**Advances in Ready Mixed Concrete Technology** Ravindra K. Dhir OBE, 2013-09-03 Advances in Ready Mixed Concrete Technology contains the proceedings of the first International Conference on Ready-Mixed Concrete held at Dundee University in Scotland from September 29 to October 1, 1975. Contributors focus on the significant progress that has been made in ready mixed concrete technology. Some practices are highlighted along with possible areas for research. This text is organized around seven themes; the first of which deals with plant and equipment.

Production methods and their development in the ready mixed concrete industry are reviewed, along with developments in batching plant and equipment to meet the needs of the ready mixed concrete industry. The chapters that follow explore the materials used in making concrete, properties of fresh and hardened concrete, mix design and quality control, and transportation and placing. The final section discusses the economics of ready mixed concrete, with emphasis on the cost of placing concrete by pump and the relative economics of alternative materials in Portland cement concrete. This book will be of interest to ready mixed concrete producers, their customers in the construction industry, and their suppliers of concrete materials, plant, and equipment.

National Association of Broadcasters Engineering Handbook

Graham A. Jones, National Association of Broadcasters, David H. Layer, Thomas G. Osenkowsky, 2007 The NAB Engineering Handbook provides detailed information on virtually every aspect of the broadcast chain, from news gathering, program production and postproduction through master control and distribution links to transmission, antennas, RF propagation, cable and satellite. Hot topics covered include HD Radio, HDTV, 2 GHz broadcast auxiliary services, EAS, workflow, metadata, digital asset management, advanced video and audio compression, audio and video over IP, and Internet broadcasting. A wide range of related topics that engineers and managers need to understand are also covered, including broadcast administration, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management, and engineering management. Basic principles and the latest technologies and issues are all addressed by respected professionals with first-hand experience in the broadcast industry and manufacturing. This edition has been fully revised and updated, with 104 chapters and over 2000 pages. The Engineering Handbook provides the single most comprehensive and accessible resource available for engineers and others

working in production, postproduction, networks, local stations, equipment manufacturing or any of the associated areas of radio and television. \* An National Association of Broadcasters official publication \* Over 100 industry leaders combine their knowledge and expertise into one comprehensive reference \* Completely revised to add many new technologies such as HDTV, Video over IP, and more

*Women and Dieting Culture* Kandi M. Stinson,2001 Commercial weight loss organizations have come under attack from feminist scholars for perpetuating the very social values that cause women to obsess about their weight. In *Women and Dieting Culture*, sociologist Kandi Stinson asks how these values are transmitted and how the women who join such organizations actually think about their bodies and weight loss. As part of her research, Stinson fully participated in a national, commercial weight-loss

organization as a paying member. Her acute analysis and sensitive insider's portrayal vividly illustrate the central roles dieting and body image play in women's lives.
