The Warcraft Civilization William Sims

Bainbridge,2012-09-21 An exploration of the popular online role-playing game World of Warcraft as a virtual prototype of the real human future. World of Warcraft is more than a game. There is no ultimate goal, no winning hand, no princess to be rescued. WoW is an immersive virtual world in which characters must cope in a dangerous environment, assume identities, struggle to understand and communicate, learn to use technology, and compete for dwindling resources. Beyond the fantasy and science fiction details, as many have noted, it's not entirely unlike today's world. In *The Warcraft Civilization*, sociologist William Sims Bainbridge goes further, arguing that WoW can be seen not only as an allegory of today but also as a virtual prototype of tomorrow, of a real human future in which tribe-like groups will engage in combat over declining natural resources, build temporary alliances on the basis of mutual self-interest, and seek a set of values that transcend the need for war. What makes WoW an especially good place to look for insights about Western civilization, Bainbridge says, is that it bridges past and future. It is founded on Western cultural tradition, yet aimed toward the virtual worlds we could create in times to come.

Freud Upside Down Badia Sahar Ahad, 2010-10-07 This thought-provoking cultural history explores how psychoanalytic theories shaped the works of important African American literary figures. Badia Sahar Ahad details how Nella Larsen, Richard Wright, Jean Toomer, Ralph Ellison, Adrienne Kennedy, and Danzy Senna employed psychoanalytic terms and conceptual models to challenge notions of race and racism in twentieth-century America. *Freud Upside Down* explores the relationship between these authors and intellectuals and the psychoanalytic movement emerging in the United States over the course of the twentieth century.

Examining how psychoanalysis has functioned as a cultural phenomenon within African American literary intellectual communities since the 1920s, Ahad lays out the historiography of the intersections between African American literature and psychoanalysis and considers the creative approaches of African American writers to psychological thought in their work and their personal lives.

Developing Practical Wireless Applications Dean A. Gratton, 2011-04-08 In a constant stream of new ideas, wireless technologies continue to emerge offering a range of capabilities, each affording simplicity and ease-of-use. Such diversity and choice should surely beg the question, “are manufacturers using the right technology for the right product? *Developing Practical Wireless Applications* will explore this question and, in doing so, will illustrate many of the wireless technologies currently available whilst drawing upon their individual strengths and weaknesses. More specifically, the book will draw your attention to the diverse collection of standardized and proprietary solutions available to manufacturers. As developers and innovators your choices are not restricted to any norm and, as such, a standardized or proprietary solution may afford you greater benefits in realising any product roadmap. *Developing Practical Wireless*

Applications will provide you with a comprehensive understanding of how each technology works, coupled with an exploration into overlapping, complementary and competing technologies. In establishing this foundation, we will explore wireless applications in their context and address their suitability. In contrast, the book also considers the practicality of a wireless world in an attempt to better understand our audience and specific demographic groups. Coupled with a richer understanding of our consumers, along with our technology make-up we can indeed target wireless products more effectively. *Explores techniques used to attack wireless networks including WarXing, WarChalking, BlueJacking, and BlueSnarfing *Discusses applications utilizing ZigBee, NFC, RFID, Ultra-Wideband and WirelessUSB (WiMedia) *Details Bluetooth 2.x +EDR and introduces the v3.0 (BTOverUWB) specification *Includes fundamental introductions to WiFi, namely 802.11i, 802.11p and 802.11n *Compares personal-area and wide-area communications including 3G, HSDPA, 4G, and WiMAX, as well as introducing Wireless Convergence

Ethical and Social Issues in the Information Age

Joseph M. Kizza, 2013-03-09 An introduction to the social and policy issues which have arisen as a result of IT. Whilst it assumes a modest familiarity with computers, the book provides a guide to the issues suitable for undergraduates. In doing so, the author prompts students to consider questions such as: * How do morality and the law relate to each other? * What should be covered in a professional code of conduct for

information technology professionals? * What are the ethical issues relating to copying software? * Is electronic monitoring of employees wrong? * What are the moral codes of cyberspace? Throughout, the book shows how in many ways the technological development is outpacing the ability of our legal systems, and how different paradigms applied to ethical questions often proffer conflicting conclusions. As a result, students will find this a thought-provoking and valuable survey of the new and difficult ethical questions posed by the Internet, artificial intelligence, and virtual reality.

Beautiful Code Greg Wilson, Andy Oram, 2007-06-26
How do the experts solve difficult problems in software development? In this unique and insightful book, leading computer scientists offer case studies that reveal how they found unusual, carefully designed solutions to high-profile projects. You will be able to look over the shoulder of major coding and design experts to see problems through their eyes. This is not simply another design patterns book, or another software engineering treatise on the right and wrong way to do things. The authors think aloud as they work through their project's architecture, the tradeoffs made in its construction, and when it was important to break rules. This book contains 33 chapters contributed by Brian Kernighan, Karl Fogel, Jon Bentley, Tim Bray, Elliotte Rusty Harold, Michael Feathers, Alberto Savoia, Charles Petzold, Douglas Crockford, Henry S. Warren, Jr., Ashish Gulhati, Lincoln Stein, Jim Kent, Jack Dongarra and Piotr Luszczek, Adam Kolawa, Greg

Kroah-Hartman, Diomidis Spinellis, Andrew Kuchling, Travis E. Oliphant, Ronald Mak, Rogerio Atem de Carvalho and Rafael Monnerat, Bryan Cantrill, Jeff Dean and Sanjay Ghemawat, Simon Peyton Jones, Kent Dybvig, William Otte and Douglas C. Schmidt, Andrew Patzer, Andreas Zeller, Yukihiro Matsumoto, Arun Mehta, TV Raman, Laura Wingerd and Christopher Seiwald, and Brian Hayes. Beautiful Code is an opportunity for master coders to tell their story. All author royalties will be donated to Amnesty International.

A Companion to Contemporary Drawing Kelly Chorpene, Rebecca Fortnum, 2020-11-10 The first university-level textbook on the power, condition, and expanse of contemporary fine art drawing A Companion to Contemporary Drawing explores how 20th and 21st century artists have used drawing to understand and comment on the world. Presenting contributions by both theorists and practitioners, this unique textbook considers the place, space, and history of drawing and explores shifts in attitudes towards its practice over the years. Twenty-seven essays discuss how drawing emerges from the mind of the artist to question and reflect upon what they see, feel, and experience. This book discusses key themes in contemporary drawing practice, addresses the working conditions and context of artists, and considers a wide range of personal, social, and political considerations that influence artistic choices. Topics include the politics of eroticism in South American drawing, anti-capitalist drawing from Eastern Europe, drawing and conceptual art, feminist drawing, and exhibitions that have put drawing

practices at the centre of contemporary art. This textbook: Demonstrates ways contemporary issues and concerns are addressed through drawing Reveals how drawing is used to make powerful social and political statements Situates works by contemporary practitioners within the context of their historical moment Explores how contemporary art practices utilize drawing as both process and finished artifact Shows how concepts of observation, representation, and audience have changed dramatically in the digital era Establishes drawing as a mode of thought Part of the acclaimed Wiley Blackwell Companions to Art History series, A Companion to Contemporary Drawing is a valuable text for students of fine art, art history, and curating, and for practitioners working within contemporary fine art practice.

Self-Tracking Gina Neff, Dawn Nafus, 2016-06-24
What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday

experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at stake: who wants our data and why; the practices of serious self-tracking enthusiasts; the design of commercial self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates.

A London Merchant 1695-1774 Lucy Stuart Sutherland, 2012-12-06 First published in 1962. This volume is a collection of the papers from the Mercantile College that preserved as examples of the 'accounts of many distinguished and eminent merchants deceased ... who trod the Royal Exchange with supreme credit and dignity'. They bring together the commercial pride which was reached in the eighteenth century, before the challenge of industry and an economic interpretation based on its predominance brought its sobering influence to bear on 'the great mercantile classes of England'.

Love and Addiction Lorraine Wood, 2017-10-16 A woman can be a mother, wife, friend, a force in business, a spiritual guide and a person who found peace and redemption in recovery. Every month, Lorraine Wood tells the story of her devastating family legacy of addiction in the hopes that it

will inspire people to start, and stay, on their own difficult path to addiction recovery. Love & Addiction is her heart-wrenching memoir that records her story. Born to alcoholic parents Lorraine struggled through childhood as the eldest of six children living on a rural farm in New Zealand. Like most 'good girls' in the 1950s, she married young and quickly had four daughters. The view out her window offered nothing but cows and she longed for more. After months of persuasion the family finally moved to the city of Auckland. There, fate introduced her to her true soul mate, Bill. The only problem was that Bill was also a married man, and with three daughters of his own. But their love could not be denied and before long, two divorces were navigated and one family of seven children was formed in Sydney to start afresh. It was then that the cracks began to show. Bill, also a former alcoholic, had transferred his addictive tendencies to financial risk, racking up a millions of dollars in debt. An intervention was needed. For both of them. It was only at this stage, at 50 years of age, that Lorraine understood the true generational damage of addiction. When one person is addicted, an entire family suffers and need their own rehabilitation and support to truly recover and heal. Lorraine's purpose in life was born. In 1993 she and Bill took the greatest financial risk of all and opened South Pacific Private – a hospital that specializes in addiction treatments. Since Bill's tragic death, Lorraine continues to run the hospital solo, now known as the only Australian equivalent to the renowned US treatment facility,

The Meadows. With engaging, heartwarming anecdotes Lorraine opens up her life and bares her soul in *Love & Addiction*, a memoir.

Heterotopia and Heritage Preservation Smaranda Spanu, 2019-05-02 This book approaches the field of built heritage and its practices by employing the concept of heterotopia, established by the French philosopher Michel Foucault. The fundamental understandings of heritage, its evolution and practices all reveal intrinsic heterotopic features (the mirror function, its utopic drive, and its enclave-like nature). The book draws on previous interpretations of heterotopia and argues for a reading of heritage as heterotopia, considering various heritage mechanisms – heritage selection, conservation and protection practices, and heritage as mnemonic device – in this regard. Reworking the six heterotopic principles, an analysis grid is designed and applied to various built heritage spaces (vernacular, religious architecture, urban 19th century ensembles). Guided through this theoretical itinerary, the reader will rediscover the heterotopic lens as a minor, yet promising, Foucauldian device that allows for a better understanding of heritage and its everyday practices.

Avogadro Corp is a tremendous book that every single person needs to read. Don't start without the time to finish – it won't let you go.”

-- Gifford Pinchot III, founder Bainbridge Graduate Institute, author *THE INTELLIGENT ORGANIZATION* An alarming and jaw-dropping tale about how something as innocuous as email can subvert an entire organization.
