Anticancer Drugs from Animals, Plants, and Microorganisms George R. Pettit,Fiona Hogan Pierson,Cherry L. Herald,1994-04-27 Affords researchers ready access to a vast body of information on identifying and isolating natural anticancer agents... The authors open this valuable text/reference with an in-depth exploration of the vast potential of plant, animal, microorganism constituents as sources for new and effective anticancer, antiviral drugs. They update the literature on cancer-causing and related viruses with an emphasis on HIV. And they summarize the better known tumor promoters and carcinogens, and point out the fine line between antineoplastic and carcinogenic activity. The lion's share of the book consists of an exhaustive compilation, in tabular form, of terrestrial and marine products. The first section covers terrestrial and marine plant and animal antineoplastic and cytotoxic constituents, organized by source. Within each chapter, entries are listed in order of molecular formula. Included are the more active synthetic and some semi synthetic analogs, with indications of which modifications are most likely to be useful. Also as an aid to quick reference, indexes provide access to entries by way of compound name, molecular weight, and species name. In the second section, the authors offer an exhaustive survey of marine plant and animal products, including both those with known biological activity and those without. As in the previous section, entries are listed according to molecular formula.

Building Contract Claims and Disputes Dennis F. Turner,Alan

Turner,2014-06-11 The second edition of Building Contract Claims and Disputes (first published as Building Contract Disputes) provides a study of the causes of contractual disputes, particularly of claims in construction projects and of how they can be resolved successfully. It examines contracts, decisions, documentation and project operation from the points of view of clients, contractors, subcontractors and professional advisers. Readers in practice will find this book an invaluable and comprehensive reference. Those taking professional examinations or degree and postgraduate courses will also benefit greatly from it. The book explains the background, preparation and settlement of claims, with negotiation and dispute resolution from mediation to adjudication, arbitration and legal proceedings. The interrelations of variations, extension of time and loss and expense are considered. Three specially structured case studies of construction projects illustrate and apply the principles to detailed practical situations. This edition deals with a considerably expanded range of contracts, including JCT, GC/Works/1, design and build, minor works, ICE and innovative NEC. It covers recent legal rulings and changes in the law and contract forms, as well as parts of the Housing Grants, Construction and Regeneration Act 1996 and the Arbitration Act 1996.
