Spheres of Influence in International Relations Dr Susanna Hast,2014-02-28 Current events happening around the world, especially the ‘humanitarian interventions’ by NATO and the West within the context of the so-called Arab Spring, make the understanding of the role of spheres of influence in international politics absolutely critical. Hast explores the practical implications and applications of this theory, challenging the concept by using historical examples such as suzerainty and colonialism, as well as the emergence of a hierarchical international order. This study further connects the English School tradition, post-war international order, the Cold War and images of Russia with the concept of the sphere of influence to initiate debate and provide a fresh outlook on a concept which has little recent attention.

The Reshaping of China-Southeast Asia Relations in Light of the COVID-19 Pandemic Nian Peng,2021-01-28 This book aims to examine the multiple effects of the COVID-19 pandemic on China-Southeast Asia relations from both Chinese and Southeast Asian perspectives. It invites many officials and scholars from the leading think-tanks and famous universities in China and Southeast Asian states to contribute and tries to reveal how has China-Southeast Asia relations been reshaping during/after the COVID-19 pandemic and discuss what kind of measures could be taken to push forward China-Southeast Asia relations and thus ensuring the peace and prosperity in the region. The main content of this book is divided into 10 parts, in which the first chapter briefly introduces the COVID-19 situation in China and Southeast Asia, China’s anti-COVID efforts, and the impacts of the COVID-19 on China-Southeast Asia relations from Chinese and Southeast Asian perspectives. Chapter 2 examines the dual influence of the pandemic on the construction of China-ASEAN community of a shared future and gave some useful policy recommendations on improving China-Southeast Asia relations. The following 8 chapters go deep into the Southeast Asian states’ response to COVID-19 and the economic, political and social effects of the COVID-19 on Southeast Asia-China relations, and look forward the future development of such relations. In addition, it also analyzes Southeast states’ reactions to the intense Sino-US power rivalry during/after the COVID-19 pandemic. This book is probably the first comprehensive study that investigates the impacts of the COVID-19 pandemic on China-Southeast Asia relations from both Chinese and Southeast Asian perspectives. It would not only open up a new area of study on China and Southeast Asia relations, but provide insightful observations and useful information for governments, companies and social organizations to facilitate cooperation in trade and investment, public health, and people-to-people exchanges. Therefore, the intended readership not only includes the academics but also officials, businessmen, journalists and social activists. The most important feature of this book is that it points out China-Southeast Asia relations would be reshaped by COVID-19 in the long run and analyzes how it would be reshaped. It also shows a well-balanced view on the COVID-19 and China-Southeast Asia relations as both university scholars, think-tank experts and government officials are involved in this book.

Stress And Its Relationship To Health And Illness Linas A Bieliauskas,2019-06-26 To discuss the relationship between stress and health status, it is first necessary to define the term stress. This is not a mundane issue, because the term stress is popularly used to refer to a wide range of physiological changes, psychological states, and environmental pressures in the health/illness literature. Stress was first described as a biological syndrome by Selye (1936, p. 32): Experiments on rats show that if the organism is severely damaged by acute non-specific nocuous agents such as exposure to cold, surgical injury, production of spinal shock ... a typical syndrome appears, the symptoms of which are independent of the nature of the damaging agent ... and represent rather a response to damage as such.

Power and Inequality in Interpersonal Relations Eric Beasley,2017-09-08 This book explores interpersonal situations in which weak or vulnerable people find themselves and the ways in which others help create, sustain, and eradicate such social dynamics. Vladimir Shlapentokh and Eric Beasley demonstrate that people can gain power over each other and then abuse this power because of unequal resource conditions. The authors define resources as the means necessary for satisfaction or achievement of needs or goals, such as wealth, physical strength, intellectual capacity and information, sexual attractiveness, and status. This volume is different from existing social science books on inequality and vulnerability, which address relations between people of different social positions, races, genders, ages, and places of residence confronting each other in political, economic, and cultural battles. This book focuses on people who become the victims of those whom they know personally-relatives, colleagues, neighbors. The authors argue that unequal resource distribution among members of social units is the main cause of conflict and ultimately creates situations where members of a social unit can abuse other members of the same unit.

Controlled Natural Language Norbert E Fuchs,2010-07-06 Controlled natural languages (CNLs) are subsets of natural languages, obtained by - stricting the grammar and vocabulary in order to reduce or eliminate ambiguity and complexity. Traditionally, controlled languagesfall into two major types: those that - prove readability for human readers, and those that enable reliable automatic semantic analysis of the language. [. . .] The second type of languages has a formal logical basis, i. e. they have a formal syntax and semantics, and can be mapped to an existing formal language, such as ?rst-order logic. Thus, those languages can be used as knowledge representation languages, and writing of those languages is supported by fully au- matic consistency and redundancy checks, query answering, etc. Wikipedia Variouscontrollednatural languagesof the second

type have been developed by a number of organizations, and have been used in many different application domains, most recently within the Semantic Web. The workshop CNL 2009 was dedicated to discussing the similarities and the differences of existing controlled natural languages of the second type, possible improvements to these languages, relations to other knowledge representation languages, tool support, existing and future applications, and further topics of interest.

Bryophyte Ecology A. Smith, 2012-12-06 There has been an increasing interest in bryophyte ecology over the past 100 or so years, initially of a phytosociological nature but, additionally, in recent years, of an experimental nature as well. Early studies of bryophyte communities have led to detailed investigations into the relationships between the plants and their environment. Ecological papers, the large number of which is evidenced by the length of the bibliographies in the subsequent chapters, have appeared in numerous journals. Yet, apart from review chapters, by H. Gams and P. W. Richards in *Manual of Bryology*, edited by H. Verdoorn in 1932 and chapters in E. V. Watson's *Structure and Life of Bryophytes*, Prem Puri's *Bryophytes - A Broad Perspective* and D. H. S. Richardson's *The Biology of Mosses*, published in 1972, 1973 and 1981 respectively, no general accounts of bryophyte ecology have been published. Although the Bryophyta is a relatively small division of plants, with between 14000 and 21000 species the interest that they have aroused is out of all proportion to the size either of the plants or of the division. It is evident, however, that despite their relative insignificance they play an important ecological role, especially in extreme environments and, in the case of bryophytes in tropical cloud forests and of Sphagnum, may even be a dominant factor in the ecology of the area concerned.
