*One Glorious Ambition* Jane Kirkpatrick,2013-04-02 One dedicated woman...giving voice to the suffering of many Born to an unavailable mother and an abusive father, Dorothea Dix longs simply to protect and care for her younger brothers, Charles and Joseph. But at just fourteen, she is separated from them and sent to live with relatives to be raised properly. Lonely and uncertain, Dorothea discovers that she does not possess the ability to accept the social expectations imposed on her gender and she desires to accomplish something more than finding a suitable mate. Yearning to fulfill her God-given purpose, Dorothea finds she has a gift for teaching and writing. Her pupils become a kind of family, hearts to nurture, but long bouts of illness end her teaching and Dorothea is adrift again. It's an unexpected visit to a prison housing the mentally ill that ignites an unending fire in Dorothea's heart—and sets her on a journey that will take her across the nation, into the halls of the

Capitol, befriending presidents and lawmakers, always fighting to relieve the suffering of what Scripture deems, the least of these. In bringing nineteenth-century, historical reformer Dorothea Dix to life, author Jane Kirkpatrick combines historical accuracy with the gripping narrative of a woman who recognized suffering when others turned away, and the call she heeded to change the world.

United States Army in the Korean War: Ebb and Flow November 1950-July 1951 (Paperback) ,1990

**Blank on the Map** Eric Shipton, 2014-12-17 'As I studied the maps, one thing about them captured my imagination - Across this blank space was written one challenging word, Unexplored' In 1937 two of the twentieth century's greatest explorers set off to explore an unknown area of the Himalaya, the breath-taking Shaxgam mountains. With a team of surveyors and Sherpas, Eric Shipton and H.W. Tilman located and mapped the land around K2, the second-highest mountain in the world. It was their greatest venture, and one that paved the way for all future mountaineering in that area of the Himalaya. For Shipton and Tilman, exploration was everything, with a summit a welcome

bonus, and *Blank on the Map* is the book that best captures their spirit of adventure. With an observant eye and keen sense of humour, Shipton tells how the expedition entered the unknown Shaksgam mountains, crossing impenetrable gorges, huge rivers and endless snow fields. There's a very human element to in Shipton's dealings with his Sherpa friends, and with his Balti porters, some of whom were helpful, while some were less so. The expedition uncovers traces of ancient cultures and visits vibrant modern civilisations living during the last days of the British Empire. Only when all supplies are exhausted, their clothes in tatters and all equipment lost do the men finally return home. A mountain exploration classic.

**Dividing the Waters** William Andrew Blomquist, 1992 Not only are these water supplies not depleted, they are in fact relatively healthy despite California's recent six-year drought.

**Eleven Years in the Rocky Mountains and Life on the Frontier** Frances Fuller Victor, 1877 *Eleven Years in the Rocky Mountains and Life on the Frontier Also a History of the Sioux War, And a Life of Gen. George A. Custer with Full Account of His Last Battle* by Frances Victor Fuller, first published in 1877, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. *Combined Arms in Battle Since 1939*, 1992 The thirty-six chapters reflect changes in the military art. Each chapter deals with one case drawn from recent military history that illustrates and illuminates a problem with which a modern professional soldier may have to contend. Each case is set

in its strategic and operational context, explained in detail, and briefly analyzed.

The Late Age of Print Theodore G. Striphas, Ted Striphas, 2011 Here, the author assesses our modern book culture by focusing on five key elements including the explosion of retail bookstores like Barnes & Noble and Borders, and the formation of the Oprah Book Club.

**Mobility, shock, and firepower: The Emergence of the U.S. Army's Armor Branch, 1917-1945** Robert S. Cameron, 2008 From the Preface: The following pages provide a narrative analysis of the U.S. Army's development of armored organizations and their related doctrine, materiel, and training activities in the period 1917-1945. This period marked the emergence of clear principles of armored warfare that became the underpinning of the Armor Branch, influencing armored developments long after World War II ended. A unique style of mounted maneuver combat emerged that reflected a mix of tradition and innovation. In the process, American military culture changed, particularly through the adoption of combined-arms principles. Conversely, political actions, budgetary considerations, and senior leadership decisions also shaped the course of armor development. The emergence of an American armored force involved more than simply tank development. It included the creation of an armored division structure steeped in combined-arms principles, organizational flexibility, and revolutionary command and control processes. Parallel developments included the establishment of specialized units to provide antitank, reconnaissance, and infantry support capabilities. Several Army branches played a role in determining the precise path of armored development, and one of them-the Cavalry-became a casualty as a result.

**Tools in Fluvial Geomorphology** G. Mathias Kondolf, Hervé Piégay, 2016-04-28 Fluvial Geomorphology studies the biophysical processes acting in rivers, and the sediment patterns and landforms resulting from them. It is a discipline of synthesis, with roots in geology, geography, and

river engineering, and with strong interactions with allied fields such as ecology, engineering and landscape architecture. This book comprehensively reviews tools used in fluvial geomorphology, at a level suitable to guide the selection of research methods for a given question. Presenting an integrated approach to the interdisciplinary nature of the subject, it provides guidance for researchers and professionals on the tools available to answer questions on river restoration and management. Thoroughly updated since the first edition in 2003 by experts in their subfields, the book presents state-of-the-art tools that have revolutionized fluvial geomorphology in recent decades, such as physical and numerical modelling, remote sensing and GIS, new field techniques, advances in dating, tracking and sourcing, statistical approaches as well as more traditional methods such as the systems framework, stratigraphic analysis, form and flow characterisation and historical analysis. This book: Covers five main types of geomorphological questions and their associated tools: historical framework; spatial framework; chemical, physical and biological methods; analysis of processes and forms; and future understanding framework. Provides guidance on advantages and limitations of different tools for different applications, data sources, equipment and supplies needed, and case studies illustrating their application in an integrated perspective. It is an essential resource for researchers and professional geomorphologists, hydrologists, geologists, engineers, planners, and ecologists concerned with river management, conservation and restoration. It is a useful supplementary textbook for upper level undergraduate and graduate courses in Geography, Geology, Environmental Science, Civil and Environmental Engineering, and interdisciplinary courses in river management and restoration.

*The Medieval City* Norman Pounds, 2005-04-30 An introduction to the life of towns and cities in the medieval period, this book shows how medieval towns grew to become important centers of trade and

liberty. Beginning with a look at the Roman Empire's urban legacy, the author delves into urban planning or lack thereof; the urban way of life; the church in the city; city government; urban crafts and urban trade, health, wealth, and welfare; and the city in history. Annotated primary documents like Domesday Book, sketches of street life, and descriptions of fairs and markets bring the period to life, and extended biographical sketches of towns, regions, and city-dwellers provide readers with valuable detail. In addition, 26 maps and illustrations, an annotated bibliography, glossary, and index round out the work. After a long decline in urban life following the fall of the Roman Empire, towns became centers of trade and of liberty during the medieval period. Here, the author describes how, as Europe stabilized after centuries of strife, commerce and the commercial class grew, and urban areas became an important source of revenue into royal coffers. Towns enjoyed various levels of autonomy, and always provided goods and services unavailable in rural areas. Hazards abounded in towns, though. Disease, fire, crime and other hazards raised mortality rates in urban environs. Designed as an introduction to life of towns and cities in the medieval period, eminent historian Norman Pounds brings to life the many pleasures, rewards, and dangers city-dwellers sought and avoided. Beginning with a look at the Roman Empire's urban legacy, Pounds delves into Urban Planning or lack thereof; The Urban Way of Life; The Church in the City; City Government; Urban Crafts and Urban Trade, Health, Wealth, and Welfare; and The City in History. Annotated primary documents like Domesday Book, sketches of street life, and descriptions of fairs and markets bring the period to life, and extended biographical sketches of towns, regions, and city-dwellers provide readers with valuable detail. In addition, 26 maps and illustrations, an annotated bibliography, glossary, and index round out the work.
