Photographic Enforcement of Traffic Laws Robert R. Blackburn, Daniel T. Gilbert, National Cooperative Highway Research Program, 1995 This synthesis will be of interest to state and local highway agency administrative and executive officers, enforcement agency personnel, attorneys, traffic engineers, and others concerned with managing and enforcing traffic laws at all levels of government. It will also be of interest to manufacturers and marketers of automated speed enforcement (ASE) technology. The synthesis describes the requirements, applications, effectiveness, and issues related to the use of ASE technology. This report of the Transportation Research Board describes the various types of ASE technology as applied in several localities, including descriptions of operational requirements and performance characteristics of these technologies. The synthesis also discusses how citations are processed, and examines the legal and acceptability issues related to ASE technology and public views on these actions. The various technologies on the market at the time of preparation of this synthesis are also described. It should be noted that, as with any application of public surveillance technology, officials are well advised to exercise proper cautions when employing such enforcement procedures.

International Encyclopedia of Transportation ,2021-05-13 In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction; this is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts. This has become particularly acute with the impact that Covid-19 has had on transportation across the world, at local, national and international levels. Encyclopedia of Transportation, Seven Volume Set - containing almost 600 articles - brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering, operations research, economics, geography and sociology in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes, but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world and different social perspectives. The nine sections are structured around the following themes: Transport Modes; Freight Transport and Logistics; Transport Safety and Security; Transport Economics; Traffic Management; Transport Modelling and Data Management; Transport Policy and Planning; Transport Psychology; Sustainability and Health Issues in Transportation. Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future-oriented view of new research areas or challenges. The end result is a reference work that offers researchers and practitioners new approaches, new ways of thinking and novel solutions to problems. All-encompassing and expertly authored, this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world. Provides a forward looking and integrated approach to transportation Updated with future technological impacts, such as self-driving vehicles, cyber-physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach, including sets of comparative studies and applications

Big Brother Mark Dice, 2011-01 In *Big Brother: The Orwellian Nightmare Come True*, Mark Dice details actual NSA high-tech spy systems, mind-reading machines, secret government projects, and emerging artificial intelligence programs that seem as if they came right out of George Orwell's novel *Nineteen Eighty-Four*. Orwell's famous book was first published in 1949, and tells the story of a nightmarish future where citizens have lost all privacy and are continuously monitored by the omniscient Big Brother surveillance system which keeps them obedient to a totalitarian government. The novel is eerily prophetic as many of the fictional systems of surveillance described have now become a reality. Mark Dice shows you the scary documentation that Big Brother is watching you, and is more powerful than you could imagine. - The National Security Agency - Facial Recognition Scanners - Mind Reading Machines - Neural Interfaces - Psychotronic Weapons - Orwellian Government Programs - The Nanny State - Orwellian Weapons - Artificial Intelligence - Cybernetic Organisms - A Closer Look at 1984 - Our Social Structure - The Control of Information - Perpetual State of War - The Personification of the Party - Telescreens - A Snitch Culture - Relationships in Shambles - A Heartless Society - Foreign Countries Painted as Enemies - Power Hungry Officials - An Erosion of the Language - Double Think - And More! The SAGE Encyclopedia of Surveillance, Security, and Privacy Bruce A. Arrigo, 2016-06-15 In all levels of social structure, from the personal to the political to the economic to the judicial, *The SAGE Encyclopedia of Surveillance, Security and Privacy* uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide.

Imagining Germany Imagining Asia Veronika Fuechtner, Mary Rhiel, 2013 This collection of new essays explores how Germany's imagined Asia informed its national fantasies at crucial historical junctures. It will influence future scholarly explorations of Asian-German cultural transfer.

U.S. Army Special Forces Language Visual Instructor And Student Training Materials - GERMAN - Plus Web-Based Program and Chapter Audio Downloads , Now included at the end of the book is a link for a web-based program, PDFs and MP3 sound files for each chapter. Over 1,500 pages ... Developed by I Corps Foreign Language Training Center Fort Lewis, WA For the Special Operations Forces Language Office United States Special Operations Command LANGUAGE TRAINING The ability to speak a foreign language is a core unconventional warfare skill and is being incorporated throughout all phases of the qualification course. The students will receive their language assignment after the selection phase where they will receive a language starter kit that allows them to begin language training while waiting to return to Fort Bragg for Phase II. The 3rd Bn, 1st SWTG (A) is responsible for all language training at the USAJFKSWCS. The Special Operations Language Training (SOLT) is primarily a performance-oriented language course. Students are trained in one of ten core languages with enduring regional application and must show proficiency in speaking, listening and reading. A student receives language training throughout the Pipeline. In Phase IV, students attend an 8 or 14 week language blitz depending upon the language they are slotted in. The general purpose of the course is to provide each student with the ability to communicate in a foreign language. For successful completion of the course, the student must achieve at least a 1/1/1 or higher on the Defense Language Proficiency Test in two of the three graded areas; speaking, listening and reading. Plays of Our Own Willy Conley, 2022-12-30 *Plays of Our Own* is the first anthology of its kind containing an eclectic range of plays by Deaf and hard-of-hearing writers. These writers have made major, positive contributions to world drama or Deaf theatre arts. Their topics range from those completely unrelated to deafness to those with strong Deaf-related themes such as a dreamy, headstrong girl surviving a male-dominated world in Depression-era Ireland; a famous Spanish artist losing his hearing while creating his most controversial art; a Deaf African-American woman dealing with AIDS in her family; and a Deaf peddler ridiculed and rejected by his own kind for selling ABC fingerspelling cards. The plays are varied in style – a Kabuki western, an ensemble-created variety show, a visual-gestural play with no spoken nor signed language, a cartoon tragicomedy, historical and domestic dramas, and a situation comedy. This volume contains the well-known Deaf theatre classics, *My Third Eye* and *A Play of Our Own*. At long last, directors, producers, Deaf and hearing students, professors, and researchers will be able to pick up a book of Deaf plays for production consideration, Deaf culture or multicultural analysis, or the simple pleasure of reading.

Pattern Recognition Juergen Gall, Peter Gehler, Bastian Leibe, 2015-10-06 This book constitutes the refereed proceedings of the 37th German Conference on Pattern Recognition, GCPR 2015, held in Aachen, Germany, in October 2015. The 45 revised full papers and one Young Researchers Forum presented were carefully reviewed and selected from 108 submissions. The papers are organized in topical sections on motion and

reconstruction; mathematical foundations and image processing; biomedical image analysis and applications; human pose analysis; recognition and scene understanding.

Post-Unification Turkish German Cinema Gozde Naiboglu,2018-01-10 This book offers a post-representational approach to a range of fiction and non-fiction films that deal with labour migration from Turkey to Germany. Engaging with materialist philosophies of process, it offers analyses of films by Thomas Arslan, Christian Petzold, Aysun Bademsoy, Seyhan Derin, Harun Farocki, Yüksel Yavuz and Feo Aladag. Shifting the focus from the longstanding concerns of integration, identity and cultural conflict, Gozde Naiboglu shows that these films offer new expressions of lived experience under late capitalism through themes of work, social reproduction, unemployment and insecure work, exhaustion and precarity, thereby calling for a rethinking of the established ideas of class, community and identity.

Road Transport and Intermodal Linkages Research Programme Safety Strategies for Rural Roads OECD,1999-05-04 Following an in-depth review of the characteristics of road crashes in rural areas, the book proposes a series of safety measures, focusing on infrastructure management, enforcement, innovative tools, such as intelligent transport systems, and trauma management.

Morality and Socially Constructed Norms Laura Valentini,2023-10-26 Observe social distancing. Tip your waiter. Give priority to the elderly. Stop at the red light. Pay your taxes. Do not chew with your mouth open. These are imperatives we face every day, imposed upon us by norms that happen to be generally accepted in our environment. Call these 'socially constructed norms'. A constant presence in our lives, these norms elicit mixed feelings. On the one hand, we treat them as valid standards of behaviour and respond to their violation with emotions such disapproval, resentment, and guilt. On the other hand, we look at them with suspicion: after all, they are arbitrary human constructs that may contribute to oppression and injustice. In light of this ambivalence, it is important to have a criterion telling us when, if ever, we are morally bound by socially constructed norms and when we should instead disregard them. *Morality and Socially Constructed Norms* systematically develops such a criterion. It traces the moral significance of those norms to the agential commitments that underpin them, and explains why those commitments ought to be respected, provided the content of the corresponding norms is consistent with independent moral constraints. The book then explores the implications of this view for three core questions in moral, legal, and political philosophy: the grounding of moral rights, the obligation to obey the law, and the wrong of sovereignty violations. *Morality and Socially Constructed Norms* shows how much progress can be made in normative theorizing when we give socially constructed norms their (moral) due.
