Voynich Manuscript ,2015-12-11 A facsimile of an object of unknown authorship that has been the source of study and speculation for centuries and remains undecipherable to this day.

Monte Cassino in the Middle Ages Herbert Bloch,1986 The monastery of Monte Cassino, founded by St. Benedict in the sixth century, was the cradle of Western monasticism. It became one of the vital centers of culture and learning in Europe. At the height of its influence, in the eleventh and early twelfth centuries, two of its abbots (including Desiderius) and one of its monks became popes, and it controlled a vast network of dependencies--churches, monasteries, villages, and farms--especially in central and southern Italy. Herbert Bloch's study, the product of forty years of research, takes as its starting point the twelfth-century bronze doors of the basilica of the abbey, the most significant relic of the medieval structure. The panels of these doors are inscribed with a list of more than 180 of the abbey's possessions. Mr. Bloch has supplemented this roster with lists found in papal and imperial privileges and other documents. The heart of the book is a detailed investigation of the nearly 700 dependencies of Monte Cassino from the sixth to the twelfth century and beyond. No comparable study of this or any other great medieval institution has ever before been undertaken. Ironically, it was the bombing of 1944, which destroyed the monastery, that led to an unexpected revelation: the discovery, on the reverse side of some panels of the doors, of magnificent engraved figures of patriarchs and apostles. These proved to be remnants of the church portal ordered from Constantinople by Desiderius in the eleventh century, which marked the beginning of the grandiose reconstruction of the abbey and its church, the latter to become a model for many other churches. In order to solve the riddle of the doors of Monte Cassino, Bloch has investigated other bronze doors of Byzantine origin in Italy and the doors of the great Italian master Oderisius of Benevento, as well as those of S. Clemente a Casauria and of the cathedral of Benevento. Also included is a study of the political and cultural impact of Byzantium on Monte Cassino and a chapter on Constantinus Africanus, Saracen turned monk, one of the most interesting figures in the history of medieval medicine. The text is sumptuously illustrated with 193 plates; most of the more than 300 illustrations have never before been published. This three-volume work, with its nine detailed indexes, offers a wealth of information for scholars in many different fields.

The Voynich Manuscript Wilfrid Voynich,Anonyme,2012-06-25 This ebook is the complete reproduction of the preserved Voynich Manuscript, formatted for high resolution color ebook reader displays. The Voynich manuscript, also known as the world's most mysterious manuscript, is a work which dates to the early 15th century, possibly from northern Italy. It is named after the book dealer Wilfrid Voynich, who purchased it in 1912. Much of the manuscript resembles herbal manuscripts of the time period, seeming to present illustrations and information about plants and their possible uses for medical purposes. However, most of the plants do not match known species, and the manuscript's script and language remain unknown and unreadable. Possibly some form of encrypted ciphertext, the Voynich manuscript has been studied by many professional and amateur cryptographers, including American and British codebreakers from both World War I and World War II. As yet, it has defied all decipherment attempts, becoming a cause célèbre of historical cryptology. The mystery surrounding it has excited the popular imagination, making the manuscript a subject of both fanciful theories and novels. None of the many speculative solutions proposed over the last hundred years has yet been independently verified. Illustrations: The illustrations of the manuscript shed little light on the precise nature of its text but imply that the book consists of six sections, with different styles and subject matter. Except for the last section, which contains only text, almost every page contains at least one illustration. Following are the sections and their conventional names: Herbal: Each page displays one plant (sometimes two) and a few paragraphs of text—a format typical of European herbals of the time. Some parts of these drawings are larger and cleaner copies of sketches seen in the pharmaceutical section. None of the plants depicted is unambiguously identifiable. Astronomical: Contains circular diagrams, some of them with suns, moons, and stars, suggestive of astronomy or astrology. One series of 12 diagrams depicts conventional symbols for the zodiacal constellations (two fish for Pisces, a bull for Taurus, a hunter with crossbow for Sagittarius, etc.). Each of these has 30 female figures arranged in two or more concentric bands. Most of the females are at least partly naked, and each holds what appears to be a labeled star or is shown with the star attached by what could be a tether or cord of some kind to either arm. The last two pages of this section (Aquarius and Capricornus, roughly January and February) were lost, while Aries and Taurus are split into four paired diagrams with 15 women and 15 stars each. Some of these diagrams are on fold-out pages. Biological: A dense continuous text interspersed with figures, mostly showing small naked women, some wearing crowns, bathing in pools or tubs connected by an elaborate network of pipes, some of them strongly reminiscent of body organs. Cosmological: More circular diagrams, but of an obscure nature. This section also has foldouts; one of them spans six pages and contains a map or diagram, with nine islands or rosettes connected by causeways and containing castles, as well as what may possibly be a volcano. Pharmaceutical: Many labeled drawings of isolated plant parts (roots, leaves, etc.); objects resembling apothecary jars, ranging in style from the mundane to the fantastical; and a few text paragraphs. Recipes: Many short paragraphs, each marked with a flower- or star-like bullet.

National Security Space Launch Report Forrest McCartney,2006 In 1994, the National Space Transportation Policy laid the framework for appropriate government agencies to maintain strong launch systems and infrastructure while modernizing space transportation capabilities and encouraging cost reductions. More than a decade later, through combined Department of Defense (DoD) and industrial investment, the two Evolved Expendable Launch Vehicle (EELV) families of U.S. rockets (Atlas V and Delta IV) have proved to be maturing, reliable state-of-the-art technologies. In 2004, Congress directed the Secretary of Defense to establish a panel of experts with extensive space launch and operations background to address the future National Security Space launch requirements and the means of meeting those requirements. DoD selected RAND to facilitate and support this panel in its deliberations between May 2005 and May 2006. This report analyzes the National Security Space (NSS) Launch Requirements Panel's major findings and recommendations. In short, the Panel concludes that, because basic rocketry principles, use of chemically derived thrust, and multiple expendable stages seem certain to remain the design of choice for operational space launch vehicles, the EELV can satisfy all known and projected NSS requirements through 2020.

States of Injury Wendy Brown,2020-05-05 Whether in characterizing Catharine MacKinnon's theory of gender as itself pornographic or in identifying liberalism as unable to make good on its promises, Wendy Brown pursues a central question: how does a sense of woundedness become the basis for a sense of identity? Brown argues that efforts to outlaw hate speech and pornography powerfully legitimize the state: such apparently well-intentioned attempts harm victims further by portraying them as so helpless as to be in continuing need of governmental protection. Whether one is dealing with the state, the Mafia, parents, pimps, police, or husbands, writes Brown, the heavy price of institutionalized protection is always a measure of dependence and agreement to abide by the protector's rules. True democracy, she insists, requires sharing power, not regulation by it; freedom, not protection. Refusing any facile identification with one political position or another, Brown applies her argument to a panoply of topics, from the basis of litigiousness in political life to the appearance on the academic Left of themes of revenge and a thwarted will to power. These and other provocations in contemporary political thought and political life provide an occasion for rethinking the value of several of the last two centuries' most compelling theoretical critiques of modern political life, including the positions of Nietzsche, Marx, Weber, and Foucault.

Water, Electricity, and the Poor Kristin Komives,World Bank,2005 This book reviews the prevalence and variants of consumer subsidies found in the developing world and the effectiveness of these subsidies for the poor. It places consumer subsidies in a broader social protection framework and compares them with poverty-focused programmes in other sectors using a common metric. It concludes that the most common subsidy instruments perform poorly in comparison with most other transfer mechanisms. Alternative consumption and connection subsidy mechanisms show more promise, especially when combined with complementary non-price approaches to making utility services accessible and affordable to poor households. The many factors contributing to those outcomes are dissected, identifying those that can be controlled and used to improve performance.

Energy Harvesting Alireza Khaligh,Omer C. Onar,2017-12-19 Also called energy scavenging, energy harvesting captures, stores, and uses clean energy sources by employing interfaces, storage devices, and other units. Unlike conventional electric power generation systems, renewable energy

harvesting does not use fossil fuels and the generation units can be decentralized, thereby significantly reducing transmission and distribution losses. But advanced technical methods must be developed to increase the efficiency of devices in harvesting energy from environmentally friendly, green resources and converting them into electrical energy. Recognizing this need, *Energy Harvesting: Solar, Wind, and Ocean Energy Conversion Systems* describes various energy harvesting technologies, different topologies, and many types of power electronic interfaces for stand-alone utilization or grid connection of energy harvesting applications. Along with providing all the necessary concepts and theoretical background, the authors develop simulation models throughout the text to build a practical understanding of system analysis and modeling. With a focus on solar energy, the first chapter discusses the I–V characteristics of photovoltaic (PV) systems, PV models and equivalent circuits, sun tracking systems, maximum power point tracking systems, shading effects, and power electronic interfaces for grid-connected and stand-alone PV systems. It also presents sizing criteria for applications and modern solar energy applications, including residential, vehicular, naval, and space applications. The next chapter reviews different types of wind turbines and electrical machines as well as various power electronic interfaces. After explaining the energy generation technologies, optimal operation principles, and possible utilization techniques of ocean tidal energy harvesting, the book explores near- and offshore approaches for harvesting the kinetic and potential energy of ocean waves. It also describes the required absorber, turbine, and generator types, along with the power electronic interfaces for grid connection and commercialized ocean wave energy conversion applications. The final chapter deals with closed, open, and hybrid-cycle ocean thermal energy conversion systems.

Modern Methods in Analytical Morphology J. Gu,G.W. Hacker,2012-12-06 While advances in modern medicine largely parallel our understanding of morphology, discoveries in morphology are propelled by developments of new tools and means to visualize and measure tissue elements. The invention of dissecting, light, fluorescence and electron microscopes together with advances in labeling and staining techniques are among the stepping stones of morphological progress. Today, we are in an exciting new era when classical morphology is being combined with developments from other disciplines. The combination of morphology and immunology resulted in immunocytochemistry; morphology and molecular biology led to in situ hybridization and in situ PCR. Adding computer science to morphology gave birth to image analysis. Combining laser technology and the microscope evolved into confocal microscope. For more than a decade, modern morphology has continued to develop by merging with other disciplines at a rate that is still gathering momentum, providing exciting and dynamic new frontiers for other biological fields. *Modern Methods in Analytical Morphology*, based largely on the First International Workshop on Modern Methods in Analytical Histochemistry, is an updated review of the current trends in the field. It covers an extensive array of new technical developments in major disciplines of modern morphology. The authors are not only leaders in their fields but also have extensive hands on experience with bench work. Their chapters are written in a comprehensive manner including discussion of both theoretical considerations and practical applications to give the readers a broad view of the topics covered.

A Muslim Theologian in the Sectarian Milieu Gabriel Reynolds,2005-02-01 In 385 AH/AD 995 the Qāḍī ‘Abd al-Jabbār, well known for his Mu‘tazilī theological writings, wrote the Confirmation of the Proofs of Prophecy, a work that includes a creative polemic against Christianity. ‘Abd al-Jabbār reinterprets the Bible, Church history (especially the lives of Paul and Constantine) and Christian practice to argue that Christians changed the Islamic religion of Jesus. The present work begins with an examination of the controversial theory that this polemic was borrowed from an unknown Judaeo-Christian group. The author argues that ‘Abd al-Jabbār's polemic is better understood as a response to his particular milieu and the on-going inter-religious debates of the medieval Islamic world. By examining the life and thought of ‘Abd al-Jabbār, along with the Islamic, Christian and Jewish antecedents to his polemic, the author uncovers the intimate relationship between sectarian controversy and the development of an Islamic doctrine on Christianity.

Understanding Potential Changes to the Veterans Equitable Resource Allocation (VERA) System Jeffrey Wasserman,2004 The Veterans Health Administration asked RAND to conduct a quantitative analysis of the Veterans Equitable Resource Allocation (VERA) system, which allocates the congressionally appropriated medical care budget to the Veterans Integrated Service Networks. The study determines how particular patient and facility characteristics influence allocations to the service networks and simplifies and refines the models created in earlier RAND research to reflect policy changes and more recent data.
