The 1001 Rewards & Recognition Fieldbook Bob Nelson, Dean Spitzer, 2002-01-15 Author of the Business Week million-copy bestseller, *1001 Ways to Reward Employees*, Bob Nelson is the motivational specialist who helps businesses stay competitive by teaching them how to inspire their employees to excel. Now joined by Dr. Dean Spitzer, senior consultant and performance improvement expert for IBM, Nelson distills the knowledge, experience, and ideas gained from working with thousands of organizations into a hands-on, practical fieldbook. Beginning with the basics of motivation, including the decline of traditional incentives and the trend toward empowered employees, the book lays the groundwork for developing and managing a rewards or recognition program in any work situation: how to recognize an individual or a group; how to develop a low-cost recognition program; how to sell it to upper management, prevent and fix common problems, and assess its effectiveness. There are planning worksheets, templates for different purposes?improving morale, improving attendance, increasing retention?plus perforated reference cards for immediate guidance, and 101 new low-cost/no-cost recognition ideas. Running through the margins are Nelson's answers to the questions most frequently asked since the publication of *1001 Ways to Reward Employees*.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques

for putting these into action in a unique book that will change how we think and transform how we live.

Risky Rewards Professor Andrew Hopkins,Dr Sarah Maslen,2015-02-28 Financial incentives have long been used to try to influence professional values and practices. Recent events including the global financial crisis and the BP Texas City refinery disaster have been linked to such incentives, with commentators calling for a critical look at these systems given the catastrophic outcomes. Risky Rewards engages with this debate, particularly in the context of the present and potential role of incentives to manage major accident risk in hazardous industries.

Summary of Alfie Kohn's Punished by Rewards Everest Media,2022-03-25T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The core of pop behaviorism is Do this and you'll get that. The wisdom of this technique is rarely questioned. We take for granted that this is the logical way to raise children, teach students, and manage employees. #2 Rewards are used long before a theory was developed to explain and systematize their practice. They were used by Frederick W. Taylor to encourage maximum efficiency in production at a factory, and by the first public school in New York City to manage the behavior of schoolchildren. #3 Skinner believed that everything we do can be explained by the principle of reinforcement. He believed that organisms are just repertoires of behaviors that can be fully explained by outside forces. He said that there is no self as we usually use the term. #4 The book gives the impression that someone else is telling the story, someone who doesn't care much about him. It is not a big stretch to reduce creativity to a series of novel behaviors selected by the environment, and morality to whether society deems an action appropriate or inappropriate.

Project Team Rewards Jöran Beel, 2007-11-04 This book gives you a comprehensive introduction to rewards in general and project team rewards in particular. Motivation theories and their impact on designing a reward system are explained. Throughout the book six so-called 'reward questions' are considered that need to be answered for designing a reward system. These reward questions are: Rewarding or not rewarding? Whom to reward? What to reward? What kind of reward? How much reward? When to reward? In addition, impacts of variable factors that may influence the answers to the reward questions are identified and explained. Some of those factors are employee's age, the company's culture but also project characteristics such as goal clarity, applied success criteria, project duration or member fluctuation. Please note that this book originally was written as a Master's Thesis. Accordingly, you should not expect to read a 'normal' text book but a Master's Thesis.
