The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled *The Last Lecture*. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been

diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Asylum-Seeking Journeys in Asia Terence Chun Tat Shum, 2019-02-14 This book looks in detail at the journeys to asylum in Asia which are largely neglected in the media and academic analyses, despite Asia becoming the most essential region for asylum, receiving refugees from both within and outside of the continent. Treating asylum-seeking journeys as a transnational space, the author investigates the actual asylum-seeking process from homelands to either Hong Kong or Bangkok. Today, refugees undertake multiple, long, and life-threatening journeys before arriving in receiving societies; from the moment of arrival in Hong Kong or Bangkok, they face a wide array of challenges. An ethnographic account of how refugees navigate and negotiate their journeys to asylum, this book highlights the social, political, economic, and psychological processes involved in becoming and being a refugee. This encompasses not only the physical movement of refugees, but also their embodiments and emotional encounters. The author offers a micro-level analysis of asylum-seeking journeys - from the aspiration to flee, to migration preparation, to border crossing, to homemaking in prolonged displacement. All of these stages reveal how these journeys create ever-evolving realities with new constellations of options and constraints. By focusing on refugees' understanding, perception of, and interaction with the people, environments, and situations around them, this book illustrates how refugee life plans are shaped and reshaped by the embodied experience of their journeys, and how their ideas of home have changed over time. Asylum-seeking Journeys in Asia will appeal to scholars and students in the fields of migration and refugee studies, diaspora studies, globalisation, and Asian studies. It will also be of interest to policymakers and humanitarian workers involved in providing services and assistance to the global refugee population.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Stopping a dangerous Revolution Stuart Miller,2022-05-22 I provide an in-depth, analytical, and philosophical explanation of why specific cultural and social issues exist. With each topic, I discuss what it is, give examples for each, and break down each example providing more detail of just some of the possible reasons as to why people do them (possible mentalities). I also give some of my own experiences and everything discussed in this book, I have personally witnessed and or have gone thru. I included the following: * Situations based on personal experience and or witnessing them, with some online research to support specific issues. * My perception, perspective, and mentality on various issues that affects everyone to some degree * Quotes that further support certain chapter topics * Philosophies, analogies, and comparisons to provide better contextual clarification on certain issues * Detailed breakdown of the examples provided within each chapter * Explanation of what it will take to help fix each of these issues * Some of the many possible reasons why people behave the way they do and some of the possible motives, intentions, and life experiences from both sides (the person doing the behavior and the person receiving the treatment) * Solutions to all the topics that are discussed (changes that we need to make with how we think and act towards others) Furthermore, I provide much thought-provoking material to challenge the way we think and view society, in ways you might not have considered. I discuss many unhealthy mentalities and behaviors which is damaging to people on a much larger scale and it's having a much greater influence on others both directly and indirectly in ways that we do not even realize. This book is something the whole world needs to read and here is why: * Providing solutions to some of the biggest cultural and social issues which have existed for far too long * The way the world is with how we treat others is badly broken and some of the solutions are in this book which the world needs the solutions I provide * We do the same or similar behaviors towards others expecting different results and this is not working at all * We need to step outside our comfort zone by changing their behaviors in ways we're not used to doing (to get something you've never had, you must first do something that you've never done) * The world needs to be less close-minded and use less tunnel vision (the mind is like a parachute, it can't work if it's not opened) I see the world differently, and the purpose of this book is to share different ways of looking at situations and the numerous possibilities to take into consideration. I share my perception and perspective, viewpoint, mentality, and some of my own philosophies. I provide a more in-depth perspective of looking at a variety of life situations and the possible reasons why people choose to treat others the way they do. I think a lot of people might find this content in general interesting, beneficial, inspiring, and or even life-changing.
