**Dracula's Vault - A Collection of Vampiric Tales from the Pen of Bram Stoker** Bram Stoker,2019-02-15 A chilling collection of classic gothic short stories written by Bram Stoker, all connected through the theme of vampires. "Gothic fiction" is a subgenre of Gothic horror that is defined by a combination of fiction writing with horror, death, and sometimes romance. It arguably originated from the 1764 novel "The Castle of Otranto" by English author Horace Walpole, which was subtitled "A Gothic Story" after the second edition. Abraham Bram Stoker (1847 - 1912) was an Irish author. He is best remembered for his 1897 Gothic novel "Dracula", which introduced the world-famous character of Count Dracula and is responsible for various conventions of vampire fantasy that persist to this day. The tales include: 'Dracula', 'The Judge's House', 'The Burial of the Rats' and 'The Squaw'. Other notable works by this author include: "The Primrose Path" (1875), "The Snake's Pass" (1890), and "Seven Golden Buttons" (1891). This volume will appeal to lovers of Gothic literature and classic vampire literature. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an

affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

Running your vacation rental for a profit is a realistic way to build your own wealth with a beautiful advantage. You can take a vacation in it! This isn't about merely getting by and paying your bills, but going after the market and being a rental leader in your resort community. These techniques aren't simply ‘talked about’ or ‘read about’, but actually used. To be upfront, if you are

not ready to do some work to get your unit to a maximized rental potential, this isn't for you. However, the work—guided by the techniques—can reap rewards you didn't know were possible!

### **The Rent Curse** Richard M Auty, Haydn I

Furlonge, 2018-12-06 The resource curse is a variant of a wider rent curse that can also be driven by geopolitical rent, regulatory rent, and labour rent. Total rent can therefore be from one-tenth to two-fifths of GDP and sometimes more. Rent is detached from the activity that generates it and is up for grabs so it feeds contents for its capture and its deployment can radically impact the development trajectory for better or worse, all too often for worse. The Rent Curse: Natural Resources, Policy Choice, and Economic Development studies two rent driven models to suggest that low rent incentivizes the elite to grow the economy efficiently, whereas high rent encourages rent siphoning for immediate enrichment at the expense of long-term growth. It looks at low rent Mauritius and high rent Trinidad and Tobago to show that low rent stimulates rapid and relatively egalitarian economic growth with incremental democratization, whereas high rent inhibits competitive diversification and frequently causes protracted growth collapses. The post-war prioritization of industry has proved a double edged sword. The Rent Curse employs rent driven models to explain why low rent East Asia has closed the income gap with advanced economies; why rent rich Latin America may be de-industrializing; why agricultural neglect launched sub-Saharan Africa on a false start to economic development; why South Asia pioneers growth through export services; and why governments in the oil-rich Gulf states raised the incomes of nationals without conferring the skills to sustain them.
