A Primer of Pastoral Spanish Michael J. McGrath,2022-08 A Primer of Pastoral Spanish is designed to provide religious and non-religious alike with the linguistic and cultural tools to minister in Spanish. This primer is modeled after Madrigal's Magic Key to Spanish (1953), whose author, Margarita Madrigal, bases her methodology on creating with the language instead of memorizing it. Previous knowledge of Spanish is not necessary, although, as you will discover, you already know thousands of words in Spanish. The vocabulary you know in English is the foundation on which you can build your knowledge of Spanish vocabulary. There are thousands of English words that become Spanish words if you can recognize the slight change that takes place from one language to the other. For example, you will learn how to conjugate a verb in Spanish to the first-person singular of the past tense by dropping a letter from its translation in English and adding an accent. There are 40 units in this primer. If you were to study each unit 20-30 minutes a day throughout Lent, for example, think about how far you could progress. Each unit consists of four sections: Vocabulary, Prayer or Culture, Cornerstones, and Vocabulary Review. There are four units called Check Your Progress. These units consist of Challenges based on the grammar, vocabulary, and culture you learned in the previous units. The answers to the Challenges are at the end of the units.

Perspectives on Causation Elitzur A. Bar-Asher Siegal, Nora Boneh, 2020-07-27

This book explores relationships and maps out intersections between discussions on causation in three scientific disciplines: linguistics, philosophy, and psychology. The book is organized in five thematic parts, investigating connections between philosophical and linguistic studies of causation; presenting novel methodologies for studying the representation of causation; tackling central issues in syntactic and semantic representation of causal relations; and introducing recent advances in philosophical thinking on causation. Beyond its thematic organization, readers will find several recurring topics throughout this book, such as the attempt to reduce causality to other non-causal terms; causal pluralism vs. one all-encompassing account for causation; causal relations pertaining to the mental as opposed to the physical realm, and more. This collection also lays the foundation for questioning whether it is possible to evaluate available philosophical approaches to causation against the variety of linguistic phenomena ranging across diverse lexical and grammatical items, such as bound morphemes, prepositions, connectives, and verbs. Above all, it lays the groundwork for considering whether the fruits of the psychological-cognitive study of the perception of causal relations may contribute to linguistic and philosophical studies, and whether insights from linguistics can benefit the other two disciplines.
