language – that this may impact both on the way each individual language is used and on the thought processes of bilinguals and multilinguals, and that, consequently, our theories on human linguistic ability and its role in non-linguistic cognition are incomplete and, perhaps, false – has led to a steep growth of

studies on bilingualism and multilingualism since around 1995. This textbook introduces the reader to the field of study that examines language acquisition, comprehension and production from the perspective of the bilingual and multilingual speaker. It furthermore provides an introduction to studies that investigate the implications of being bilingual on various aspects of non-linguistic cognition. The major topics covered are the development of language in children growing up in a bilingual environment either from birth or relatively soon after, late foreign language learning, and word recognition, sentence comprehension, speech production, and translation processes in bilinguals. Furthermore, the ability of bilinguals and multilinguals to generally produce language in the intended language is discussed, as is the cognitive machinery that enables this. Finally, the consequences of bilingualism and multilingualism for non-linguistic cognition and findings and views regarding the biological basis of bilingualism and multilingualism are presented. The textbook's primary readership are students and researchers in Cognitive Psychology, Linguistics, and Applied Linguistics, but teachers of language and translators and interpreters who wish to become better informed on the cognitive and biological basis of bilingualism and multilingualism will also benefit from it.

*Egyptianizing Figurines from Delos* Caitlín Barrett, 2011-09-20 This book investigates Hellenistic popular religion through an interdisciplinary study of figurines of Egyptian

deities from Delos. The results offer a new perspective on Hellenistic reinterpretations of Egyptian religion, as well as the relationship between “popular” and “official” cults.

**Weimar in Exile** Jean-Michel Palmier,2017-01-31 A magisterial history of the artists and writers who left Weimar when the Nazis came to power In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, “the best of Germany,” refusing to remain citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. Weimar in Exile follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch, Bertolt Brecht, Alfred Döblin, Hanns Eisler, Heinrich Mann, Thomas Mann, Anna Seghers, Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis.

*The Christmas Genie* Dan Gutman,2010-10-05 It's the last day of school before Christmas vacation and Alex, Chase, and the rest of Mrs. Walter's fifth-grade class couldn't wish more for the final

bell to ring. But the day takes a crazy turn when a mysterious meteorite crashes through the classroom window—and a genie pops out! Bob, as he's called, is willing to grant only one wish for the class to share, and if they can't agree on something before the bell rings in an hour, they'll get nothing at all. What follows is a debate that is at turns thought-provoking and hilarious—and at all times irresistible.
