Courting the Wild Jamie K. Reaser, 2009-05 Do you remember the first time you feel in love? Within these pages you will find love stories, rapturous love affairs with the land, shameless seductions, betrothals, vows exchanged, marriages of the soul, heartaches, partings, healings, and renewals. The authors are the courters and the courted...Their landscape paramours embrace them and they grow forth from within.

The Lizard King Bryan Christy, 2009-08-05 Imagine The Sopranos, with snakes! *The Lizard King* is a fascinating account of a father and son family business suspected of smuggling reptiles, and the federal agent who tried to take them down.

When Bryan Christy began to investigate the world of reptile smuggling, he had no idea what he would be in for. In the course of his research, he was bitten between the eyes by a blood python, chased by a mother alligator, and sprayed by a bird-eating tarantula. But perhaps more dangerous was coming face to face with Michael J. Van Nostrand, owner of Strictly Reptiles, a thriving family business in Hollywood, Florida. Van Nostrand imports as many as 300,000 iguanas each year (over half the total of America's most popular imported reptile), as well as hundreds of thousands of snakes, lizards, frogs, spiders, and scorpions. Van Nostrand was suspected of being a reptile smuggler by Special Agent Chip Bepler of the U.S. Fish and Wildlife Service, who devoted years of his life in an obsessive quest to expose The Lizard King's cold-blooded crimes. How this cat-and-mouse game ended is engrossing and surprising.

The Book of Indian Reptiles and Amphibians J. C.

Daniel, Bombay Natural History Society, 2002 This new title covers the curious world of reptiles and amphibians, both common and rare, found in the Indian faunal limits. There has been no book to rival J C Daniel's earlier Book of Indian Reptiles, also published by the Bombay Natural History Society in 1983. He has now presented an entirely new text of not only a large number of reptiles, but has also described frogs, toads, and other amphibians, a much neglected group that is revealed in this book as picturesque, and biologically interesting as any other group of animals. This book contains field observations and photographs, and descriptions of 175 species including 53 snakes, 45 lizards of various groups, 31 tortoises and turtles, and 45 amphibians. Almost each species has been illustrated with the line drawings, photographs and reproductions of paintings from the Journal of the BNHS. The book satisfies professional zoologists, amateur naturalists, students and the interested general reader alike. There is a reference section with reptiles and amphibians listed separately. Photographic contributions from several members of the BNHS, add contemporary appeal to this exciting new field guide, which also contains snippets of historical information.

Green Anoles Philippe De Vosjoli, 2012-01-10 A popular beginner's lizard, the green anole is the perfect introduction to the world of reptiles and continues to be popular among new herp lovers. These tiny, neat little lizards with the intense black eyes have suffered the fate of goldfish, as they've been marketed by pet shops as cheap, easy care, insect-eating reptiles. In order to keep green anoles thriving in their vivaria, pet owners must

approach their husbandry with care and respect: Philippe de Vosjoli's *Green Anoles* provides the precise information necessary to reach that goal. The book begins with a chapter about the characteristics and behavior, natural history, and anatomy of green anoles, all of which is critical information for a keeper to better understand the needs of his or her pet. As pets, green anoles are best kept in their vivaria and not handled, so the setup of a beautifully landscaped vivarium with proper lighting, heat, humidity, ventilation, and substrate is key. This *Advanced Vivarium Systems* title offers complete information about housing, feeding and nutrition, diseases and disorders, and breeding as well as how to set up naturalistic vivaria for one or more anoles or a community of anoles and compatible species. The chapter on other anoles recommends some very attractive species for the beginning lizard keeper to expand his anole family, such as the brown anole, big-headed anole, Cuban (or knight) anole, and Jamaican anole. The finale chapter on compatible species includes descriptions and photographs of a half dozen interesting options, such as the flying gecko, pigmy skink, and green tree frog. Resources and index included.

Corn Snakes Kathy Love, Bill Love, 2012-01-03 From choosing a pet to selecting a veterinarian to feeding, housing, breeding, and more, these books deliver the most helpful and up-to-date information available on popular reptiles and amphibians kept as pets.

American Directory of Writer's Guidelines ,2007-02 Perhaps the best-kept secret in the publishing industry is that many publishers--both periodical publishers and book publishers--make available writer's guidelines to assist would-be contributors. Written by the staff at each publishing house, these guidelines help writers target their submissions to the exact needs of the individual publisher. The *American Directory of Writer's Guidelines* is a compilation of the actual writer's guidelines for more than 1,700 publishers. A one-of-a-kind source to browse for

article, short story, poetry and book ideas.
