Walden Pond W. Barksdale Maynard,2004-02-12 Perhaps no other natural setting has as much literary, spiritual, and environmental significance for Americans as Walden Pond. Some 700,000 people visit the pond annually, and countless others journey to Walden in their mind, to contemplate the man who lived there and what the place means to us today. Here is the first history of the Massachusetts pond Thoreau made famous 150 years ago. W. Barksdale Maynard offers a lively and comprehensive account of Walden Pond from the early nineteenth century to the present. From Thoreau's first visit at age 4 in 1821--That woodland vision for a long time made the drapery of my dreams--to today's efforts both to conserve the pond and allow public access, Maynard captures Walden Pond's history and the role it has played in social, cultural, literary, and environmental movements in America. Along the way Maynard details the geography of the pond; Thoreau's and Emerson's experiences of Walden over their lifetimes; the development of the cult of Thoreau and the growth of the pond as a site of literary and spiritual pilgrimages; rock star Don Henley's Walden Woods Project and the much publicized battle to protect the pond from developers in the 1980s; and the vitally important ecological symbol Walden Pond has become today. Exhaustively researched, vividly written, and illustrated with historical photographs and the most detailed maps of Thoreau country yet created, Walden Pond: A History reveals how an ordinary pond has come to be such an extraordinarily inspiring symbol.

Sedimentologic Analysis of Cores from the Upper Triassic Chinle Formation and the Lower Permian Cutler Formation, Lisbon Valley, Utah Russell F. Dubiel,Janet L. Brown,1993 Five uranium exploration cores from Lisbon Valley in the Paradox Basin of southeastern Utah provide examples of sedimentary structures and lithofacies from the Lower Permian Cutler Formation and the overlying Moss Back Member of the Upper Triassic Chinle Formation. The Cutler Formation consists of reddish-brown to purple, arkosic sandstone, siltstone, and mudstone of fluvial and floodplain origin interbedded with reddish-orange sandstone and mud-stone deposited in sabkha, eolian dune, and sand-sheet settings. The colors are indicative of the respective depositional settings. An erosional nconformity separates the top of the Cutler from the overlying Moss Back Member of the Chinle Formation. The Moss Back consists of greenish- to bluish-gray limestone-nodule conglomerate, siliciclastic sandstone, and siltstone deposited in high-energy fluvial channels and crevasse splays and on adjacent levees and floodplains. The drab colors of the Moss Back reflect the high organic-carbon content of strata deposited and preserved below the water table. These five cores record eolian and fluvial sedimentary structures and lithofacies sequences not well preserved in outcrops, they provide the basis for interpretation and comparison of depositional environments from lithofacies analysis in core and outcrop studies, and they establish the sedimentologic background for future petrographic and geochemical research on cores and outcrops from the Lisbon Valley area.

Wild Fruits Henry David Thoreau,2001-03-06 Thoreau presents information about the 'unnoticed wild berry whose beauty annually lends a new charm to some wild walk, ' along with what may be considered Thoreau's last will and testament, in which he protests our desecration of the landscape, reflects on the importance of preserving wild space 'for instruction and recreation, ' and envisions a new American scripture.--Jacket.

The College of the Atlantic Guide to the Lakes and Ponds of Mt. Desert William V. P. Newlin,Kenneth S. Cline,Rachel Briggs,A. Addison Namnoum,Brett Ciccotelli,2013-08-27 Mt. Desert Island, located off the coast of Maine, is blessed with more than twenty-five lakes and forty streams, but most visitors to the island are attracted by its granite coast and never get to explore “the lake country.” The revised and expanded edition of this one-of-a-kind guide is designed to give visitors the tools they need to get the most of this remarkable feature of Mt. Desert. In collaboration with students, graduates, and a professor from College of the Atlantic, author and longtime island summer resident William Newlin offers tips on what lakes are best for activities like boating, swimming, fishing, hiking, biking, and picnicking and provides readers the specific details they will need to make the most of their visit. Just where do you launch your kayak? Where are the best picnic rocks? What fish are available? Containing beautiful photos and illustrations, detailed, full-color maps, and informative sidebars that fill the reader in on interesting bits of natural history and local lore, this is an essential resource for vacationers and local adventurers alike.
