A Fine Romance Geoffrey Block,2023 The central topic of A Fine Romance: Adapting Broadway to Hollywood in the Studio System Era is the symbiotic relationship between a dozen Broadway musicals and their Hollywood film adaptations spanning nearly a half century (1927-1972). The romance begins with the stage version of Show Boat and ends with Bob Fosse's cinematic 1972 re-envisioning of Cabaret. Between these end points are chapters on The Cat and the Fiddle, Roberta, Cabin in the Sky, Oklahoma!, On the Town, Brigadoon, Call Me Madam, Silk Stockings, West Side Story, and Flower Drum Song--

Principles of the Harpsichord by Monsieur de Saint Lambert St Lambert,1984-03-15 Saint Lambert's Principles of the Harpsichord of 1702 was the first tutor for harpsichord to be published in France. It draws upon the dance-oriented harpsichord style developed during the

reign of Louis XIV by such masters as Jacques Champion de Chambonnières, Louis Couperin, and Jean Henry d'Anglebert. In subject matter it ranges from the fundamentals of music through questions of meter and tempo to particulars of harpsichord technique and ornamentation. Because of its broad scope it is an important source of information about both late seventeenth-century French performance practice and music theory. It provides a good complement to Francois Couperin's well-known book *l'Art de toucher le clavecin* of 1717 in that it deals with the musical style of the generation preceding Couperin and includes subjects not discussed by him. Although nothing is known about Saint Lambert himself, it is clear from this work that as a teacher he was thorough, sympathetic, and open-minded. His book is deserving of a place on the shelf of anyone, professional or amateur, who is interested in the music of the Grand Siècle. For this first English edition, Rebecca Harris-Warrick has added a substantial introduction and full annotation throughout the text [Publisher description]

The Interactive Stance Jonathan

Ginzburg, 2012-01-12 This book presents one of the first attempts at developing a precise, grammatically rooted, theory of conversation motivated by data from real conversations. It argues that the right way to construe grammar is as a system that characterizes types of talk in interaction.

Electro-Mechanical Actuators for the More

Electric Aircraft Mirko Mazzoleni, Gianpietro Di Rito, Fabio Previdi, 2021-01-19 This book presents recent results on fault diagnosis and condition monitoring of airborne electromechanical actuators, illustrating both algorithmic and hardware design solutions to enhance the reliability of onboard more electric aircraft. The book begins with an introduction to the current trends in the development of electrically powered actuation systems for aerospace applications. Practical examples are proposed to help present approaches to reliability, availability, maintainability and safety analysis of airborne equipment. The terminology and main strategies for fault diagnosis and condition monitoring are then reviewed. The core of the book focuses on the presentation of relevant case studies of fault diagnosis and monitoring design for airborne electromechanical actuators, using different techniques. The last part of the book is devoted to a summary of lessons learned and practical suggestions for the design of fault diagnosis solutions of complex airborne systems. The book is written with the idea of providing practical guidelines on the development of fault diagnosis and monitoring algorithms for airborne electromechanical actuators. It will be of interest to practitioners in aerospace, mechanical, electronic, reliability and systems engineering, as well as researchers and postgraduates interested in dynamical systems, automatic control and safety-critical systems. Advances in Industrial Control reports and encourages the transfer of technology in control

engineering. The rapid development of control technology has an impact on all areas of the control discipline. The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control.

Language Typology Alice Caffarel, J. R. Martin, Christian M. I. M. Matthiessen, 2004 This book is intended as a systemic functional contribution to language typology both for those who would like to understand and describe particular languages against the background of generalizations about a wide range of languages and also for those who would like to develop typological accounts that are based on and embody descriptions of the systems of particular languages (rather than isolated constructions). The book is a unique contribution in at least two respects. On the one hand, it is the first book based on systemic functional theory that is specifically concerned with language typology. On the other hand, the book combines the particular with the general in the description of languages: it presents comparable sketches of particular languages while at the same time identifying generalizations based on the languages described here as well as on other languages. The volume explores eight languages, covering seven language families: French, German, Pitjantjatjara, Tagalog, Telugu, Vietnamese, Chinese, and Japanese.

A New English Music Tim Rayborn, 2016-04-27 The turn of the 20th century was a time of great change in Britain. The empire saw its global

influence waning and its traditional social structures challenged. There was a growing weariness of industrialism and a desire to rediscover tradition and the roots of English heritage. A new interest in English folk song and dance inspired art music, which many believed was seeing a renaissance after a period of stagnation since the 18th century. This book focuses on the lives of seven composers--Ralph Vaughan Williams, Gustav Holst, Ernest Moeran, George Butterworth, Philip Heseltine (Peter Warlock), Gerald Finzi and Percy Grainger--whose work was influenced by folk songs and early music. Each chapter provides an historical background and tells the fascinating story of a musical life.

The Complex Lives of Star Clusters David Stevenson, 2015-05-09 As with the author's recent books *Extreme Explosions* and *Under a Crimson Sun*, the complex topic of star clusters is broken down and made accessible with clear links to other areas of astronomy in a language which the non-specialist can easily read and enjoy. The full range of topics are addressed regarding how star clusters are formed. Why is it some are dense conglomerates of stars while others are looser associations? Are the young, brilliant clusters seen in neighboring galaxies such as the Large Magellanic Cloud, M33 or M82 analogous to the

ancient globulars seen in the Milky Way? How will these clusters change as their stars wane and die? More interestingly, how does living in a dense star cluster affect the fates of the stars and any attendant planets that accompany them? Star clusters form many of the most dazzling objects in the astronomers' catalogs. Many amateur astronomers are interested in exploring how these objects are created and what it would be like to live among these objects. From the historical views of how star clusters came about to the most recent assumptions about how stars within these clusters evolve, different strands of science, from observation to theory, are woven together into a compelling investigation specifically targeted at amateur astronomers.

The Complete Lyrics of Alan Jay Lerner Dominic McHugh, Amy Asch, 2018-02-01 Alan Jay Lerner wrote the lyrics for some of the most beloved musicals in Broadway and Hollywood history. Most notably, with composer Frederick Loewe he created enduring hits such as *My Fair Lady*, *Gigi*, *Camelot*, and *Brigadoon*. In *The Complete Lyrics of Alan Jay Lerner*, editors and annotators Dominic McHugh and Amy Asch bring all of Lerner's lyrics together for the first time, including numerous draft or alternate versions and songs cut from the shows. Compiled from dozens of archival collections, this invaluable resource and authoritative reference includes both Lerner's classic works and numerous discoveries, including his unproduced MGM movie

Huckleberry Finn, selections from his college musicals, and lyrics from three different versions of Paint Your Wagon. This collection also includes extensive material from Lerner's two most ambitious musicals: Love Life, to music by Kurt Weill, and 1600 Pennsylvania Avenue, which Lerner wrote with Leonard Bernstein.

Hermes, 2012-09-04 Chronicles five epochal years of music in the Big Apple against a backdrop of the period's high crime, limited government resources and low rents, tracing the formations of key sounds while evaluating the contributions of such artists as Willie Colón, Bruce Springsteen and Grandmaster Flash.

Holy Hustlers, Schism, and Prophecy Richard Werbner, 2011-04-18 This book examines the charismatic Christian reformation presently underway in Botswana's time of AIDS and the moral crisis that divides the church between the elders and the young, apostolic faith healers. Richard Werbner focuses on Eloyi, an Apostolic faith-healing church in Botswana's capital. Werbner shows how charismatic prophets—holy hustlers—diagnose, hustle, and shock patients during violent and destructive exorcisms. He also shows how these healers enter into prayer and meditation and take on their patients' pain and how their ecstatic devotions create an aesthetic in which beauty beckons God. Werbner challenges theoretical assumptions about mimesis and empathy, the power of the word, and personhood. With its accompanying DVD, *Holy Hustlers, Schism, and Prophecy* integrates textual and filmed ethnography

and provides a fresh perspective on ritual performance and the cinematic.
