The First National Bank of Dad David Owen, 2007-04-24 Most parents do more harm than good when they try to teach their children about money. They make saving seem like a punishment, and force their children to view reckless spending as their only rational choice. To most kids, a savings account is just a black hole that swallows birthday checks. David Owen, a New Yorker staff writer and the father of two children, has devised a revolutionary new way to teach kids about money. In The First National Bank of Dad, he explains how he helped his own son and daughter become eager savers and rational spenders. He started by setting up a bank of his own at home and offering his young children an attractively high rate of return on any amount they chose to save. If you hang on to some of your wealth instead of spending it immediately, he told them, in a little while, you'll be able to double or even triple your allowance. A few years later, he started his own stock market and money-market fund for them. Most children already have a pretty good idea of how money works, Owen believes; that's why they are seldom interested in punitive savings schemes mandated by their parents. The first step in making children financially responsible, he writes, is to take

advantage of human nature rather than ignoring it or futilely trying to change it. My children are often quite irresponsible with my money, and why shouldn't they be? he writes. But they are extremely careful with their own. The First National Bank of Dad also explains how to give children real experience with all kinds of investments, how to foster their charitable instincts, how to make them more helpful around the house, how to set their allowances, and how to help them acquire a sense of value that goes far beyond money. He also describes at length what he feels is the best investment any parent can make for a child -- an idea that will surprise most readers.

The Mindful Geek Michael Taft, 2015-09-14 The Mindful Geek tells you how to derive the real world benefits of hardcore mindfulness meditation without drinking the metaphysical Kool-Aid. Meditation teacher, Michael W. Taft gives you step-by-step instructions in the powerful and reliable techniques of mindfulness meditation, and outlines the psychological and neuroscientific research underpinning these practices. By treating mindfulness as a scientifically-based, psychological technique, you can keep your atheistic or agnostic secular skepticism and still maintain a powerful, regular, and deeply effective meditation practice. That's because meditation doesn't require you to believe in it to work. Like any good technology, if you use it

correctly, it will do the job reliably whether you believe in it or not. And-make no mistake-meditation is a kind of technology; a technology for hacking the human wetware in order to improve your life. This book is a practical, hands-on manual about how to make the most of that technology for yourself. If you are smart, skeptical, technically-inclined, and have a desire to see what meditation is really all about, this book is for you. Michael has taught a lot of meditation programs at tech corporations like Google, so this material has been field-tested on some world-class geeks.

The Scholar as Human Anna Sims Bartel, Debra A. Castillo, 2021-01-15 The Scholar as Human brings together faculty from a wide range of disciplines—history; art; Africana, American, and Latinx studies; literature, law, performance and media arts, development sociology, anthropology, and Science and Technology Studies—to focus on how scholarship is informed, enlivened, deepened, and made more meaningful by each scholar's sense of identity, purpose, and place in the world. Designed to help model new paths for publicly-engaged humanities, the contributions to this groundbreaking

volume are guided by one overarching question: How can scholars practice a more human scholarship? Recognizing that colleges and universities must be more responsive to the needs of both their students and surrounding communities, the essays in *The Scholar as Human* carve out new space for public scholars and practitioners whose rigor and passion are equally important forces in their work. Challenging the approach to research and teaching of earlier generations that valorized disinterestedness, each contributor here demonstrates how they have energized their own scholarship and its reception among their students and in the wider world through a deeper engagement with their own life stories and humanity. Contributors: Anna Sims Bartel, Debra A. Castillo, Ella Diaz, Carolina Osorio Gil, Christine Henseler, Caitlin Kane, Shawn McDaniel, A. T. Miller, Scott J. Peters, Bobby J. Smith II, José Ragas, Riché Richardson, Gerald Torres, Matthew Velasco, Sara Warner Thanks to generous funding from Cornell University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.
