Hiring and Keeping The Right Employee Britney Givens, 2021 Hiring the right person for the job at hand is important to the smooth operation of your business and to the morale of the other employees. There is nothing worse for you, your company, or the new person that is being hired than to find out that fit of person and personality to the job is just not going to work. The new hire will leave under less than optimal conditions,

existing employees will begin to jump ship or you will be left with the unpleasant task of firing the person you just hired. Firing is probably the most painful conclusion for all the parties involved. The ability to hire the right person for the right job is not something most managers are born being able to do. It is a learned process that could take years to perfect. Along the way it is important to use the knowledge and experience of the people that have gone before you. Read articles on the art of hiring. Find classes on communications and interviewing tips. Learn all you can to become the person that can hire and keep the right people on a consistent basis. Not only is the process of hiring a complicated and time consuming task, but it can mean the difference between tranquility and disaster in your company. Hiring the wrong person for the job can snowball into existing employees becoming unsatisfied and choosing to move on. It could result in loss of customers or clients. The wrong person can mean that you have to start the hiring process all over again (only multiplied). To avoid the hire then fire syndrome, you need to take steps to ensure the person you choose for the position is a right fit. In order to stay on target you need to be prepared, be sure to understand the position and the other people, use all the tools available to you, and understand the interview process from top to bottom. You have to be willing to invest time and money into the pre-screening process, the interview and the final evaluation. The hiring process might be expensive, but it is nothing compared to the expense of training a new employee only to have that employee quit (or to have other existing employees walk away) with little or no notice. The hiring process is an art and a science that can no be rushed. It is not something that should happen on a whim. It can take quite a bit of time and effort to prepare properly for a round of interviews. It is important that you start as early as possible so you don't get caught in a time crunch. Rushing a decision is what leads most people into making the wrong choice. When it comes to hiring, patience and

preparation are invaluable tools. There are basically ten steps that you should follow when you are in need of a new employee – either for an existing position or for one that is being created within the company. These steps are designed to help you identify the right person for the position and follow up with ways to keep the same employee for the long term.

How to Recruit the Right Staff Graham Martin, 2013-04 Despite challenging economic times, the UK & USA currently face severe skills shortages; a recent survey stated that 85% of business said that their inability to recruit the 'right' staff was their number one challenge. The sad fact is that whilst many organisations may officially state that our staff are our greatest asset, many employers put more time & effort into the purchase of a new company car than they do into the recruitment of new or replacement staff! Whilst the average UK salary is approx £28,000; the overall annual cost including taxes, training and holiday cover are estimated at nearer £40,000! Add the costs associated with a recruitment campaign and the importance of getting it right first time become evident. With only 9% of employees currently in their dream job and at any given time an estimated 42% of staff actively considering a change of job, it is

clear that, in the UK at least, we're not very good at what is obviously a poorly delivered business function; effective recruitment. Written primarily for the private sector this book aims to provide simple, yet exceptionally powerful recruiting strategies for non-HR managers. In it you will find essential advice on how to recruit more effectively, both using recruitment agencies and on your own. Tips on how to retain the right staff are provided. Graham Martin has been at the 'sharp end' of recruitment for over 25 years and has recruited nearly 1700 people for client organisations and has sat in front of nearly 2000 managers, directors or business owners discussing their recruitment needs. This, Graham's first book is the distillation of his experience in recruitment from an employers perspective. Having engaged Graham Martin to recruit office juniors to finance and marketing managers for nearly 20 years I am fully aware that he knows what he's doing! His book guides business managers through the labyrinth of recruitment in easy to understand steps. A useful little book that makes so much sense

Breakthrough Principals Jean Desravines,Jaime Aquino,Benjamin Fenton,2016-03-22 Bridge the achievement gap with proven strategies for student success Breakthrough Principals debunks the myth of the 'superhero' principal by detailing the common actions and practices of leaders at our nation's fastest-gaining public schools. Based on the authors' Transformational Leadership Framework, which they developed through in-depth study of more than 100 high-gaining, high-poverty schools, the book distills findings into a practical, action-focused plan for diagnosing school needs and implementing structures, systems and practices that accelerate student achievement. Brought to life by case studies of principals who have led dramatic gains in student achievement, the book is a how-to guide for increasing the quality of teaching and learning; improving school culture; attracting and supporting high-

performing teachers; and involving parents and community to help students achieve. You'll learn how breakthrough principals make the school's mission a real part of both strategy and practice, and set up sustainable systems that support consistent, ongoing improvement. High-impact practices are organized into five broad categories: learning and teaching, school-wide culture, aligned staff, operations and systems, and personal leadership. The primary job of school leadership is to help students succeed. It begins with first recognizing and prioritizing areas of need, then finding and implementing the most effective solutions. Whether you work in a turn around environment, or want to make a good school better, this book will give you a set of concrete practices—illustrated through examples of real principals in real schools—that have been proven to work. Discover the primary drivers of student achievement Work toward the school's vision in staffing, operations, and systems Set the tone for all relationships and practices with good leadership Closing the achievement gap is a major goal of educational leadership, and principals are forever searching for viable methods that help them better serve their students. Breakthrough Principals unveils the details behind the success stories from across the nation to provide a roadmap to transformative gains.
