Como Os Políticos Enriquecem Em Portugal Sérgio Azenha, 2012-02-27 Os casos de 15 ex-governantes que multiplicaram os rendimentos depois de saírem do Governo Os ministros e secretários de Estado em Portugal ganham menos de 6.000 euros mensais. Mas depois de saírem do Governo, muitos passam para empresas tuteladas pelo Estado onde os salários duplicam, triplicam, quadruplicam... Essa transferência milionária dos políticos para a esfera empresarial é legal face a um quadro legislativo permissivo. Mas será eticamente correcta? A passagem pelo Governo, em demasiados casos, não será apenas um trampolim para a riqueza? Como os Políticos Enriquecem em Portugal dá-nos a conhecer uma amostra representativa. Desde 1995, os rendimentos da classe podem ser consultados no Tribunal Constitucional, e há casos em que os aumentos rondaram os 3.000 por cento - o que equivale a, por exemplo, ganhar cerca de 22.000 € anuais antes de entrar no Governo e perto de 700.000 € anuais depois de sair. Num trabalho de enorme rigor, António Sérgio Azenha dá-nos a conhecer o percurso de 15 casos emblemáticos. Com todos os factos, números, percursos profissionais - que afinal parecem ser apenas um, tal a perturbante semelhança entre eles.

Excellence in Teaching and Learning in Higher Education Isabel Huet, Teresa Pessoa, Fátima Sol, 2021 The initial 'idea' for the book emerged during the seminar Sharing of Innovative Pedagogical Practices that occurred at the University of Coimbra (Portugal) in 2018. Like all 'good ideas', this one

originated in a conversation between colleagues from the University of Coimbra and the University of West London in the United Kingdom. The 'idea' of this book was to move away from sharing experiences related to teaching and learning in higher education in just one or two countries, but instead to organise a more European view about the policy, research and teaching practices that are shaping the way our students learn, academics teach and do research. We have a total of 16 chapters from academics in Portugal, the United Kingdom, Ireland, Sweden, the Netherlands, Spain, Italy, and the Czech Republic. The book is organised in four interrelated themes: (1) policy and quality; (2) professionalisation of teaching and academic development; (3) research and teaching nexus; and (4) pedagogy and practice. Enjoy reading the book!

Circular Economy, Ethical Funds, and Engineering Projects Foteini Konstantakopoulou, Ioannis Nikolaou, Konstantinos P. Tsagarakis, 2020 This special issue provides a collection of 15 papers with modern theories and applications for circular economy, engineering projects, entrepreneurship models, and investor decisions. After the commencing review on Occupational Health and Safety Management-Systems Standards, follow papers which can be classified into four categories which cover the overall scope of special issue. The first category includes papers regarding the micro-level of circular economy. This means case studies in firm-level which implement different techniques to achieve sustainable development and circular economy

goals. The findings reveal interesting achievements which are associated with cultural characteristics of the countries these case studies have been conducted. The second category of papers refers to the meso-level of circular economy where firms cooperate with each other by exchanging byproducts and organizing common operational procedures and routines to address environmental problems. The findings suggest assessment information technology tools to support industrial symbiosis among European firms. The next body of literature encompasses macro-level where circular economy techniques are implemented at a country level. Findings suggest methodologies for implementing and tracking circular economy in cities. Finally, a number of papers are included that focus on advanced engineering techniques. These techniques are useful tools for achieving circular economy and sustainability.

Hanging Out, Messing Around, and Geeking Out, Tenth Anniversary Edition
Mizuko Ito, Sonja Baumer, Matteo Bittanti, Danah Boyd, Rachel Cody, 2019-09-24 The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. Hanging Out, Messing Around, and Geeking Out, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents

a flexible and useful framework for understanding the ways that young people engage with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, *Hanging Out, Messing Around, and Geeking Out* combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.

Inequality and Development Challenges Maria Clara Couto Soares, Mario Scerri, Rasigan Maharajh, 2018-10-24 This series of books brings together results of an extensive research programme on aspects of the national systems of innovation (NSI) in the five BRICS countries – Brazil, Russia, India,

China, and South Africa. It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies. In discussing the impact of innovation with respect to economic, geopolitical, socio-cultural, institutional, and technological systems, it reveals the possibilities of new development paradigms for equitable and sustainable growth. This volume analyses the co-evolution of inequality and NSI across the BRICS economies. It reveals the multi-dimensional character of inequality, in going beyond its income aspect to include assets, access to basic services, infrastructure, knowledge, race, gender, ethnicity and geographic location. In advancing valuable policy recommendations, the book argues that inequalities must be factored in development strategies given that benefits of innovation are not automatically distributed equally. Original and detailed data, together with expert analyses on wide-ranging issues, make this book an invaluable resource for researchers and scholars in economics, development studies and political science, in addition to policy-makers and development practitioners interested in the BRICS countries.

Design Management Brigitte Borja de Mozota, 2003-08 Providing a synthesis of practical blueprint and theoretical field guide to managing design, this comprehensive reference shows how the various disciplines of design - product, packaging, graphic and environmental - create value and contribute to company performance.

Student Mobility and Narrative in Europe Elizabeth Murphy-Lejeune,2003-08-29 Bringing together case studies and theory, this book is the first in-depth qualitative study of student migration within Europe. Drawing on the theory of 'the stranger' as a sociological type, the author suggests that the travelling European students can be seen as a new migratory elite. The book presents the narratives of travelling students, explains their motivations, the effects of movement into a new social and cultural context, the problems of adaptation, and describes the construction of social networks, and the process of adaptation to new cultures.

Water Utility Benchmarking Sanford Berg, 2010-03-31 Benchmarking is essential for those developing and implementing water policy. If decision-makers do not know where they have been or where they are, it would seem to be impossible to set reasonable targets for future performance. Information on water/sewerage system (WSS) operations, investments, and outputs is essential for good management and oversight. This book is designed to help decision makers identify the data required for performance comparisons over time and across water utilities, to understand the strengths and limitations of alternative benchmarking methodologies, and to perform (or commission) benchmark studies. This book provides an overview of the strengths and limitations of different methodologies for making performance comparisons

over time and across water utilities (metric benchmarking). In addition, it identifies ways to determine the robustness of performance rankings. Current benchmarking activities in Latin America, Asia, Africa, Central Europe/Asia, and OECD nations are summarized. Five basic approaches to benchmarking characterize current studies: Core indicators and a summary or overall performance Indicator (partial metric method), Performance scores based on production or cost estimates ("total" methods), Performance relative to a model company (engineering approach), Process benchmarking, and Customer survey benchmarking. This volume is of interest to the water professionals, water utility managers and senior staff of regulatory agencies, professionals in related government agencies, and consultants. Attracting Foreign Direct Investment Into Infrastructure Frank Sader, 2000

FIAS Occasional Papers no. 12. During the early 1990s, the Foreign Investment Advisory Service (FIAS), a joint facility of the World Bank and the International Finance Corporation (IFC), found that governments and foreign investors alike were concerned and frustrated about difficulties in successfully implementing private infrastructure projects. Governments were trying to attract these new types of investment without having established an appropriate policy framework. Therefore, there were no institutional structures to resolve impediments effectively and provide clear guidelines for the award of such large-scale projects. Legal frameworks tended to address traditional public-sector responsibilities and not investor concerns. Regulatory environments either did not exist or did not provide investors enough guarantees that their future operating environment would be sufficiently reliable. Consequently, FIAS has been advising many governments in the developing world on the best way to establish a policy framework attractive to foreign investors. FIAS typically combines its review of the institutional, legal and regulatory

environment with investor roundtables and workshops for senior government officials to ensure that all the major concerns of both the government and the private sector are taken into account. Although each country has unique policy problems, FIAS has encountered common features in key areas that pose stumbling blocks for private infrastructure investments. This study synthesizes this experience and derives lessons for facilitating and encouraging foreign direct investment in infrastructure.

This book takes stock after a year of application of the SRM and examines the situation from various perspectives: the perspective of the SRB, the NRA, the supervised bank and judicial protection. Special attention is given to the division of power between the RB and the NRA and the impact on the supervised bank, the relationship and links between the SRM and the SSM and the query whether the right balance between national and supranational powers has been struck, also in view of the principle of subsidiarity.
