Recruiting Employees Alison E. Barber,1998-04-28 Recruiting Employees describes what is currently known and what remains to be learned about the processes by which organizations recruit new members. In this volume, Alison E. Barber delineates three separate stages of recruitment generating applications, maintaining applicant status, and influencing job choice and discusses existing knowledge and important unanswered questions relevant to each of these stages. She also addresses the question of whether and how recruitment influences organizational outcomes. Traditional recruitment topics such as recruitment source effects and reactions to initial interviews are covered in detail. Alternative frameworks and different research, requiring different theoretical frameworks and different research methods, are also proposed. Researchers, scholars, and students interested in studying or contributing to the research literature on recruitment will find this a valuable resource.

Indigenous Peoples and Human Rights Ben Saul,2016-06-30 Indigenous Peoples and Human Rights explores how general human rights standards have enabled, empowered and constrained indigenous peoples in claiming and defending their essential economic, social, cultural, civil and political interests. The book examines the jurisprudence of United Nations treaty committees and regional human rights bodies (in Africa, the Americas and Europe) that have interpreted and applied human rights standards to the special circumstances and experiences of indigenous peoples. It focuses particularly on how human rights laws since the 1960s have been drawn upon by indigenous activists and victims to protect their interests in ancestral lands, natural resources, culture and language. It further explores the right to indigenous self-determination; civil and political rights; economic, social and cultural rights (including labour rights); family and children's rights; violence and discrimination against indigenous peoples; and access to justice and remedies for violations. The book also discusses international and regional efforts to define who is 'indigenous' and who is a 'minority', and the legal relationship between indigenous individuals and their communities. The jurisprudence considered in this book significantly shaped the UN Declaration on the Rights of Indigenous Peoples 2007, which particularises and adapts general human rights standards for indigenous peoples. The book concludes by exploring future normative and implementation challenges in the light of the standard setting and consolidation, and political momentum, surrounding the UN Declaration and associated UN human rights mechanisms.

Complex Interventions in Health David A. Richards, Ingalill Rahm Hallberg, 2015-04-17 Health and human services currently face a series of challenges – such as aging populations, chronic diseases and new endemics – that require highly complex responses, and take place in multiple care environments including acute medicine, chronic care facilities and the community. Accordingly, most modern health care interventions are now seen as ‘complex interventions’ – activities that contain a number of component parts with the potential for interactions between them which, when applied to the intended target population, produce a range of possible and variable outcomes. This in turn requires methodological developments that also take into account changing values and attitudes related to the situation of patients’ receiving health care. The first book to place complex interventions within a coherent system of research enquiry, this work is designed to help researchers understand the research processes involved at each stage of developing, testing, evaluating and implementing complex interventions, and assist them to integrate methodological activities to produce secure, evidence-based health care interventions. It begins with conceptual chapters which set out the complex interventions framework, discuss the interrelation between knowledge development and evidence, and explore how mixed methods research contributes to improved health. Structured around the influential UK Medical Research Council guidance for use of complex interventions, four sections, each comprised of bite-sized chapters written by multidisciplinary experts in the area, focus on: - Developing complex interventions - Assessing the feasibility of complex interventions and piloting them - Evaluating complex interventions - Implementing complex interventions. Accessible to students and researchers grappling with complex interventions, each substantive chapter includes an introduction, bulleted learning objectives, clinical examples, a summary and further reading. The perspectives of various stakeholders, including patients, families and professionals, are discussed throughout as are the economic and ethical implications of methods. A vital companion for health research, this book is suitable for readers from multidisciplinary disciplines such as medical, nursing, public health, health services research, human services and allied healthcare backgrounds.

Rome: Republic into Empire Paul Chrystal, 2019-01-30 Rome: Republic into Empire looks at the political and social reasons why Rome repeatedly descended into civil war in the early 1st century BCE and why these conflicts continued for most of the century; it describes and examines the protagonists, their military skills, their political aims and the battles they fought and lost; it discusses the consequences of each battle and how the final conflict led to a seismic change in the Roman political system with the establishment of an autocratic empire. Using a wide range of literary and archaeological evidence, Paul Chrystal offers a rare insight into the wars, battles and politics of this most turbulent and consequential of ancient world centuries; in so doing, it gives us an eloquent and exciting political, military and social history of ancient Rome during one of its most cataclysmic and crucial periods, explaining why and how the civil wars led to the establishment of one of the greatest empires the world has known.

The ICCA Handbook on Corporate Social Responsibility Judith Hennigfeld, Manfred Pohl, Nick Tolhurst, 2006-10-02 The world's leading companies have realized that success in the long term requires them not only to make an economic profit, but also to contribute to the societies in which they operate. As a result Corporate Social Responsibility (CSR) has moved to the top of the business agenda. Yet questions remain. Sceptics ask whether, provided an organization's activities conform to legislation, there is a business case for going beyond this. This unique Handbook from the Institute for Corporate Culture Affairs (ICCA) offers an invaluable combination of lessons learned and best practice for the future. It explores the general concept of CSR, investigates approaches to implementation and provides first-hand insights from well-known CEOs, academics and organizations. Above all it stresses the fact that CSR must spring from a corporate culture, implying values and norms which in themselves endorse sustainable ways of doing business. Without this shift of emphasis from shareholder returns to sustainable value, CSR can never be more than a diversion. Featuring contributions from Ben Verwaayen (CEO, BT Group), Fujio Mitarai (President and CEO, Canon), Sir Geoffrey Chandler (Founder, Amnesty International Business Group) and Yoshio Shirai (Managing Director, Toyota), as well as experiences from inside leading organizations like Volkswagen, Credit Suisse, The Body Shop and the UK Government, The ICCA Handbook of Corporate Social Responsibility showcases CEOs and companies that have seized the opportunities offered by CSR. It is intended to stimulate further exchange and development in the field. For now, it captures the state of the CSR art. The Board of Editors who have worked on this book include Katja Böhmer, Aron Ghebremariam, Judith Hennigfeld, Sandra S. Huble, Dirk Matten, Manfred Pohl, Nick Tolhurst & Wayne Visser
