*Security and Privacy in Communication Networks* Noseong Park, Kun Sun, Sara Foresti, Kevin Butler, Nitesh Saxena, 2020-12-11 This two-volume set LNICST 335 and 336 constitutes the post-conference proceedings of the 16th International Conference on Security and Privacy in Communication Networks, SecureComm 2020, held in Washington, DC, USA, in October 2020. The conference was held virtually due to COVID-19 pandemic. The 60 full papers were carefully reviewed and selected from 120 submissions. The papers focus on the latest scientific research results in security and privacy in wired, mobile, hybrid and ad hoc networks, in IoT technologies, in cyber-physical systems, in next-generation communication systems in web and systems security and in pervasive and ubiquitous computing.

*Machines, Computations, and Universality* Maurice Margenstern, Yurii Rogozhin, 2003-06-29 In the first part of the present volume of LNCS, the reader will find the invited talks given at the MCU 2001 conference. In the second part, he/she will find the contributions that were presented at the conference after selection. In both cases, papers are arranged in the alphabetical order of the authors. MCU 2001 is the third conference in theoretical computer science, Machines, computations and universality, formerly, Machines et calculs universels. Both previous conferences, MCU'95 and MCU'98, were organized by Maurice Margenstern in Paris and in Metz (France), respectively. From the very beginning, MCU conferences have been an international scientific event. For the third conference, in order to stress that aspect, it was decided to hold it outside France. Moldova was chosen thanks to the close cooperation between the present chairmen of MCU 2001. MCU 2001 also aims at high scientific standards. We hope that the present volume will convince the reader that the tradition of previous conferences have been upheld by this one. Cellular automata and molecular computing are well represented in this volume. And this is also the case for quantum computing, formal languages, and the theory of automata. MCU 2001 does not fail its tradition of providing our community with important results on Turing machines.

The papers are organized in topical sections on cryptosystems, algorithms, primitives; security and privacy in networked systems; system and network security; steganography, visual cryptography, image forensics; applications security.

**Oracle SQL Tuning with Oracle SQLTXPLAIN** Stelios Charalambides, 2013-04-13 Oracle SQL Tuning with SQLTXPLAIN is a practical guide to SQL tuning the way Oracle's own experts do it, using a freely downloadable tool called SQLTXPLAIN. Using this simple tool you'll learn how to tune even the most complex SQL, and you'll learn to do it quickly, without the huge learning curve usually associated with tuning as a whole. Firmly based in real world problems, this book helps you reclaim system resources and avoid the most common bottleneck in overall

performance, badly tuned SQL. You'll learn how the optimizer works, how to take advantage of its latest features, and when it's better to turn them off. Quickly tune any SQL statement no matter how complex. Build and tune test cases without affecting production. Use the latest tuning features with confidence.

**Manual of Pharmacologic Calculations** Ronald Tallarida, Rodney B. Murray, 1984-07-30 This book provides a collection of quantitative procedures in common use in we selected may be pharmacology and related disciplines. The procedures considered core since it is likely that all scientists who work with drugs will use these procedures at some time or another. By excluding very specialized topics, we managed to keep the size of the book small. thus making it handy reference-a handbook in the true sense. for quick Since many scientists and students now have access to electronic computers, of lower cost microcomputers is likely to increase com and since the advent we also included a computer program for each puter availability even further, procedure. \* The user need not know computer programming since all necessary information needed to run the programs is included here. The manual is divided into two parts. In the first, the pharmacologic basis for the calculation is briefly stated for each of the procedures (numbered 1 through 33). Then the appropriate equations (formulas) are given and an example of each calculation is provided. For each procedure, the discussion of theory and illustration of the calculation are brief and self-contained. With the tables in the Appendix and a pocket calculator, all of the calculations can be done without reference to any other source. It is recommended that the pro cedure and sample calculation be read and understood before going to the automated magic of the computer program in Part II.

*Three Dimensions* A. Treffers, 2012-12-06 In Dutch WISKOBAS stands for a particular kind of mathematics in the elementary school (ages 6-12). In tum Wiskobas was one of the depart ments in the IOWO, the Institute for the Development of Mathematics Education. This institute was concerned with the development of material for mathematics education as well as the related research on the possibility of change from the then existing

arithmetic instruction to the future mathematics education. The present publication Three Dimensions has three aims: to give a picture of the goals Wiskobas set for future mathematics education, at the same time to show how such goals can be described, and to show the theoretical framework of the Wiskobas curriculum. The problem at hand is not at all simple. What is more, Wiskobas' ideas about mathematics education cannot literally be translated into strings of words. So how can we face the accusation that our objectives are unattainable and the goal itself irrational? In order to avoid this vagueness as much as possible and for the sake of clarity, this book makes continuous use of illustrations of mathematics education. In these examples both the subject-matter and the methods of description of the goals are illustrated as explicitly as possible, while at the same time creating the opportunity to read between the lines. The reader is urged to follow carefully the mathematical material at the start of each chapter. This advice applies both to the more general education oriented, and to the more mathematical! didactical reader.

**Lilavai** Kouhala,2021-01-05 The Prakrit romance *Lāilāvaāi*, an early ninth-century poem attributed to Kouhala and set in modern-day coastal Andhra Pradesh, is the most celebrated work in the genre. Complexly narrated in the alternating voices of its heroines and heroes and featuring a cast of semi-divine and magical beings, it centers on three young women: *Lāilāvaāi*, princess of Sinhala (today's Sri Lanka); her cousin Mahanumai, princess of the mythical city Alaka; and Kuvalaavali, Mahanumai's adopted sister. Following a prophecy that *Lāilāvaāi*'s husband will rule the earth, the princess happens upon a portrait of King Hala of Pratishthana and immediately falls in love. While journeying to meet him, she hears her cousins' tales of their lost loves, and then vows not to marry until they are reunited. To win *Lāilāvaāi*'s hand, King Hala journeys to the underworld, faces monsters, and overcomes armies. *Lāilāvaāi* explores themes of karma and female desire, notably privileging women as storytellers. A new edition of the Prakrit text, presented in the Devanagari script, accompanies a new English prose translation--

*The Dose-Response Relation in Pharmacology* Ronald J. Tallarida,Leonard S. Jacob,2012-12-06 This book is designed to meet the modern need for a better understanding of drug-receptor interaction as applied to the gathering and interpretation of dose-response data. It is an introduction suitable for any student who has had a first course in

pharmacology. This book is an extension of the pharmacology course into one area of what is now known as molecular pharmacology. The material included is an outgrowth of courses that we have given in recent years to health-science students in several professional schools and universities. The area of drug-receptor theory, although just a part of molecular pharmacology, is already very broad. One major line of investigation is concerned with the chemical and structural nature of specific receptors and with efforts to isolate specific receptors. Another line of investigation is concerned with the kinetic theories of drug-receptor interaction, the effort there being to provide a general theory that is applicable to wide classes of drugs. We have chosen to deal with the latter. There are several reasons for our choice of topics. First, the information is very practical; that is, it permits one to use properly and consistently terms such as efficacy, partial agonist, pure antagonist, potency,  $pA_2$  etc., when describing drug action. Second, many students fail to appreciate the differences in and the limitations of the various theories, beginning with the classical theory of A. J. Clark, on up to the very recent allosteric theories.

**Scornflakes** Attila (the Stockbroker),1992 Attila the Stockbroker has travelled the world for ten years, taking his highly individual, fiery cocktail of energetic performance poetry, hardcore minimalist folk-rock anthems (accompanied by his trusty mandola, Nelson) and surreal political satire from Shoreham Harbour to Sydney Harbour, from Harlow to Helsinki, via Leipzig, Vancouver, Auckland, Amsterdam and Tirana - not to mention Slough! Scornflakes is Attila's second book of poems, the follow-up to 1985's Cautionary Tales for Dead Commuters... Inspiration by Hilaire Belloc. Clothes sense by The Levellers. Holder of a poetic licence for a minstrel cycle,

Attila's other interests include lugworms, cultivating coriander plants and 'attempting to control the growth of other vegetables, especially Tory C2s'. In Britain, Attila has done substantial work for The Guardian and Radio Four, written for the music press (ha!) and even stranger publications, and made considerable numbers of sporadic and often unlikely radio and TV appearances from John Peel to Pebble Mill. He's a regular at events such as the Edinburgh Fringe and Glastonbury Festival, and performs at every conceivable type of venue - arts centres, rock gigs, poetry festivals, comedy clubs... He has released five LPs in the UK - most recently Scornflakes and Donkeys' Years - and has also had albums issued in Canada, Australia, New Zealand and Germany. His most recent release is an Antipodean CD called 668 - Neighbour of the Beast. Scornflakes is illustrated with cartoons by Womble.
