Brian Eno Eric Enno Tamm,1995-08-22 Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

Los Angeles Magazine ,2003-11 Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

Luxury Arts of the Renaissance Marina Belozerskaya,2005-10-01 Today we associate the Renaissance with painting, sculpture, and architecture—the “major” arts. Yet contemporaries often held the “minor” arts—gem-studded goldwork, richly embellished armor, splendid tapestries and embroideries, music, and ephemeral multimedia spectacles—in much higher esteem. Isabella d’Este, Marchesa of

Mantua, was typical of the Italian nobility: she bequeathed to her children precious stone vases mounted in gold, engraved gems, ivories, and antique bronzes and marbles; her favorite ladies-in-waiting, by contrast, received mere paintings. Renaissance patrons and observers extolled finely wrought luxury artifacts for their exquisite craftsmanship and the symbolic capital of their components; paintings and sculptures in modest materials, although discussed by some literati, were of lesser consequence. This book endeavors to return to the mainstream material long marginalized as a result of historical and ideological biases of the intervening centuries. The author analyzes how luxury arts went from being lofty markers of ascendancy and discernment in the Renaissance to being dismissed as “decorative” or “minor” arts—extravagant trinkets of the rich unworthy of the status of Art. Then, by re-examining the objects themselves and their uses in their day, she shows how sumptuous creations constructed the world and taste of Renaissance women and men.

The Spell of the Sensuous David Abram, 2012-10-17 Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as inanimate. How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to

recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

Creating the Productive Workplace Derek Clements-

Croome, 2006-08-21 A new edition of a classic title, featuring updated and additional material to reflect today's competitive work environments, contributed by a team of international experts. Essential for anyone involved in the design, management and use of work places, this is a critical multidisciplinary review of the factors affecting productivity, as well a practical solutions manual for common problems and issues.

Feet First Laura Norman, 1988-11-15 Argues that the healing powers of the body can be tapped by applying pressure to the feet, and discusses the practice of reflexology.

The War on Normal People Andrew Yang, 2018-04-03 The New York Times bestseller from CNN Political Commentator and 2020 former Democratic presidential candidate Andrew Yang, this thought-provoking and prescient call-to-action outlines the urgent steps America must take, including Universal Basic Income (UBI), to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of

unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income-and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls human capitalism.

With a Little Help Cory Doctorow,2015-07-16 *With a Little Help* is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. *With a Little Help* consists of 12 stories, all reprints except for *Epoch* (commissioned by Mark Shuttleworth).

How the Body Shapes the Way We Think Rolf Pfeifer,Josh Bongard,2006-10-27 An exploration of embodied intelligence and its implications points toward a theory of intelligence in general; with case studies of intelligent systems in ubiquitous computing, business

and management, human memory, and robotics. How could the body influence our thinking when it seems obvious that the brain controls the body? In *How the Body Shapes the Way We Think*, Rolf Pfeifer and Josh Bongard demonstrate that thought is not independent of the body but is tightly constrained, and at the same time enabled, by it. They argue that the kinds of thoughts we are capable of have their foundation in our embodiment—in our morphology and the material properties of our bodies. This crucial notion of embodiment underlies fundamental changes in the field of artificial intelligence over the past two decades, and Pfeifer and Bongard use the basic methodology of artificial intelligence—understanding by building—to describe their insights. If we understand how to design and build intelligent systems, they reason, we will better understand intelligence in general. In accessible, nontechnical language, and using many examples, they introduce the basic concepts by building on recent developments in robotics, biology, neuroscience, and psychology to outline a possible theory of intelligence. They illustrate applications of such a theory in ubiquitous computing, business and management, and the psychology of human memory. Embodied intelligence, as described by Pfeifer and Bongard, has important implications for our understanding of both natural and artificial intelligence.

Out Of Control Kevin Kelly, 2009-04-30 *Out of Control* chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

How to Avoid the Superwoman Complex MD C Nicole Swiner, 2014-12-29 This book provides an insightful, sometimes humorous guide to help abolish the notion that you have to be Superwoman in order for your life to matter. The idea of being all

things to all people could be at least part of the reason why you are not truly happy and healthy. The goal of this book is to help you truly examine the elements in your life that serve as stressors disguised as necessary evils. Let's face it-many of the evils we manage on a day-to-day basis are not necessary. Once you have identified the challenges, the next step is to determine how to work around, get over, go through simply ignore them-all for the greater good; a healthier, happier you.

The Rabbit Who Wants to Fall Asleep Carl-Johan Forssén Ehrlin, 2014-04-08 The magical book that will have your kids asleep in minutes. —The New York Post This groundbreaking #1 international bestseller is sure to calm racing minds and make bedtime easy and fun for kids and parents! Setting the Table Danny Meyer, 2009-10-13 The bestselling business book from award-winning restaurateur Danny Meyer, of Union Square Cafe, Gramercy Tavern, and Shake Shack Seventy-five percent of all new restaurant ventures fail, and of those that do stick around, only a few become icons. Danny Meyer started Union Square Cafe when he was 27, with a good idea and hopeful investors. He is now the co-owner of a restaurant empire. How did he do it? How did he beat the odds in one of the toughest trades around? In this landmark book, Danny shares the lessons he learned developing the dynamic philosophy he calls Enlightened Hospitality. The tenets of that philosophy, which emphasize strong in-house relationships as well as customer satisfaction, are applicable to anyone who works in any business. Whether you are a manager, an executive, or a waiter, Danny’s story and philosophy will help you become more effective and productive, while deepening your understanding and appreciation of a job well done. *Setting the Table* is landmark a motivational work from one of our era’s most gifted and insightful business leaders.

The Awakened Mind Cecil Maxwell Cade, 1989 Shows how biofeedback is much more effective when combined with meditation through relevant exercises, skills, and sensory sequences.

The Long Tail Chris Anderson, 2006-07-11 What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? The Long Tail is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of

unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

Reinventing the Wheel Peter D. Hershock, 1999-07-23 Suggests that certain Buddhist notions may act as an antidote to the adverse effects of high-tech media.

The Sleep Fix Diane Macedo, 2021-12-14 From renowned ABC News anchor/correspondent and former insomniac Diane Macedo, comes a practical, user-friendly guide to getting better sleep. The Sleep Fix flips the switch on common advice, illuminating the reporter's relentless search for how to get a good night's sleep and the surprising, scientific, and practical solutions she found along the way. Roughly thirty percent of the population is estimated to be living with insomnia, while many more unknowingly suffer from other sleep disorders. In *The Sleep Fix*, Macedo aims to change that with

perspective-shifting research and easy-to-implement solutions based not just on science and experts, but also her own years-long struggle. As an early-morning reporter and overnight news anchor, Macedo learned the hard way how valuable sleep is, and how it affects everything from our heart to our brain to our immune system. The longer Macedo struggled, the more her health deteriorated. Desperate, she tried standard sleep tip after standard sleep tip, but nothing worked - instead, it made her worse. Finally, after developing a tolerance to sleeping pills, Macedo decided to attack the problem as a journalist, interviewing sleep experts from all over the world to get to the bottom of what really keeps us from sleeping—and the various ways to fix it. As Macedo explains, the solution to catching zzz's isn't as simple as giving up caffeine, or putting away your phone before bed. With her down-to-earth explanations and humor, she instead teaches us how to:

- Understand sleep biology
- Identify sleep obstacles
- Flag sleep myths and separate fact from fiction
- Try counterintuitive approaches
- Shift our mindset

Most importantly, Macedo — a busy, working mom — teaches us how to adjust and fit these solutions into our everyday lives. Offering expert wisdom, cutting-edge research, intimate sleep stories from public figures, and actionable advice, *The Sleep Fix* is the tell-it-like-it-is guide this sleep-deprived world has been waiting for.

2Fish Jhené Aiko Efurú Chilombo, 2017-12-19 Grammy-nominated singer/songwriter Jhené Aiko Efurú Chilombo has developed and refined a method of emoting through writing. *2Fish* is a collection of intimate poems (and a few short stories) written by Chilombo from adolescence to adulthood, in no particular order. The book details Chilombo's thoughts in their most raw and honest form taken directly from a collection of notebooks she has kept since age 12.

Brands of Faith Mara Einstein, 2007-09-14 In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. *Brands of Faith* argues that in order to compete effectively faiths have had to become brands – easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections. Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism – good and bad. Repackaging religion – updating music, creating teen-targeted bibles – is justifiable and necessary. However, when the content becomes obscured, religion may lose its unique selling proposition – the very ability to raise us above the market.

Virtual Geography McKenzie Wark, 1994-11-22 The author's capacity to grasp and interpret these [world media] events is astounding, and her ability to provide insights into a world where unbounded information is circling the earth with the speed of light is startling. -- Choice ... a wide-ranging, quirky and dextrous mix of description, theory and analysis, that documents the perils of the global telecommunications network... -- Times Literary Supplement ... this is a stimulating, even moving, book, dense with ideas and with many quotable lines. -- The New Statesman Wark is one of the most
