*The Classic British Telefantasy Guide* Paul Cornell,Martin Day,Keith Topping,2015-07-30 The Classic British Telefantasy Guide is derived from the second edition of The Guinness Book of Classic British TV with various corrections and a revised introduction to bring it up to date. It was written when the Internet barely existed, and at a time when few books had been published on the subject. This is, however, by no means a new or completely revised version of the original material - too much time has passed, and if we were to start reworking and correcting the text now, it would probably never be finished! Instead, Classic British Telefantasy is an electronic reprint of some of the authors' earliest work, repacked for a new format and, perhaps, a new age.

**Fueling Culture** Jennifer Wenzel,Patricia Yaeger,2017-02-01 How has our relation to energy changed over time? What differences do particular energy sources make to human values, politics, and imagination? How have transitions from one energy source to another—from wood to coal, or from oil to solar to whatever comes next—transformed culture and society? What are the implications of uneven access to energy in the past, present, and future? Which concepts and theories clarify our

relation to energy, and which just get in the way? Fueling Culture offers a compendium of keywords written by scholars and practitioners from around the world and across the humanities and social sciences. These keywords offer new ways of thinking about energy as both the source and the limit of how we inhabit culture, with the aim of opening up new ways of understanding the seemingly irresolvable contradictions of dependence upon unsustainable energy forms. Fueling Culture brings together writing that is risk-taking and interdisciplinary, drawing on insights from literary and cultural studies, environmental history and ecocriticism, political economy and political ecology, postcolonial and globalization studies, and materialisms old and new. Keywords in this volume include: Aboriginal, Accumulation, Addiction, Affect, America, Animal, Anthropocene, Architecture, Arctic, Automobile, Boom, Canada, Catastrophe, Change, Charcoal, China, Coal, Community, Corporation, Crisis, Dams, Demand, Detritus, Disaster, Ecology, Electricity, Embodiment, Ethics, Evolution, Exhaust, Fallout, Fiction, Fracking, Future, Gender, Green, Grids, Guilt, Identity, Image, Infrastructure, Innervation, Kerosene, Lebenskraft, Limits, Media, Metabolism, Middle East, Nature, Necessity, Networks, Nigeria,

**Oil 101** Morgan Downey,2009 Since 1859, oil has enabled and defined our economic, social and political landscape. Throughout this time, abundant supply ensured low, stable prices and the inner workings of the oil industry remained relatively obscure. Following a century and a half of relative calm, oil prices have become much more volatile as the sustainability and growth of reliable supply sources have been brought into question. This book provides a guide to oil; from its history, to sources of supply and drivers of demand; from how prices are determined daily in global wholesale oil markets, to how those markets are connected to prices at the pump. -- Book jacket.

Cabazon,2017-10-10 More than twenty-five years in the making, this detailed sourcebook on Buddhist understandings of sexuality, desire, ethics, and deviance in classical South Asia is filled with both engaging translations and original and provocative analysis. Cabezón marshals an incredible array of scriptures, legal and medical texts, and philosophical treatises, explaining the subtleties of this ancient literature in lucid prose. This work will be of immense interest not only to scholars of Buddhism and gender studies but also to lay readers who want to learn more about traditional Buddhist attitudes toward sex--Page 2 of dust jacket.

*Illustrated Dictionary Of Symbols In Eastern And Western Art* James Hall,2018-05-04 A

Companion volume to James Hall's perennial seller *Dictionary of Subjects & Symbols in Art*, which deals with the subject matter of Christian and Western art, the present volume includes the art of Egypt, the ancient Near East, Christian and classical Europe, India and the Far East. Flail explores the language of symbols in art showing how paintings, drawings and sculpture express many shades of meaning from simple, everyday hopes and fears to the profoundest philosophical and religious aspirations. The book explains and interprets symbols from many cultures, and over 600 illustrations clarify and complement the text. There are numbered references throughout the text to the sacred literature, myths and legends in which the symbols had their origins. Details of English translations of the works are in the bibliography. The book includes an appendix of the transcription of Chinese, notes and references, bibliography, chronological tables and index.

Dictionary of Post-Classical Yemeni Arabic Part: 2 Moshe Piamenta, 1990 This publication is a most comprehensive, richly-documented dictionary which presents, in local Arabic dialects and in mostly assimilated Judaeo-Yemeni dialects, the natural, geo-political, economic, and socio-cultural

history of Muslim Yemen. It is also an account of the religious inter- and intra-socio-cultural and economic everyday life of the ancient Jewish communities who lived as dhimmis under Muslim rule until their mass emigration to Israel in 1948, leaving behind 5,000 co-religionists. The dictionary is based on about 300 printed and ms sources painstakingly consulted in various libraries all over the world, and many Yemeni language informants now residing in Israel. The text of every single item is adduced, mostly in context, with reference to ms., or book, page, line, or note, and to classical and foreign etymologies. Particular attention has been paid to the dictionaries of Lane and Dozy. This is a milestone in Arabic lexicography, complementing Dozy's *Suppliment aux dictionnaires arabes*, and opening up a complete new area sorely missing in the field of Arabic Studies.
