Remote Jason Fried,David Heinemeier Hansson,2013 For too long our lives have been dominated by the 'under one roof' Industrial Revolution model of work. That era is now over. There is no longer a reason for the daily roll call, of the need to be seen with your butt on your seat in the office. The technology to work remotely and to avoid the daily grind of commuting and meetings has finally come of age, and bestselling authors Jason Fried and David Heinemeier Hansson are the masters of making it work at tech company 37signals. Remote working is the future - and it is rushing towards us. Remote: Office Not Required combines eye-opening ideas with entertaining narrative. It will convince you that working remotely increases productivity and innovation, and it will also teach you how to get it right - whether you are a manager, working solo or one of a team. Chapters include: 'Talent isn't bound by the hubs', 'It's the technology, stupid', 'When to type, when to talk', 'Stop managing the chairs' and 'The virtual water cooler'. Brilliantly simple and refreshingly illuminating this is a call to action to end the tyranny of being shackled to the office.

Making International Institutions Work Ranjit Lall, 2023-02-28 International institutions are essential for tackling many of the most urgent challenges facing the world, from pandemics to humanitarian crises, yet we know little about when they succeed, when they fail, and why. This book proposes a new theory of institutional performance and tests it using a diverse array of sources, including the most comprehensive dataset on the topic. Challenging popular characterizations of international institutions as 'runaway bureaucracies,' Ranjit Lall argues that the most serious threat to performance comes from the pursuit of narrow political interests by states – paradoxically, the same actors who create and give purpose to institutions. The discreet operational processes through which international bureaucrats cultivate and sustain autonomy vis-à-vis governments, he contends, are critical to making institutions 'work.' The findings enhance our understanding of international cooperation, public goods, and organizational behavior while offering practical lessons to policymakers, NGOs, businesses, and citizens interested in improving institutional effectiveness.
