Science Research Writing: For Native And Non-native Speakers Of English (Second Edition) Hilary Glasman-deal, 2020-11-27 This book enables STEM researchers to write effective papers for publication as well as other research-related texts such as a doctoral thesis, technical report, or conference abstract. Science Research Writing uses a reverse-engineering approach to writing developed from extensive work with STEM researchers at Imperial College London. This approach unpacks current models of STEM research writing and helps writers to generate the writing tools needed to operate those models effectively in their own field. The reverse-engineering approach also ensures that writers develop future-proof strategies that will evolve alongside the coming changes in research communication platforms. The Second Edition has been extensively revised and updated to represent current practice and focuses on the writing needs of both early-stage doctoral STEM researchers and experienced professional researchers at the highest level, whether or not they are native speakers of English. The book retains the practical, user-friendly format of the First Edition, and now contains seven units that deal separately with the components of written STEM research communication: Introduction, Methods, Results, Discussion, Conclusion, Abstract and Title, as well as extensive FAQ responses and a new Checklist and Tips section. Each unit analyses extracts from recent published STEM journal papers to enable researchers to

discover not only what to write, but, crucially, how to write it. The global nature of science research requires fast, accurate communication of highly complex information that can be understood by all participants. Like the First Edition, the Second Edition is intended as a fast, do-it-yourself guide to make both the process and the product of STEMM research writing more effective. Related Link(s)

The Value of Academic Libraries Megan J. Oakleaf, 2010 This report provides Association of College and Research Libraries (ACRL) leaders and the academic community with a clear view of the current state of the literature on value of libraries within an institutional context, suggestions for immediate Next Steps in the demonstration of academic library value, and a Research Agenda for articulating academic library

value. Its focus is to help librarians understand, based on professional literature, the current answer to the question, How does the library advance the missions of the institution? This report is also of interest to higher educational professionals external to libraries, including senior leaders, administrators, faculty, and student affairs professionals.

An Introduction to Language and Linguistics Ralph Fasold, Jeffrey Connor-Linton, 2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Stylish Academic Writing Helen Sword, 2012-04-16 Elegant ideas deserve elegant expression. Sword dispels the myth that you can't get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

Whose Mouse Are You? Robert Kraus, 2011-08-23 A lonely little mouse has to be resourceful to bring his family back together. In a series of delightfully imaginary achievements, "nobody's mouse" transforms himself into the beloved hero of his mother, father, sister, and brand-new baby brother. In their very first collaboration, Robert Kraus and Jose Aruego give charm and validity to one of childhood's more difficult experiences. Tender and catchy, Robert Kraus's rhyming text, combined with Jose Aruego's large, vibrantly clever illustrations, makes for a storytime classic.

Palynology and Vegetation History Valentí Rull, Encarni Montoya, Thomas Giesecke, Jesse L. Morris, 2019-01-11 This Research Topic commemorates the centenary of the first quantitative pollen diagram by Lennart von Post, the founder of paleoecological palynology. The main aim is to provide a thorough view of the use of palynology in aspects such as the reconstruction of Quaternary vegetation and environmental

changes, the role of natural and anthropogenic drivers in the development of the Quaternary vegetation, the shaping of present-day ecological and biogeographical patterns, the potential application of this knowledge in biodiversity conservation and landscape restoration and the development of new methods of pollen analysis and data management. The Research Topic is subdivided into four main conceptual parts, namely (1) modern analog studies; (2) land cover estimates from pollen data; (3) vegetation dynamics reconstructions from Europe, North and South America, Africa and Oceania; and (4) large-scale reviews and meta-analyses. Hopefully, this Research Topic will serve to appraise the state of the art of modern palynology and highlight the usefulness of this discipline in long-term ecological research.
