Mobile Platforms and Development Environments Helal, Sumi,Raja Bose,Wendong Li,2012-02-01 Mobile platform development has lately become a technological war zone with extremely dynamic and fluid movement, especially in the smart phone and tablet market space. This Synthesis lecture is a guide to the latest developments of the key mobile platforms that are shaping the mobile platform industry. The book covers the three currently dominant native platforms -- iOS, Android and Windows Phone -- along with the device-agnostic HTML5 mobile web platform. The lecture also covers location-based services (LBS) which can be considered as a platform in its own right. The lecture utilizes a sample application (TwitterSearch) that the authors show programmed on each of the platforms. Audiences who may benefit from this lecture include: (1) undergraduate and graduate students taking mobile computing classes or self-learning the mobile platform programmability road map; (2) academic and industrial researchers working on mobile computing R&D projects; (3) mobile app developers for a specific platform who may be curious about other platforms; (4) system integrator consultants and firms concerned with mobilizing businesses and enterprise apps; and (5) industries including health care, logistics, mobile workforce management, mobile commerce and payment systems and mobile search and advertisement. Roadrunner's Dance Rudolfo Anaya,2000-08-01 Because Rattlesnake has taken over the road and will not let any of the people or animals in the village use it, Desert Woman enlists the aid of the other animals to create a strange new creature with the necessary tools to overcome Rattlesnake.

Manhunt James Barrington,2016-04-25 First in a series about a British navy veteran who goes to work for the secret service to bring down a defector threatening Britain's national security. Nobody is ever above suspicion in the 'wilderness of mirrors' that is the world of intelligence, but when a senior officer goes bad it still hurts. When that senior officer can't be identified, it hurts even more. Conventional detective work to unmask him is going to be too slow, and probably unreliable, so an alternative strategy has to be formulated. With the security of Britain's most secret computer system at stake, and trust a commodity in short supply, a deception operation is set in train to flush out the traitor. Paul Richter, an unemployed ex-Naval aviator, is the unwitting and ultimately expendable bait in the trap. But as the net closes around the traitor in France, a female Russian intelligence officer flees Moscow and the evidence she brings points the finger of suspicion in a very different direction. With time running out, and nobody he can trust, Richter finds himself battling against both the British security establishment and trained teams of Russian assassins with orders to kill both him and the woman he's trying to protect.

Seven Mobile Apps in Seven Weeks Tony Hillerson, 2016-08-01 Answer the question Can we build this for ALL the devices? with a resounding YES. Learn how to build apps using seven different platforms: Mobile Web, iOS, Android, Windows, RubyMotion, React Native, and Xamarin. Find out which cross-platform solution makes the most sense for your needs, whether you're new to mobile or an experienced developer expanding your options. Start covering all of the mobile world today. Understanding the idioms, patterns, and quirks of the modern mobile platforms gives you the power to choose how you develop. Over seven weeks you'll build seven different mobile apps using seven different tools. You'll start out with Mobile Web; develop native apps on iOS, Android, and Windows; and finish by building apps for multiple operating systems using the native cross-platform solutions RubyMotion, React Native, and Xamarin. For each platform, you'll build simple, but non-trivial, apps that consume JSON data, run on multiple screen sizes, or store local data. You'll see how to test, how to build views, and how to structure code. You'll find out how much code it's possible to share, how much of the underlying platform you still need to know, and ultimately, you'll get a firm understanding of how to build apps on whichever devices your users prefer. This book gives you enough first-hand experience to weigh the trade-offs when building mobile apps. You'll compare writing apps on one platform versus another and understand the benefits and hidden costs of cross-platform tools. You'll get pragmatic, hands-on experience writing apps in a multi-platform world. What You Need: You'll need a computer and some experience programming. When we cover iOS, you'll need a Mac, and when we cover Windows Phone you'll need a computer with Windows on it. It's helpful if you have access to an iPhone, Android phone, and Windows Phone to run the examples on the devices where mobile apps are ultimately deployed, but the simulators or emulator versions of those phones work great.

New England Son Thomas Lee Mitchell, 2013-08-29 Interest in family history was sparked during events on my 65th birthday in 2003. Throughout life I spent thoughts and energy living the moment or planning the future, proud of never looking back. This mindset changed when Danny, my oldest grandson interviewed me for a 6th grade project. His assignment was to survey the teen history of an older family member. Danny presented his report to his class and later at my birthday party in Greenwich, Connecticut. His recitation and its reception encouraged me to share more from those early beginnings. It was surprising that a grandchild was curious about my background with its ethnic neighborhoods, the frugal, simple, yet happy days, our values of faith, loyalty and self-reliance - the naivety and enjoyment of games like stick ball, houses fueled by coal, political rascals and war heroes. Family members who want to understand what it was like back then now have this opportunity. The objective is to tell a story that chronicles lives of interest to descendants. Over the years I asked mother and aunt to share their ancestry. Unfortunately these pleas came too late. The trail was dusty and dark. Ninety-seven year old Aunt Jean, the last survivor of fathers family, responded by saying, Why do you want to know all that old stuff? My mothers memory and speech were stroke impaired. I realized that if our grandchildren were to know our roots, it was up to me. A cautionary note: Memory filters and glamorizes experiences while choosing to make trivial events significant. Gaps are intentional or accidentally erased from memory.

Accuracy is a goal with a touch of exaggeration to maintain interest. Sequences may be rearranged by the storyteller. Infrequent but memorable encounters with the opposite sex are deleted to satisfy puritan ancestors. If you are keeping count, I had three serious girlfriends including my wife. Frankly most women frightened me as a teenager. Today they are just a pleasant but beguiling mystery.
