This second edition of Learning Python for Forensics illustrates how Python can be used to support these digital investigations and permits the examiner to automate the parsing of forensic artifacts to spend more time examining actionable data. The second edition of Learning Python for Forensics will illustrate how to develop Python scripts using an iterative design. Further, it demonstrates how to leverage the various built-in and community-sourced forensics scripts and libraries available for Python today. This book will help strengthen your analysis skills and efficiency as you creatively solve real-world problems through instruction-based tutorials. By the end of this book, you will build a collection of Python scripts capable of investigating an array of forensic artifacts and master the skills of extracting metadata and parsing complex data structures into actionable reports. Most importantly, you will have developed a foundation upon which to build as you continue to learn Python and enhance your efficacy as an investigator. What you will learnLearn how to develop Python scripts to solve complex forensic problemsBuild scripts using an iterative designDesign code to accommodate present and future hurdlesLeverage built-in and community-sourced librariesUnderstand the best practices in forensic programmingLearn how to transform raw data into customized reports and visualizationsCreate forensic frameworks to automate analysis of multiple forensic artifactsConduct effective and efficient investigations through programmatic processingWho this book is for If you are a forensics student, hobbyist, or professional seeking to increase your understanding in forensics through the use of a programming language, then Learning Python for Forensics is for you. You are not required to have previous experience in programming to learn and master the content within this book. This material, created by forensic professionals, was written with a unique perspective and understanding for examiners who wish to learn programming.

Critical Terms for Religious Studies Mark C. Taylor,1998-08-15 Following in the very successful tradition of Critical Terms for Literary Studies and Critical Terms for Art History, this book attempts to provide a revitalized, self-aware vocabulary with which this bewildering religious diversity can be accurately described and responsibly discussed. Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight.

**Java** Walter J. Savitch,2005 In a conversational style, best-selling author Walter Savitch teaches programmers problem solving and programming techniques with Java.Introduces object-oriented programming and important computer science concepts such as testing and debugging techniques, program style, inheritance, and exception handling. Includes thorough coverage of the Swing libraries and event-driven programming. Provides a concise, accessible introduction to Java that covers key language features. Covers objects thoroughly and early, with an emphasis on applications over applets.A useful reference for programmers who want to brush up on their Java skills.

Anticancer Drugs from Animals, Plants, and Microorganisms George R. Pettit,Fiona Hogan Pierson,Cherry L. Herald,1994-04-27 Affords researchers ready access to a vast body of information on identifying and isolating natural anticancer agents... The authors open this valuable text/reference with an in-depth exploration of the vast potential of plant, animal, microorganism constituents as sources for new and effective anticancer, antiviral drugs. They update the literature on cancer-causing and related viruses with an emphasis on HIV. And they summarize the better known tumor promoters and carcinogens, and point out the fine line between antineoplastic and carcinogenic activity. The lion's share of the book consists of an exhaustive compilation, in tabular form, of terrestrial and marine products. The first section covers terrestrial and marine plant and animal antineoplastic and cytotoxic constituents, organized by source. Within each chapter, entries are listed in order of molecular formula. Included are the more active synthetic and some semi synthetic analogs, with indications of which modifications are most likely to be useful. Also as an aid to quick reference, indexes provide access to entries by way of compound name, molecular weight, and species name. In the second section, the authors offer an exhaustive survey of marine plant and animal products, including both those with known biological activity and those without. As in the previous section, entries are listed according to molecular formula.

Building Contract Claims and Disputes Dennis F. Turner,Alan Turner,2014-06-11 The second edition of Building Contract Claims and Disputes (first published as Building Contract Disputes) provides a study of the causes of contractual disputes, particularly of claims in construction projects and of how they can be resolved successfully. It examines contracts, decisions, documentation and project operation from the points of view of clients, contractors, subcontractors and professional advisers. Readers in practice will find this book an invaluable and comprehensive reference. Those taking professional examinations or degree and postgraduate courses will also benefit greatly from it. The book explains the background, preparation and settlement of claims, with negotiation and dispute resolution from mediation to adjudication, arbitration and legal proceedings. The interrelations of variations, extension of time and loss and expense are considered. Three specially structured

case studies of construction projects illustrate and apply the principles to detailed practical situations. This edition deals with a considerably expanded range of contracts, including JCT, GC/Works/1, design and build, minor works, ICE and innovative NEC. It covers recent legal rulings and changes in the law and contract forms, as well as parts of the Housing Grants, Construction and Regeneration Act 1996 and the Arbitration Act 1996.
