Social Studies Worksheets Don't Grow Dendrites Marcia L. Tate,2012 Best-selling author Marcia L. Tate brings her trademark dendrite-growing teaching strategies to this practitioner-friendly collection of brain-compatible methods for engaging k-12 students in social studies. Included are 20 proven strategies and more than 200 grade-leveled activities for applying them. Teachers will find concrete ways to integrate national social studies content standards into their curriculum with visual, auditory, kinesthetic, and tactile experiences that maximize retention, including: (1) Project-based and problem-based instruction; (2) Storytelling, music, and humor; (3) Graphic organizers, semantic maps, and word webs; and (4) Internet projects. This book provides sample lesson plans and a wealth of examples that demonstrate how to apply these classroom-tested strategies to the 10 themes of social studies. The text also challenges teachers to creatively plan and deliver their own unforgettable lessons. Among the many benefits your students is that they will remember what they've learned and apply it to their lives--the true goal of education.

The Logic of Sufficiency Thomas Princen,2005-09-30 What if modern society put a priority on the material security of its citizens and the ecological integrity of its resource base? What if it took ecological constraint as a given, not a hindrance but a source of long-term economic security? How would it organize itself, structure its industry, shape its consumption? Across time and across cultures, people actually have adapted to ecological constraint. They have changed behavior; they have built institutions. And they have developed norms and principles for their time. Today's environmental challenges--at once global, technological, and commercial--require new behaviors, new institutions, and new principles. In this highly original work, Thomas Princen builds one such principle: sufficiency. Sufficiency is not about denial, not about sacrifice or doing without. Rather, when resource depletion and overconsumption are real, sufficiency is about doing well. It is about good work and good governance; it is about goods that are good only to a point. With examples ranging from timbering and fishing to automobility and meat production, Princen shows that sufficiency is perfectly sensible and yet absolutely contrary to modern society's dominant principle, efficiency. He argues that seeking enough when more is possible is both intuitive and rational--personally, organizationally and ecologically rational. And under global ecological constraint, it is ethical. Over the long term, an economy--indeed a society--cannot operate as if there's never enough and never too much.

The Echo of Battle Brian McAllister Linn,2009-07-01 From Lexington and Gettysburg to Normandy and Iraq, the wars of the United States have defined the nation. But after the guns fall silent, the army searches the lessons of past conflicts in order to prepare for the next clash of arms. In the echo of battle, the army develops the strategies, weapons, doctrine, and commanders that it hopes will guarantee a future victory. In the face of radically new ways of waging war, Brian Linn surveys the past assumptions--and errors--that underlie the army's many visions of warfare up to the present day. He explores the army's forgotten heritage of deterrence, its long experience with counter-guerrilla operations, and its successive efforts to transform itself. Distinguishing three martial traditions--each with its own concept of warfare, its own strategic views, and its own excuses for failure--he locates the visionaries who prepared the army for its battlefield triumphs and the reactionaries whose

mistakes contributed to its defeats. Discussing commanders as diverse as Dwight D. Eisenhower, George S. Patton, and Colin Powell, and technologies from coastal artillery to the Abrams tank, he shows how leadership and weaponry have continually altered the army's approach to conflict. And he demonstrates the army's habit of preparing for wars that seldom occur, while ignoring those it must actually fight. Based on exhaustive research and interviews, *The Echo of Battle* provides an unprecedented reinterpretation of how the U.S. Army has waged war in the past and how it is meeting the new challenges of tomorrow.

Retailising Space Mattias Karrholm,2016-04-08 Over the past few years there has been a proliferation of new kinds of retail space. Retail space has cropped up just about everywhere in the urban landscape: in libraries, workplaces, churches and museums. In short, retail is becoming a more and more manifest part of the public domain. The traditional spaces of retail, such as city centres and outlying shopping malls, are either increasing in size or disappearing, producing new urban types and whole environments totally dedicated to retail. The creation of these new retail spaces has brought about a re- and de-territorialisation of urban public space, and has also led to transformations in urban design and type of materials used, and even in the logic and ways through which these design amenities meet the needs of retailers and/or consumers. This book describes how the retailisation of public domains affects our everyday life and our use of the built environment. Taking an architectural and territorial perspective on this issue, it looks specifically at how retail and consumption spaces have changed and territorialised urban life in different ways. It then develops a methodology and a set of concepts to describe and understand the role of architecture in these territorial transformations.
