The Smart Presenter Paul Arinaga/Lars Sudmann, 2014-05 DOUBLE YOUR IMPACT AND HALVE YOUR PREPARATION TIME Most people are too busy preparing presentations to be able to give great presentations. The Smart Presenter™ shows you how to stop tinkering and start connecting with your audience. Specifically, you'll learn : • How to create better presentations in half the time by applying the Fast Prototyping 5-step POINT program. • Why, when it comes to the structure or organization of your presentation, one size does not fit all, and how to choose the best structure for your particular presentation. • Nine advanced formulas for beyond bullets to communicate your information in a much more compelling way. • How to create openings and closings that grab your audience's attention and leave a lasting impression. • How to create visually compelling designs, even if you're not a graphic designer, without slaving over your presentation for days on end. • A simple – yet highly effective – technique for quickly identifying your presentation objectives.

Mad World Lori Majewski, Jonathan Bernstein, 2014-04-15 A “hugely entertaining” history of the 1980s New Wave music scene told through new interviews with its biggest artists (Rolling Stone). Mad World is a compelling oral history that celebrates the New Wave music phenomenon of the 1980s via new interviews with 35 of the most notable artists of the period. Each chapter begins with a discussion of their most popular song and leads to stories of their history and place in the scene, ultimately painting a vivid picture of this colorful, idiosyncratic time. Mixtape suggestions, fashion sidebars, and quotes from famous contemporary admirers help fill out the fun. Participants include members of Duran Duran, New Order, The Smiths, Tears for Fears, Adam Ant, Echo, and the Bunnymen, Devo, ABC, Spandau Ballet, A Flock of Seagulls, Thompson Twins, INXS, and more. “One addictive chapter after another.” —Rob Sheffield, author of Talking to Girls About Duran Duran “Tells the tale of some of the decade’s most unforgettable songs . . . in fascinating detail, letting the architects of these memorable records shine a light on how the sound of a generation came to be.” —The Hollywood Reporter

"The new wave era is often dismissed for its one-hit wonders and silly haircuts, but [Mad World] examines the period with a great deal of love and reverence." –Buzzfeed "A really informative and insightful read." –People

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of

insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Learning Spaces Diana Oblinger, 2006 El espacio, ya sea físico o virtual, puede tener un impacto significativo en el aprendizaje. Learning Spaces se centra en la forma en que las expectativas de los alumnos influyen en dichos espacios, en los principios y actividades que facilitan el aprendizaje y en el papel de la tecnología desde la perspectiva de quienes crean los entornos de aprendizaje: profesores, tecnólogos del aprendizaje, bibliotecarios y

La tecnología de la información ha aportado capacidades únicas a los espacios de aprendizaje, ya sea estimulando una mayor interacción mediante el uso de herramientas de colaboración, videoconferencias con expertos internacionales o abriendo mundos virtuales para la exploración. Este libro representa una exploración continua a medida que unimos el espacio, la tecnología y la pedagogía para asegurar el éxito de los estudiantes.
